<b>Market price:</b>	\$13.44 - \$18.17	<b>Average bid-ask spread:</b>	0.43%
<b>Net asset value (NAV):</b>	\$13.61 - \$17.93		

**What does the ETF invest in?**

The investment objective of the ETF is to provide unitholders with exposure to the performance of a diversified portfolio of high-quality equity securities in markets in Europe, Australasia and the Far East (EAFE) that are expected to provide regular income from dividends and that have the potential for long-term capital growth. Portfolio securities for the ETF are selected and weighted using a rules-based, multi-factor investment approach that considers a company's balance sheet strength, the stability and sustainability of its dividend payout and/or its ability to pay or grow dividends in the future.

The charts below give you a snapshot of the ETF's investments on March 31, 2023. The ETF's investments will change.

<b>Total percentage of top 10 investments</b>	<b>19.0%</b>

<b>Total number of investments</b>	<b>223</b>
------------------------------------	------------

**Investment mix (March 31, 2023)****How risky is it?**

The value of the ETF can go down as well as up. You could lose money.

One way to gauge risk is to look at how much an ETF's returns change over time. This is called "volatility".

In general, ETFs with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

**Risk rating**

RBC GAM has rated the volatility of this ETF as **medium**.

This rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the ETF's returns, see the section entitled "Risk Ratings of the RBC ETFs" and "Risk factors" in the ETF's prospectus.

**No guarantees**

Like most exchange-traded funds, this ETF doesn't have any guarantees. You may not get back the amount of money you invest.

## How has the ETF performed?

This section tells you how the units of the ETF have performed over the past eight years. Returns<sup>1</sup> are after expenses have been deducted. These expenses reduce the ETF's returns.

<sup>1</sup> Returns are calculated using the ETF's net asset value (NAV).

### Year-by-year returns

This chart shows how the units of the ETF performed in each of the past eight years. The ETF dropped in value in three of the eight years. The range of returns and change from year to year can help you to assess how risky the ETF has been in the past. It does not tell you how the ETF will perform in the future.

### Best and worst 3-month returns

This table shows the best and worst returns for units of the ETF in a 3-month period over the past eight years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	19.2%	January 31, 2021	Your investment would rise to \$1,192
Worst return	-23.3%	March 31, 2020	Your investment would fall to \$767

### Average return

The value of a hypothetical \$1,000 investment in units of the ETF since the time of the ETF's inception is \$1,278 which represents an annual compounded rate of return of 2.7% as of March 31, 2023.

## Trading ETFs

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

### Pricing

ETFs have two sets of prices: market price and net asset value (NAV).

#### Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can affect the market price.
- You can get price quotes any time during the trading day. Quotes have two parts: **bid** and **ask**.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF units. The ask is the lowest price a seller is willing to accept if you want to buy ETF units. The difference between the two is called the "**bid-ask spread**".
- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

#### Net asset value (NAV)

- Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investments at that point in time.
- NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

### Orders

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell units at the current market price. A limit order lets you set the price at which you are willing to buy or sell units.

### Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

**What if I change my mind?**

Under securities law in some provinces and territories, you have the right to cancel your purchase within 48 hours after you receive confirmation of the purchase.

In some provinces and territories, you also have the right to cancel a purchase, or in some jurisdictions, claim damages, if this document, the ETF's prospectus or the ETF's financial statements contain a misrepresentation. You must act within the time limit set by the securities law in your province or territory.

For more information, see the securities law of your province or territory or ask a lawyer.

**For more information**

Contact RBC GAM or your representative for a copy of the ETF's prospectus and other disclosure documents. These documents and the ETF Facts make up the ETF's legal documents.
