Quarterly Commentary as at March 31, 2018

The Canadian equity market declined this quarter, lagging all major markets amid a global equity sell-off triggered by major spikes in U.S. market volatility in February and March. The Canadian market suffered due to concerns about rising yields, uncertainty surrounding NAFTA negotiations and increased U.S. protectionism.

This quarter, the Fund underperformed its custom benchmark. The Financials sector was the biggest drag on performance for the period. A holding in Element Fleet Management Corp. was the single largest detractor as the Toronto-based company faced unexpected challenges while merging IT systems following two large acquisitions which resulted in the loss of a few large customers and negatively affected the stock price. Despite the setback, we remain comfortable in our position due to the recovery plan in place, and believe that clarity surrounding a joint venture the company is involved in will support improvement in the share price going forward. The Fund's exposure to the Energy sector was a modest inhibitor to relative performance due to continued weakness of

domestic prices for crude oil. Positions in Tourmaline Oil Corp. and Seven Generations Energy Ltd. held back the Fund's returns.

The Fund's holdings in the Information Technology sector were the largest positive contributor over the quarter. A key position in the consulting and systems integration company, CGI Group, contributed significantly on the positive side of the ledger. The Fund's holdings in the Materials sector were also an area of strength for the period as the global label maker, CCL Industries Inc., had excellent fourth quarter 2017 results with outstanding sales gains from Europe and emerging markets.

The Fund's trading activity is a function of our investment process. Our disciplined fundamental research process and approach to portfolio construction seek to optimize position sizes to match fundamental conviction and minimize exposure to unpredictable risk factors.
