### Quarterly Commentary as at December 31, 2017

Asian markets continued to post robust gains during Q4, continuing strong performance seen in 2017. Equity markets across Asia and emerging markets performed very well on the back of an upswing in global economic data and solid regional economic performance, particularly in China.

During Q4, the strongest-performing markets in the Asia Pacific region were China, South Korea and Australia. At the sector level, Information Technology and Financials outperformed while Utilities and Telecommunication Services lagged the benchmark.

The Consumer Staples and Industrial sectors were the leading contributors to the Fund's relative performance while the Energy sector detracted from the benchmark during Q4. The strongest performance came from our position in Ping An Insurance, a financial conglomerate in China, with one of the best insurance franchises in China. Ping An is also a leader in FinTech, with some of its subsidiaries showing long term potential.

On the other hand, the largest negative detractor to relative performance came from our position in Largan Precision, which makes optical lens and electronic components used in smartphones. Shares of Largan fell, as the company lost market share to its competitors Sunny Optical, Kantatsu and Genius. In addition, the market is concerned that hybrid lens could be more disruptive than expected to Largan's core business of plastic lenses.

The backdrop for Asian economies remains constructive. While the U.S. Federal Reserve is expected to raise rates and shrink its balance sheet, which may lead to short term volatility, Asian economies remain in decent shape, led by local consumption and supportive government policies. If the U.S. dollar continues to remain weak, this will benefit export led Asian economies and keep inflation benign. Provided inflation in Asia remains low, governments can continue to maintain favorable monetary conditions. Geopolitical concerns are a tail risk.

Quartile rankings are determined by Morningstar Research Inc., an independent research firm, based on categories maintained by the Canadian Investment Funds Standards Committee (CIFSC). Quartile rankings are comparisons of the performance of a fund to other funds in a particular category and are subject to change monthly. The quartiles divide the data into four equal segments expressed in terms of rank (1, 2, 3 or 4). This is the Morningstar quartile ranking of Series A and F units of the Fund as of January 31, 2018.
