Quarterly Commentary as at June 30, 2017

After hitting an all-time high in February, the Canadian equity market, as measured by the S&P/TSX Capped Composite Index, underperformed global equity markets over the past three months. The moderately underwhelming results were a product of poor performance in the Financials, Energy and Materials sectors. Investor concerns over Canadian housing and consumer credit levels outweighed the double-digit earnings growth of most diversified banks. Furthermore, despite OPEC's action to cut production, global inventory levels remain elevated and the price of oil softened during the most recent period. Strength exhibited by the Telecommunication Services, Utilities and Real Estate sectors has been a bright spot this quarter. Additionally, the Industrials sector had the strongest performance off the back of strong earnings demonstrated by the Canadian railroad industry.

This quarter the Fund underperformed its custom benchmark. The Fund's overweight exposure to companies most sensitive to oil prices was the largest detractor from relative performance. An overweight position in Crescent Point Energy was

a significant detractor after feeble oil prices continued to cause dramatic weakness in the company's share price.

The Utilities sector continued its resilient upward trend this quarter. The Fund's relative overweight positions in Brookfield Infrastructure Partners and Fortis Inc. were positive contributors. The Consumer Discretionary sector also had a meaningful impact on the Fund's performance quarter to date. The Fund's overweight position in Dollarama continues to deliver encouraging results. The company's sales growth continues to increase and operating results have, so far, been exceptional.

The Fund's trading activity is a function of our investment process. Our disciplined fundamental research process and approach to portfolio construction serve as a base to optimize position sizes to match fundamental conviction and minimize exposure to less repeatable, unintended risk factors.
