Quarterly Commentary as at December 31, 2011

The RBC U.S. Equity Currency Neutral Fund (Series A) returned 8.4% in the 4th quarter, compared to 11.8% for its benchmark.

U.S. equity markets climbed during the Q4 on optimism that Eurozone policymakers would have some success in alleviating the stress affecting global markets. Another factor aiding U.S. stocks was the better-than-expected economic statistics. This strengthened confidence that U.S. economic growth would counterbalance concerns about the slowing global expansion. The portfolio manager expects U.S. economic growth to remain steady as consumers pay down debt to levels that are more sustainable.

We saw moderate volatility this quarter, but we expect the equity market to continue to be variable throughout 2012. Corporate earnings continue to hold up well and balance sheets remain healthy, a trend we would expect to continue as corporate

executives plan conservatively over the next year. We believe that growth will remain moderate due to the slow global growth impacted by Europe's economic conditions. Valuations remain quite attractive, particularly in relation to other long term investment alternatives. We continue to feel if one has a time horizon beyond the very near term, they will be rewarded for owning U.S. stocks.

Outperformance in Financials and Consumer Staples aided the Fund, while Information Technology, Materials, and Energy detracted from overall performance during the quarter. Strong individual performance in companies like Occidental Petroleum, Union Pacific Railways, Home Depot, and Google all contributed to the performance of the Fund, while companies such as Broadcom, Oracle, Amerisourcebergen, and Costco temporarily lagged the general market.

Quartile rankings are determined by Morningstar Research Inc., an independent research firm. Quartile rankings are comparisons of the performance of a fund to other funds in a particular category and are subject to change monthly. The quartiles divide the data into four equal segments expressed in terms of rank (1, 2, 3 or 4). This is the Morningstar quartile ranking of Series A units of the Fund as of December 31, 2011.

Morningstar ratings are overall ratings reflecting risk adjusted performance as December 31, 2011. The ratings are subject to change every month. The ratings are calculated for funds with a minimum of 3 years of performance, calculated from the funds' 1 and 3 year average annual returns measured against a 91-day Treasury Bill return with appropriate fee adjustments. The top 10% of the funds in a category receive 5 stars (high); if the funds fall in the next 22.5%, they receive 4 stars (above average); a place in the middle 35% earns a fund 3 stars (neutral or average); those in the next 22.5% receive 2 stars (below average); and the lowest 10% get 1 star (low). Ratings are just one factor to consider when investing. For more information, please see www.morningstar.ca.
