Quarterly Commentary as at September 30, 2017

During Q3, an overweight exposure to Momentum was the largest contributor to returns. An underweight allocation to the Size factor also aided returns. An overweight allocation to the Value factor was the largest detractor from performance. Additionally, an overweight allocation to the Yield factor hurt performance. The strategy screens out the most poorly ranked names through Earnings Quality, Financial Strength, and Earnings Growth.

The companies leading the market so far in 2017 have had characteristics that we actively avoid. Expensive Momentum names, like Biotechnology, have outperformed the market by large margins. Names with strong balance sheets (highly-ranked Financial Strength) and least aggressive accounting (highly-ranked Earnings Quality) have also underperformed. These conditions have created headwinds for the strategy for the first half of the year. Factors come in and out of favor and our research gives us confidence that periods of expensive and low quality leadership are infrequent and will not last.

Overall allocation effects detracted from returns

while overall security selection effects contributed to returns for the third quarter. Underweight allocations to Real Estate and Utilities contributed to returns while an underweight allocation to Health Care and an overweight allocation to Consumer Discretionary detracted from returns. Security selection within Information Technology, Industrials, Consumer Discretionary, and Consumer Staples aided returns while security selection within Health Care and Energy hurt returns.

It is the policy of the Fund to maintain currency hedges at all times in order to neutralize exchange-rate movements between the U.S. dollar and the Canadian dollar. This policy had a positive effect on returns during the period.

Above all else, we believe long term success comes from building a portfolio around proven stock selection factors—measured using key selection criteria like quality, valuation, and momentum. The Fund's companies have higher momentum, lower debt ratios, and trade at deep discounts across a number of valuation factors.

RBC O'Shaughnessy U.S. Growth Fund

Disclosure

RBC Funds, BlueBay Funds, PH&N Funds and RBC Corporate Class Funds are offered by RBC Global Asset Management Inc. and distributed through authorized dealers.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus or Fund Facts document before investing. Except as otherwise noted, the indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any unitholder that would have reduced returns. Mutual funds are not guaranteed or covered by the Canadian Deposit Insurance Corporation or by any other government deposit insurer. For money market funds, there can be no assurances that the fund will be able to maintain its net asset value per unit at a constant amount or that the full amount of your investment in the fund will be returned to you. The value of mutual funds change frequently and past performance may not be repeated.

This document has been compiled by RBC Global Asset Management Inc. (RBC GAM) from sources believed to be reliable, but no representations or warranty, express or implied, are made by RBC GAM, its affiliates or any other person as to its accuracy,

completeness or correctness. All opinions and estimates constitute RBC GAM's judgment as of the date of this document, are subject to change without notice and are provided in good faith but without legal responsibility. The Top Ten/25 Holdings may change due to ongoing portfolio transactions within the fund. The Prospectus and other information about the underlying investment funds are available at www.sedar.com.

MER (%) for RBC Funds, PH&N Funds and Bluebay Funds is based on actual expenses for the half-year period, January 1 to June 30, 2017, expressed on an annualized basis.

MER (%) for RBC Corporate Class Funds is based on actual expenses for the full-year period, April 1, 2016 to March 31, 2017, expressed on an annualized basis.

Adjusted MER is provided for funds with management fee changes effective June 30, 2016. The Adjusted MER represents what the reported MER would have been had management fee changes been in effect throughout 2016.

Series H and Series I are not available for purchase by new investors. Existing investors who hold Series H or Series I units can continue to make additional investments into the same series of the funds they hold.

Quartile rankings are determined by Morningstar Research Inc., an independent research firm, based on categories maintained by the Canadian Investment Funds Standards Committee (CIFSC). Quartile rankings are comparisons of the performance of a fund to other funds in a particular category and are subject to change monthly. The quartiles divide the data into four equal segments expressed in terms of rank (1, 2, 3 or 4). This is the Morningstar quartile ranking of Series A and F units of the Fund as of September 30, 2017.
