Quarterly Commentary as at March 31, 2017

The Fund performed well this quarter, as its overweight position in equities and underweight position in bonds proved positive as bonds delivered lower returns.

During the quarter, the Fund's U.S. and international equity components outperformed their respective benchmarks, while the Canadian component underperformed its benchmark. Also, the bond component outperformed its benchmark.

Significant contributors to Fund performance in the Canadian equity allocation included Teck Resources (+8%), Canadian Tire (+13%) and Open Text (+9%). Negative contributors to relative performance included Cenovus Energy (-26%), Suncor Energy (-8%) and SNC-Lavalin (-10%).

As expected, the U.S. Federal Reserve raised its benchmark rate at its March meeting. However, during the quarter, expectations for the pace and extent of U.S. President Trump's pro-growth policies moderated somewhat, contributing to slightly lower bond yields.

We continue to be more constructive on the outlook for equities in comparison to bonds. Given the strength of corporate balance sheets, the current low-rate environment, and the ability to generate solid cash flows, we continue to be optimistic that equity markets will outperform bond markets over the medium and long term. As such, our asset mix remains positioned with an overweight position in equities and underweight position in bonds.
