### Quarterly Commentary as at June 30, 2017

Canadian short term bond yields spiked during the quarter, in the wake of an unexpected announcement from the Bank of Canada (BoC) that its ultra-easy monetary policy may no longer be appropriate. Canadian economic growth has bounced since last year, with most metrics showing a sustained recovery across most sectors. The impulse for central bank removing accommodative policy was underscored by the U.S. Federal Reserve, which tightened a third time since late last year, reflecting the U.S. economy gathering further momentum. The global economy has also shown compelling evidence of a bottoming out, with the European Central Bank and the Bank of England both contemplating ending their long run of emergency policy.

Bond yields with short maturities increased approximately 0.4%, while mid maturity bonds backed up closer to 0.2%. Long-term bond yields fell through the quarter, reflecting no evident inflation pressures.

The Fund Manager adopted a more defensive posture for the Fund in light of the BoC's surprise announcement; building up cash and cutting back on federal bonds. Corporate bond exposure fell slightly.

The BoC's unexpected announcement was an inflection point in the path of monetary policy. It ushers in the end of overly easy policy, and suggests the BoC is looking to reclaim the 0.5% of easing it executed after energy prices collapsed. Once that is done, we expect the BoC to reassess the state of the Canadian economy before deciding on whether to continue along its tightening path. With the Canadian economy on firmer footing, aided by recoveries in the U.S. and global economies, the bias now turns to retreating from easy policy in Canada, and as such a more defensive management strategy will be in force for the Fund.
