MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

The Fund seeks to provide long-term capital growth by investing in stocks of companies outside of North America in order to provide exposure to economies that may be at different stages of the business cycle or offer growth opportunities unavailable in U.S. and Canadian markets.

To achieve its investment objective, the Fund invests most of its assets in the RBC International Equity Fund (the “underlying fund”). The underlying fund focuses on companies that are primarily in Europe, Australasia and the Far East.

Risk

There were no significant changes to the investment objective and strategies that affected the Fund’s overall level of risk during the reporting period. The risks of investing in the Fund and the suitability of the Fund for investors remain as discussed in the Simplified Prospectus.

Results of Operations

The Fund’s net asset value rose to \$11 million as of March 31, 2021, from \$5 million as of March 31, 2020. The increase was due to a combination of net inflows and investment returns.

Over the past year, the Fund’s Series A shares gain 33.9%, outperforming the 27.7% rise in the benchmark. The Fund’s return is after the deduction of fees and expenses, while the benchmark and broad-based index returns do not include any costs of investing. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of any other series, which may vary because of differences in management fees and expenses.

Financial markets staged an impressive comeback from pandemic-related losses in early 2020 amid unprecedented monetary and fiscal stimulus and prospects for an economic recovery in much of the world. A dramatic rebound in the early months of the period was accompanied by a gradual re-opening of economies across the globe. Fiscal and monetary stimulus was provided in all regions, and in Europe, was capped by a historic EU joint agreement providing €750 billion in assistance to member countries dealing with the pandemic’s economic fallout. Vaccine approvals in late 2020 led to another leg-up in stocks, with Germany’s benchmark reaching all-time highs and Japan’s benchmark Nikkei index rising to its highest levels in about 25 years.

During the period, the Fund’s top-performing stocks were Ashtead Group, the British equipment-rentals company; Taiwan Semiconductor; and ING Groep, the Dutch financial company. Stocks that had a negative impact on the Fund’s performance included Tokio Marine, a global insurance company; Japan’s Suzuki Motor; and Unilever, the global consumer-goods company.

Recent Developments

The speed of vaccination programs and the ballooning of government debts will be among the crucial factors determining the pace of the economic recovery, as well as the potential for the return of inflation which may impact markets. In Asia, governments are gradually scaling back fiscal and monetary measures as economies rebound. Nonetheless, the growth path and equity markets in Asia are expected to remain bumpy in the medium term as there could be challenges to the rollout of vaccines and markets are trading at elevated multiples. As the regional and global economy recovers, stocks exposed to the reflationary trade, such as the Financials and Energy sectors, have the potential to outperform.

Effective February 28, 2021, Ms. Catherine J. Kloefer resigned as Vice Chair of the Independent Review Committee (the “IRC”). Effective March 22, 2021, Mr. Paul K. Bates was appointed as Vice Chair of the IRC. Effective April 1, 2021, Ms. Brenda Eaton was appointed as a member of the IRC.

Effective June 26, 2020, Advisor Series mutual fund shares were capped and were re-designated as Series A mutual fund shares effective August 4, 2020.

Related-Party Transactions

Manager and Portfolio Manager

RBC GAM is an indirect, wholly owned subsidiary of Royal Bank of Canada (“Royal Bank”) and is the manager and portfolio manager of the Fund. RBC GAM is responsible for the Fund’s day-to-day operations, provides investment advice and portfolio management services to the Fund and appoints distributors for the Fund. RBC GAM is paid a management fee by the Fund as compensation for its services. The Fund pays a fixed administration fee to RBC GAM, which, in turn, pays certain operating expenses of the Fund. Both the management fee and fixed administration fee are calculated and accrued daily as a percentage of the net asset value of each series of mutual fund shares of the Fund.

RBC GAM or its affiliates may earn fees and spreads in connection with various services provided to, or transactions with, the Fund, such as banking, brokerage, securities lending, foreign exchange and derivatives transactions. RBC GAM or its affiliates may earn a foreign exchange spread when shareholders switch between series of funds denominated in different currencies. The Fund also maintains bank accounts and overdraft provisions with Royal Bank for which Royal Bank may earn a fee. Affiliates of RBC GAM that provide services to the Fund in the course of their normal businesses are discussed below.

March 31, 2021

Distributors

Dealers receive an ongoing commission based on the total value of their clients' investment in certain series of mutual fund shares of the Fund.

Registrars

RBC GAM, RBC Investor Services Trust ("RBC IS") or Royal Bank (or a combination thereof) are the registrars of the Fund and keep records of who owns mutual fund shares of the Fund. The registrars earn a fee, which is paid by the manager from the fixed administration fee paid by the Fund.

Custodian

RBC IS is the custodian and holds the assets of the Fund. RBC IS earns a fee as the custodian, which is paid by the manager from the fixed administration fee paid by the Fund.

Other Related-Party Transactions

Related-Party Trading Activities

- (a) trades in securities of Royal Bank;

Inter-Fund Trading

The applicable standing instructions require that Related-Party Trading Activities and Inter-Fund Trading be conducted in accordance with RBC GAM policy and that RBC GAM advise the Independent Review Committee of a material breach of any standing instruction. RBC GAM policy requires that an investment decision in respect of Related-Party Trading Activities (i) is made free from any influence of Royal Bank or its associates or affiliates and without taking into account any consideration relevant to Royal Bank or its affiliates or associates, (ii) represents the business judgment of the portfolio manager, uninfluenced by considerations other than the best interests of the Fund, (iii) is in compliance with RBC GAM policies and procedures, and (iv) achieves a fair and reasonable result for the Fund. RBC GAM policy requires that an investment decision in respect of Inter-Fund Trading is in the best interests of each Fund.

¹ The management expense ratio ("MER") is based on the direct expenses charged to the Fund and the Fund's proportionate share of the expenses of underlying funds, if any, for the stated period, excluding commissions and other portfolio transaction costs, and is expressed as an annualized percentage of the daily average net asset value during the period. RBC GAM may, at its discretion and without notice to shareholders, waive or absorb certain operating expenses. MER includes the waiver or absorption by RBC GAM of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by RBC GAM.

² The Fund's portfolio turnover rate gives an indication of the level of activity employed by the portfolio manager. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund.

³ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period. The trading expense ratio is not applicable to fixed-income transactions.

Effective June 30, 2016, the management fees for Series A mutual fund shares were reduced to 1.75% from 1.85%. If the changes to the management fees would have been in effect throughout the financial year ended March 31, 2017, the adjusted MER for each series of the Fund would be: Series A – 2.14%.

PAST PERFORMANCE

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional shares of the Fund and would be lower if distributions were not reinvested. The performance information does not take into account sales, redemption, distribution, optional charges or income taxes payable that would have reduced returns or performance. Past performance does not necessarily indicate how the Fund may perform in the future. A fund with more than 10 years of performance history is only permitted to disclose the past 10 years.

Year-by-Year Returns (%)

The bar chart indicates the Fund’s performance for each of the years shown, and illustrates how the Fund’s performance has changed from year to year. The bar chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the end of the financial year.
