Quarterly Commentary as at September 30, 2017

RBC Retirement Income Solution was launched on October 11, 2016. Investment performance is not provided for a fund that has been available for less than one year.

Our models continue to suggest the long-term direction for bond yields is higher, which would

weigh on total returns for bond holders. Prospective returns for equities are much better than for fixed income, but the valuation tailwind from falling interest rates may be exhausted so earnings growth is now critical for the continuity of the bull market.
