MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

The Fund seeks to provide long-term capital growth by investing in equity securities of companies located in or having a principal business interest in Asian markets such as Japan, Hong Kong, Taiwan, South Korea, Singapore, China and Australia, either directly or indirectly through investment in other funds managed by RBC GAM or an affiliate of RBC GAM (called the “underlying funds”).

To achieve its investment objective, the Fund selects underlying funds from the RBC Funds family or PH&N Funds family, including the RBC Asia Pacific ex-Japan Equity Fund and the RBC Japanese Equity Fund, that focus on Asian sectors and themes and diversify their holdings across the region to reduce risk.

Risk

There were no significant changes to the investment objective and strategies that affected the Fund’s overall level of risk during the reporting period. The risks of investing in the Fund and the suitability of the Fund for investors remain as discussed in the Simplified Prospectus.

Results of Operations

The Fund’s net asset value fell to \$88 million as of December 31, 2023, from \$91 million at the end of 2022. The decrease was due to net redemptions, partially offset by investment returns.

Over the past year, the Fund’s Series F units gained 6.2%, which underperformed the 8.5% rise in the benchmark. The Fund’s return is after the deduction of fees and expenses, while benchmark and broad-based index returns do not include any costs of investing. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of any other series, which may vary because of differences in management fees and expenses.

Asian equities registered gains in 2023, driven by strong returns in Japan, South Korea, Taiwan and India. Japanese stock markets were among the world’s best performing in 2023 as efforts to reform corporate governance in recent years continued to contribute to an improvement in shareholder returns. Shareholder proposals led to board overhauls and increases in share buybacks and special dividends.

South Korea and Taiwan benefited from demand for technology hardware used in the development of artificial intelligence. India gained on solid economic growth, relatively benign inflation, a pro-business government and ample bank credit. China and Hong Kong underperformed as China’s economy remained weak given the depressed property market, which dented consumer and business confidence.

Both of the Fund’s holdings had a positive impact on the portfolio’s returns, with the RBC Japanese Equity Fund outperforming the RBC Asia Pacific ex-Japan Equity Fund.

Recent Developments

Asia’s economic growth in developing markets remains solid given stable domestic demand and healthy exports, particularly of semiconductors. The labour market remains healthy, with job gains and steady growth in incomes adjusted for inflation. India, Indonesia and the Philippines are forecast to be the fastest-growing economies with the region in 2024, while China faces a significant challenge in public confidence, coupled with an aging population and record-high youth unemployment.

Japan’s economy enters 2024 against a solid economic backdrop. A mix of loose monetary and fiscal policy, coupled with labour shortages, is supporting Japan’s exit from 25 years of low inflation, and wage hikes have been coming through to support consumer spending. The Bank of Japan (the “BOJ”) has responded to the rise in inflation pressures and more competitive overseas interest rates by gradually loosening its grip on bond yields, and the portfolio manager believes that the BOJ may undertake small rate hikes in the second half of 2024.

Effective January 1, 2023, Suromitra Sanatani was appointed as Chair of the Independent Review Committee (“the IRC”). Effective February 1, 2023, Joanne Vézina was appointed as a member of the IRC. Effective March 1, 2023, Enrique Cuyegkeng was appointed as a member of the IRC.

¹ The management expense ratio ("MER") is based on the direct expenses charged to the Fund and the Fund's proportionate share of the expenses of underlying funds, if any, for the stated period, excluding commissions and other portfolio transaction costs, and is expressed as an annualized percentage of the daily average net asset value during the period. RBC GAM may, at its discretion and without notice to unitholders, waive or absorb certain operating expenses. MER includes the waiver or absorption by RBC GAM of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by RBC GAM.

² The Fund's portfolio turnover rate gives an indication of the level of activity employed by the portfolio manager. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund. The portfolio turnover rate is not applicable to money market funds.

³ The trading expense ratio represents total commissions and other portfolio transaction costs of the Fund and the Fund's proportionate share of such costs of underlying funds expressed as an annualized percentage of daily average net asset value during the period. The trading expense ratio is not applicable to fixed-income transactions.

Management Fees and Administration Fees

Management fees and administration fees of each series of the Fund are payable to RBC GAM and calculated at the following annual percentages, before GST/HST, of the daily net asset value of each series of the Fund. The management fee, breakdown of services received in consideration of the management fee, as a percentage of the management fee, and the administration fee for each series are as follows:

	Management Fees	Breakdown of Services		Administration Fees
		Distribution	Other*	
Series A	1.75%	57%	43%	0.05%
Series D	1.00%	25%	75%	0.05%
Series F	0.75%	–	100%	0.05%
Series O	n/a	n/a	n/a	0.02%

Series O – no management fees are paid by the Fund with respect to Series O units. Series O unitholders pay a negotiated fee directly to RBC GAM for investment-counselling services.

* Includes all costs related to management, trustee, investment advisory services, general administration and profit.

PAST PERFORMANCE

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional units of the Fund and would be lower if distributions were not reinvested. The performance information does not take into account sales, redemption, distribution, optional charges or income taxes payable that would have reduced returns or performance. Past performance does not necessarily indicate how the Fund may perform in the future. A fund with more than 10 years of performance history is only permitted to disclose the past 10 years.

Year-by-Year Returns (%)

The bar chart indicates the Fund's performance for each of the years shown, and illustrates how the Fund's performance has changed from year to year. The bar chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the end of the financial year.

Annual Compound Returns (%)

The table shows the annual compound returns for each series of the Fund and for each of the periods indicated ended on December 31, 2023, compared with the following benchmark:

MSCI AC Asia Pacific Total Return Net Index (CAD)

Series O	7.1	-3.8	6.6	7.8	—
Benchmark	8.5	-2.0	4.6	6.6	—

The returns of each series may vary because of differences in management fees and expenses. Benchmark and/or broad-based index returns do not include any costs of investing. See Management Discussion of Fund Performance for a discussion of performance relative to benchmark and/or broad-based indexes.

Inception dates are not provided for series that have been in existence for more than 10 years.

Advisor Series units with a deferred sales charge option were re-designated as Series A units effective April 11, 2022.

MSCI AC Asia Pacific Total Return Net Index (CAD) This index is a broad measure of the Canadian-dollar performance of stocks from equity markets covering countries that are mostly in the Pacific Rim, but includes India.
