### Quarterly Commentary as at June 30, 2017

RBC Retirement Income Solution was launched on October 11, 2016. Investment performance is not provided for a fund that has been available for less than one year.

The portfolio manager is budgeting for a bit faster global economic growth over the next few years than has been the case in the recent past, and expects bond yields to rise over the long term. However, fading confidence in President Trump's ability to bolster growth and generate faster inflation has recently weighed on yields,

reintroducing the fixed-income valuation risk that had been alleviated shortly after the election.

Global equities have reached new highs and valuations may no longer be a driving force for stocks, at least in the U.S. Fortunately, U.S. profit growth is recovering from a two-year decline and, if earnings continue to rise as analysts expect, the total-return potential for stocks remains quite positive.

Quartile rankings are determined by Morningstar Research Inc., an independent research firm, based on categories maintained by the Canadian Investment Funds Standards Committee (CIFSC). Quartile rankings are comparisons of the performance of a fund to other funds in a particular category and are subject to change monthly. The quartiles divide the data into four equal segments expressed in terms of rank (1, 2, 3 or 4). This is the Morningstar quartile ranking of Series A and F units of the Fund as of April 30, 2017.
