

RBC Canadian Money Market Fund

Investment Objective

To provide current income and liquidity consistent with short-term money market rates and to preserve the value of your investment. The fund invests primarily in high quality, short-term (one year or less) debt securities, including treasury bills and promissory notes issued or guaranteed by Canadian governments or their agencies, bankers acceptances, asset-backed commercial paper and commercial paper issued by Canadian chartered banks, loan companies, trust companies and corporations.

Quarterly Commentary as at September 30, 2017

Immediately following its surprise announcement that ultra-easy monetary policy would no longer be appropriate, the Bank of Canada (BoC) tightened twice in quick succession during Q3. While the first hike of 0.25% came as no surprise, the second one did catch some participants off guard as the BoC stipulated the tightening would be gradual, and dependent on forthcoming data. While the data was firm, inflation pressures were not, leaving many market participants thinking the BoC would be less aggressive in its timing. This was particularly evident when some data releases suggested the Canadian economy would start slowing down in Q3. The Canadian dollar jumped higher on the moves, particularly as there was no tightening action in the U.S. over the quarter to offset the Canadian tightening.

Canadian money market rates increased approximately 25-40 basis points through the quarter, as the market quickly repriced higher funding levels in the wake of the 0.50% increase in the Bank Rate. The RBC Canadian money market

funds' overall exposure to corporate and securitized paper remained unchanged. Average term to maturity was cut back somewhat to lower levels, as protection against more possible tightening over the medium term.

The BoC's two quick rate hikes jarred markets out of their multiyear complacency. Further rate hikes are likely, although timing has become somewhat of a guessing game, reliant on economic releases and the market's interpretation of how much the ongoing low inflation environment will influence the BoC's policy deliberations. Given that the Canadian economy is recovering and is more sustainable, policy bias in Canada is firmly in the direction of higher rates, although the path of increases is expected to be uneven and unpredictable. Going forward, this uncertainty will necessitate a strategy combining liquidity with occasional forays out the yield curve to secure higher yields.

RBC Canadian Money Market Fund

Disclosure

RBC Funds, BlueBay Funds, PH&N Funds and RBC Corporate Class Funds are offered by RBC Global Asset Management Inc. and distributed through authorized dealers.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus or Fund Facts document before investing. Except as otherwise noted, the indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any unitholder that would have reduced returns. Mutual funds are not guaranteed or covered by the Canadian Deposit Insurance Corporation or by any other government deposit insurer. For money market funds, there can be no assurances that the fund will be able to maintain its net asset value per unit at a constant amount or that the full amount of your investment in the fund will be returned to you. The value of mutual funds change frequently and past performance may not be repeated.

This document has been compiled by RBC Global Asset Management Inc. (RBC GAM) from sources believed to be reliable, but no representations or warranty, express or implied, are made by RBC GAM, its affiliates or any other person as to its accuracy,

completeness or correctness. All opinions and estimates constitute RBC GAM's judgment as of the date of this document, are subject to change without notice and are provided in good faith but without legal responsibility. The Top Ten/25 Holdings may change due to ongoing portfolio transactions within the fund. The Prospectus and other information about the underlying investment funds are available at www.sedar.com.

MER (%) for RBC Funds, PH&N Funds and Bluebay Funds is based on actual expenses for the half-year period, January 1 to June 30, 2017, expressed on an annualized basis.

MER (%) for RBC Corporate Class Funds is based on actual expenses for the full-year period, April 1, 2016 to March 31, 2017, expressed on an annualized basis.

Adjusted MER is provided for funds with management fee changes effective June 30, 2016. The Adjusted MER represents what the reported MER would have been had management fee changes been in effect throughout 2016.

Series H and Series I are not available for purchase by new investors. Existing investors who hold Series H or Series I units can continue to make additional investments into the same series of the funds they hold.

Quartile rankings are determined by Morningstar Research Inc., an independent research firm, based on categories maintained by the Canadian Investment Funds Standards Committee (CIFSC). Quartile rankings are comparisons of the performance of a fund to other funds in a particular category and are subject to change monthly. The quartiles divide the data into four equal segments expressed in terms of rank (1, 2, 3 or 4). This is the Morningstar quartile ranking of Series A and F units of the Fund as of September 30, 2017.
