Quarterly Commentary as at March 31, 2017

Global stock markets continued to plod higher in the beginning of the quarter, extending the growth that began after Donald Trump's election. The result has influenced global optimism across equity markets based on expectations surrounding potential tax cuts, fiscal spending and economic deregulation.

The Fund's position in Consumer Staples added significantly to returns for the quarter. An allocation in Philip Morris International was among the biggest gainers in the portfolio after strong Q1 results were produced by the firm. Health Care was also a strong contributor. Results from Johnson & Johnson boosted returns as well.

Returns were hurt by certain exposures in Telecommunication Services. Allocations to AT&T and Verizon detracted from performance. The Consumer Discretionary sector also had a negative impact on performance of the fund as positions in General Motors and Toyota held back returns.

The Fund's trading activity is a function of its quantitative investment process in which our rigorous research process and approach to portfolio construction serve as a base to optimize position size to match fundamental conviction and minimize exposure to less repeatable, unintended risk factors.
