MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

The Fund seeks to provide long-term capital growth by investing primarily in equity securities of companies located in or with significant business interests in China.

To achieve the Fund's objectives, the Fund invests in equity securities listed in onshore China as well as in other jurisdictions where Chinese companies are listed, including Hong Kong, the U.S., the UK and Germany. The Fund may invest in A-Shares (through Shanghai-Hong Kong Stock Connect), B-Shares, H-Shares (listed in the Hong Kong market) and American Depository Receipts.

Risk

There were no significant changes to the investment objective and strategies that affected the Fund's overall level of risk during the reporting period. The risks of investing in the Fund and the suitability of the Fund for investors remain as discussed in the Simplified Prospectus.

Results of Operations

The Fund's net asset value fell to \$584 million as of December 31, 2023, from \$635 million at the end of 2022. The decrease was due to investment losses, partially offset by net inflows.

Over the past year, the Fund's Series F units lost 11.5%, which outperformed the 13.6% decline in the benchmark. The Fund's return is after the deduction of fees and expenses, while benchmark and broad-based index returns do not include any costs of investing. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of any other series, which may vary because of differences in management fees and expenses.

China's stock market was among Asia's worst-performing in 2023 as plunging property prices made it clear that the country's reliance on residential real estate was over and that this engine of economic growth would be difficult to replace. The economy was also hurt by falling foreign investment as companies in the West questioned whether China was still a safe place to invest.

The Real Estate sector, which until recently accounted for 30% of China's economic growth, was characterized by the August bankruptcy filing of Evergrande, once the country's second-largest builder. The company, saddled with at least US\$300 billion of debt, stoked concern that a liquidation would introduce massive amounts of inventory to the housing market. Meanwhile, U.S. companies increasingly shifted manufacturing from China, the world's second-largest economy, to Mexico, Vietnam and other emerging markets.

Sector allocation had a negative impact on the Fund's relative returns due to underweight positions in Energy and overweight positions in Real Estate. The impact of this positioning was offset by the positive impact of an underweight allocation to the Consumer Staples sector. Returns were aided by strong security selection in the Information Technology and Health Care sectors, offset by weaker security selection in Financials.

The holding that contributed the most to the Fund's performance was CSPC Innovation Pharmaceutical, with its pipeline of experimental treatments for cancer and asthma. Shenyang Xingqi Pharmaceutical, which focuses on eye medications, also performed well, having attained approval for eye drops that delay the progression of shortsightedness in children.

Stocks that limited returns include China Merchants Bank, as investors were concerned about exposure to property and rising non-performing loans. Contemporary Amperex Technology, the world's largest lithium battery maker, also held back performance as falling prices reduced profit margins.

Portfolio turnover can be high for the Fund, as the sub-advisor attempts to generate better returns through active security and sector selection.

Recent Developments

The sub-advisor expects China's economic growth to slow to 4.8% in 2024 from 5.2% in 2023, even with further policy easing. Weakening economic data suggests that policymakers will extend efforts to keep growth from falling further. Expectations for the Chinese economy remain low, and a stabilization in growth above the 4.5% level could renew interest in Chinese stocks, which trade at valuations that are attractive based on history. Other steps that the Chinese government can take to further support jobs and the economy include paying for the completion of stalled housing projects and boosting spending on infrastructure.

Effective January 1, 2023, Suromitra Sanatani was appointed as Chair of the Independent Review Committee ("the IRC"). Effective February 1, 2023, Joanne Vézina was appointed as a member of the IRC. Effective March 1, 2023, Enrique Cuyegkeng was appointed as a member of the IRC.

¹ The management expense ratio ("MER") is based on the direct expenses charged to the Fund and the Fund's proportionate share of the expenses of underlying funds, if any, for the stated period, excluding commissions and other portfolio transaction costs, and is expressed as an annualized percentage of the daily average net asset value during the period. RBC GAM may, at its discretion and without notice to unitholders, waive or absorb certain operating expenses. MER includes the waiver or absorption by RBC GAM of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by RBC GAM.

² The Fund's portfolio turnover rate gives an indication of the level of activity employed by the portfolio manager. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund. The portfolio turnover rate is not applicable to money market funds.

³ The trading expense ratio represents total commissions and other portfolio transaction costs of the Fund and the Fund's proportionate share of such costs of underlying funds expressed as an annualized percentage of daily average net asset value during the period. The trading expense ratio is not applicable to fixed-income transactions.

⁴ From January 27, 2020.

Past performance does not necessarily indicate how the Fund may perform in the future. A fund with more than 10 years of performance history is only permitted to disclose the past 10 years.

Year-by-Year Returns (%)

The bar chart indicates the Fund's performance for each of the years shown, and illustrates how the Fund's performance has changed from year to year.
