

RBC Canadian T-Bill Fund

Investment Objective

To preserve the value of investment and to provide current income and liquidity consistent with short-term money market rates. The fund invests in high-quality, short-term (one year or less) debt securities, such as Canadian federal government treasury bills, federal government-guaranteed notes, provincial government treasury bills and promissory notes.

Quarterly Commentary as at March 31, 2017

The Canadian economy recovered further during the quarter, reflecting a healthier labor market and improved business confidence. The Bank of Canada (BoC), however, looked through the strength, and viewed it as temporary, as economic slack in the Canadian economy remained significant. Despite Canadian data improving, a sidelined BoC prevented Canadian yields from materially increasing, as expectations of a rate hike were a year away.

Globally, central banks maintained their easing policy posture even though growth projections were upgraded, suggesting that the worst of the fallout from the global financial crisis is over. This was most evident in the U.S., where the Federal Reserve tightened policy by another 0.25% only three months after its last tightening. With U.S. labor markets recovering and confidence on the mend, more tightening has been factored in the U.S. over the next few months.

Canadian market rates increased slightly through the quarter, but by a much lower magnitude than

in the U.S. In the RBC Canadian T-Bill Fund, provincial paper remained the most widely held investment as yields were attractive relative to Federal T-bill yields. Average term to maturity remained at relatively higher levels, reflecting no expectations of BoC tightening anytime soon. Accordingly, occasional investments further out the curve were executed whenever yields appeared attractive.

As the Canadian economy recovers, pressure on the BoC's sidelined policy stance will intensify. With the U.S. already having tightened three times in a little over a year, the spillover of economic recovery into Canada may pressure yields up. As the U.S. economy is expected to gain momentum over the medium term, the economic benefit to Canada is also expected to grow, provided that trade flows are not restricted, which remains a potential risk given the U.S. administration's protectionist impulses. We anticipate that the next quarter will see Canadian monetary policy unchanged, and yields to be generally unaffected.

Disclosure

RBC Funds, BlueBay Funds, PH&N Funds and RBC Corporate Class Funds are offered by RBC Global Asset Management Inc. and distributed through authorized dealers.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus or Fund Facts document before investing. Except as otherwise noted, the indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any unitholder that would have reduced returns. Mutual funds are not guaranteed or covered by the Canadian Deposit Insurance Corporation or by any other government deposit insurer. For money market funds, there can be no assurances that the fund will be able to maintain its net asset value per unit at a constant amount or that the full amount of your investment in the fund will be returned to you. The value of mutual funds change frequently and past performance may not be repeated.

This document has been compiled by RBC Global Asset Management Inc. (RBC GAM) from sources believed to be reliable, but no representations or warranty, express or implied, are made by RBC GAM, its affiliates or any other person as to its accuracy, completeness or correctness. All opinions

and estimates constitute RBC GAM's judgment as of the date of this document, are subject to change without notice and are provided in good faith but without legal responsibility. The Top Ten/25 Holdings may change due to ongoing portfolio transactions within the fund. The Prospectus and other information about the underlying investment funds are available at www.sedar.com.

MER (%) for RBC Funds and PH&N Funds is based on actual expenses for the full-year period, January 1 to December 31, 2016, expressed on an annualized basis.

MER (%) for RBC Corporate Class Funds is based on actual expenses for the full-year period, April 1, 2016 to March 31, 2017, expressed on an annualized basis.

Adjusted MER is provided for funds with management fee changes effective June 30, 2016. The Adjusted MER represents what the reported MER would have been had management fee changes been in effect throughout 2016.

Series H and Series I are not available for purchase by new investors. Existing investors who hold Series H or Series I units can continue to make additional investments into the same series of the funds they hold.

PH&N Funds Series A formerly known as Series C.

Quartile rankings are determined by Morningstar Research Inc., an independent research firm, based on categories maintained by the Canadian Investment Funds Standards Committee (CIFSC). Quartile rankings are comparisons of the performance of a fund to other funds in a particular category and are subject to change monthly. The quartiles divide the data into four equal segments expressed in terms of rank (1, 2, 3 or 4). This is the Morningstar quartile ranking of Series A and F units of the Fund as of April 30, 2017.
