Fund Manager & Portfolio Manager:	RBC Global Asset Management Inc.	Average Daily Volume:	62,295 units		
Distributions:	Monthly	Number of Days Traded:	251 out of 251 trading days		

What does the ETF invest in?

The investment objective of the ETF is to provide unitholders with exposure primarily to the performance of a diversified portfolio of Canadian corporate and government bonds, divided ("laddered") into five groupings with staggered maturities from one to five years, that will provide regular income while preserving capital. The ETF will achieve exposure to Canadian corporate and government bonds primarily by investing in a portfolio of five equally weighted sub-portfolios, each of which is targeted to provide at least 30% exposure to government bonds and no more than 70% exposure to corporate bonds. The portfolios may deviate at times from their targeted weights due to market fluctuations between rebalance periods. The government bond exposure will be obtained by direct investment in one or more government bonds, while the corporate bond exposure will be obtained primarily by investing in an appropriate RBC Target Maturity Corporate Bond ETF.

The charts below give you a snapshot of the ETF's investments on July 31, 2018. The ETF's investments will change.

Corporate Bonds – Real Estate	2.2%

How risky is it?

The value of the ETF can go down as well as up. You could lose money.

One way to gauge risk is to look at how much an ETF's returns change over time. This is called "volatility".

In general, ETFs with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

RBC GAM has rated the volatility of this ETF as **low**.

This rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the ETF's returns, see the section entitled "Risk factors" in the ETF's prospectus.

No guarantees

Like most exchange-traded funds, this ETF doesn't have any guarantees. You may not get back the amount of money you invest.

How has the ETF performed?

This section tells you how the units of the ETF have performed over the past calendar year. Returns¹ are after expenses have been deducted. These expenses reduce the ETF's returns. Your actual after-tax return will depend on your personal tax situation.

Year-by-year returns

This chart shows how units of the ETF performed in the past completed calendar year. The ETF did not drop in value in the past year.

¹ Returns are calculated using the ETF's net asset value (NAV).

Best and worst 3-month returns

This table shows the best and worst returns for units of the ETF in a 3-month period over the past two years ending July 31, 2018. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	1.1%	Apr. 30, 2017	Your investment would rise to \$1,011
Worst return	-1.2%	Jul. 31, 2017	Your investment would drop to \$988

Average return

The value of a hypothetical \$1,000 investment in units of the ETF since the time of the ETF's inception is \$1,023 which represents an annual compounded rate of return of 0.9% as of July 31, 2018.

Trading ETFs

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

Pricing

ETFs have two sets of prices: market price and net asset value (NAV).

Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can affect the market price.
- You can get price quotes any time during the trading day. Quotes have two parts: **bid** and **ask**.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF units. The ask is the lowest price a seller is willing to accept if you want to buy ETF units. The difference between the two is called the "**bid-ask spread**".
- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

Net asset value (NAV)

- Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investments at that point in time.
- NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

Orders

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell units at the current market price. A limit order lets you set the price at which you are willing to buy or sell units.

Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

Who is this ETF for?

Investors who:

- are looking for regular income,
- want to invest in Canadian bonds,
- can accept fluctuations in the value of their investment.

A word about tax

In general, you'll have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where you live and whether or not you hold the ETF in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, distributions from the ETF are included in your taxable income, whether you get them in cash or have them reinvested.

How much does it cost?

This section shows the fees and expenses you could pay to buy, own and sell units of the ETF. Fees and expenses – including any trailing commissions – can vary among ETFs.

Higher commissions can influence representatives to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

1. Brokerage commissions

You may have to pay a commission every time you buy and sell units of the ETF. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free ETFs or require a minimum purchase amount.

2. ETF expenses

You don't pay these expenses directly. They affect you because they reduce the ETF's returns.

As of June 30, 2018, the ETF's expenses were 0.25% of its value. This equals \$2.50 for every \$1,000 invested.

Annual rate (as a % of the ETF's value)

Management expense ratio (MER)

This is the total of the ETF's total annual management fee and operating expenses. The fund's total annual management fee includes the management fee payable to RBC GAM by the fund as well as the underlying product fees payable to RBC GAM by the underlying funds in which the fund invests. 0.25%

Trading expense ratio (TER)

These are the ETF's trading costs. –

ETF expenses

The amount included for ETF expenses is the amount arrived at by adding the MER and TER. 0.25%

3. Trailing commission

The trailing commission is an ongoing commission. It is paid for as long as you own the ETF. It is for the services and advice that your representative and their firm provide to you.

This ETF doesn't have a trailing commission.

4. Other fees

Fee	What you pay
Exchange and Redemption fee	Upon an exchange or redemption of units of the ETF, RBC GAM may charge to unitholders, at its discretion, an exchange or redemption fee of up to 0.05% of the exchange or redemption proceeds to offset certain transaction costs associated with the exchange or redemption.

What if I change my mind?

Under securities law in some provinces and territories, you have the right to cancel your purchase within 48 hours after you receive confirmation of the purchase.

In some provinces and territories, you also have the right to cancel a purchase, or in some jurisdictions, claim damages, if this document, the ETF's prospectus or the ETF's financial statements contain a misrepresentation. You must act within the time limit set by the securities law in your province or territory.

For more information, see the securities law of your province or territory or ask a lawyer.

For more information

Contact RBC GAM or your representative for a copy of the ETF's prospectus and other disclosure documents. These documents and the ETF Facts make up the ETF's legal documents.
