Quarterly Commentary as at March 31, 2018

The Fund was launched on January 29, 2018. Investment performance is not provided for a fund that has been available for less than one year.

The U.S. economy continues to recover and inflation pressures are beginning to stir, leaving the U.S. Federal Reserve (Fed) firmly on its path toward more tightening. However, uncertainty over trade skirmishes between the U.S. and China could cloud the Fed's economic projections, which could

interfere with the tightening program's pace. Thus, while continued tightening in the U.S. is most likely, our defensive posture for the Fund will continue to be appropriate. There will also be opportunities to invest at higher yields further out on the curve, which will buffer the Fund in the event that the Fed decides it is appropriate to delay its tightening program for a while.
