Quarterly Commentary as at March 31, 2017

The S&P/TSX Composite Index posted a positive quarterly return of 2.41%, with nine of eleven sectors up during the quarter. The top performing sectors in the quarter were Utilities, Consumer Discretionary, and Information Technology, while Healthcare and Energy sectors posted negative returns.

The fund generated positive returns across all sectors with only the Energy sector underperforming. The largest contributions to returns came from security selection in Consumer Discretionary, Utilities, and Financials sectors. Top contributors at the security level included Premium Brands Holdings, Enercare, and ATCO, while Imperial Oil, TFI International, and Mullen

Group were the biggest detractors.

Allocation to equities during the quarter increased to 77% from 74% at the end of 2016. While the overall number of equity holdings in the portfolio remained unchanged from the previous quarter, we have replaced several holdings in the portfolio. Notably, we added new positions in First Service, Colliers, and Dream Office REIT, increasing our weight in the Real Estate sector as a result. We also exited several positions in the Energy sector, including Seven Generations, Imperial Oil, and Cenovus, and our overall Energy weight declined by approximately 3% from our year-end positioning.
