MANAGEMENT DISCUSSION OF FUND PERFORMANCE (in USD)

Investment Objective and Strategies

The Fund seeks to provide regular income with a potential for modest capital appreciation by investing primarily in units of other funds managed by RBC GAM or an affiliate of RBC GAM (called the “underlying funds”), emphasizing funds that invest in fixed-income securities.

To achieve the Fund’s objectives, the Fund selects underlying funds that primarily invest in fixed-income securities to construct a portfolio of fixed-income securities diversified by sector, geography, credit quality, duration, currency and other relevant factors, and which may invest in fixed-income securities rated below investment grade such as high-yield corporate bonds and certain emerging-market sovereign bonds, with the allocation to these issues typically ranging between 15% and 25%.

The portfolio manager allocates and rebalances the Fund’s assets among the underlying funds based on the portfolio manager’s assessment of the fixed-income markets and the underlying funds’ ability to help the Fund meet its stated investment objectives.

Risk

There were no significant changes to the investment objective and strategies that affected the Fund’s overall level of risk during the reporting period. The risks of investing in the Fund and the suitability of the Fund for investors remain as discussed in the Simplified Prospectus.

Results of Operations

The Fund’s net asset value rose to \$75 million as of December 31, 2023, from \$69 million at the end of 2022. The increase was due to investment returns.

Over the past year, the Fund’s Series F units gained 8.5%, which outperformed the 5.5% rise in the benchmark. The Fund’s return is after the deduction of fees and expenses, while benchmark and broad-based index returns do not include any costs of investing. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of any other series, which may vary because of differences in management fees and expenses.

Economic growth in 2023 was faster than many economists had predicted at the beginning of the year, defying risks that included inflation exceeding central-bank targets, the highest borrowing costs in about 16 years and two wars on Europe’s doorstep. By the end of the period, growth and inflation had begun to slow, prompting investors to anticipate that central banks were moving closer to rolling back a portion of the rate hikes that had taken place since early 2022.

The U.S. Federal Reserve (the “Fed”) raised short-term benchmark interest rates in smaller increments than it had in 2022 – a total of four to a range of 5.25% to 5.50%. The European Central Bank delivered six rate hikes, putting the policy rate at 4.5% to head off inflation, even as its largest economy, Germany, descended into a recession. Corporate bonds, emerging-market debt and other forms of fixed income perceived to carry higher risks performed particularly well given that the global economy avoided a recession and corporate profitability remained strong.

The Fund’s returns were aided by holdings in the BlueBay \$U.S. Global Investment Grade Corporate Bond Fund (Canada), the RBC \$U.S. High Yield Bond Fund and the RBC \$U.S. Global Bond Fund.

Recent Developments

Consumer spending, business investment and global trade are starting to feel the pinch of higher interest rates and may deteriorate further. As a result, the portfolio manager expects most major central banks to start easing policy rates in 2024, although by the end of 2023, the Fed was the only major central bank to have hinted at easing. In such an environment, the portfolio manager is favouring assets that would gain if interest rates extend their declines.

The year-end drop in yields suggests we may have seen the peak in interest rates for now. The portfolio manager believes that valuations of riskier corporate bonds may be stretched, making investing in these bonds less attractive in view of the potential for economic weakness over the coming year.

Effective January 1, 2023, Suromitra Sanatani was appointed as Chair of the Independent Review Committee (“the IRC”). Effective February 1, 2023, Joanne Vézina was appointed as a member of the IRC. Effective March 1, 2023, Enrique Cuyegkeng was appointed as a member of the IRC.

Related-Party Transactions

Manager, Trustee and Portfolio Manager

RBC GAM is responsible for the Fund’s day-to-day operations, holds title to the Fund’s property on behalf of its unitholders, provides investment advice and portfolio management services to the Fund and appoints distributors for the Fund. RBC GAM is paid a management fee by the Fund as compensation for its services. The Fund pays a fixed administration fee to RBC GAM, which, in turn, pays certain operating expenses of the Fund. Both the management fee and fixed administration fee are calculated and accrued daily as a percentage of the net asset value of each series of units of the Fund. RBC GAM, as trustee, earns a fee, which is paid by the manager from the fixed administration fee paid by the Fund.

RBC GAM or its affiliates may earn fees and spreads in connection with various services provided to, or transactions with, the Fund, such as banking, brokerage, securities lending, foreign exchange and derivatives transactions. RBC GAM or its affiliates may earn a foreign exchange spread when unitholders switch between series of funds denominated in different currencies. The Fund also maintains bank accounts and overdraft provisions with Royal Bank for which Royal Bank may earn a fee. Affiliates of RBC GAM that provide services to the Fund in the course of their normal businesses are discussed below.

Registrars

RBC GAM, RBC Investor Services Trust ("RBC IS") or Royal Bank (or a combination thereof) are the registrars of the Fund and keep records of who owns units of the Fund. The registrars earn a fee, which is paid by the manager from the fixed administration fee paid by the Fund.

Custodian

RBC IS is the custodian and holds the assets of the Fund. RBC IS earns a fee as the custodian, which is paid by the manager from the fixed administration fee paid by the Fund.

Securities Lending Agent

To the extent the Fund may engage in securities lending transactions, RBC IS may act as the Fund's securities lending agent. Any revenue earned on such securities lending is split between the Fund and the securities lending agent.

Brokers and Dealers

The Fund has established standard brokerage and dealing agreements at market rates with related parties. For the periods ended December 31, 2023 and 2022, the related-party commissions were \$0 (2022 – \$1,000) or 0% (2022 – 14%) of the total transaction costs paid for this Fund.

The applicable standing instructions require that Related-Party Trading Activities and Inter-Fund Trading be conducted in accordance with RBC GAM policy and that RBC GAM advise the Independent Review Committee of a material breach of any standing instruction. RBC GAM policy requires that an investment decision in respect of Related-Party Trading Activities (i) is made free from any influence of Royal Bank or its associates or affiliates and without taking into account any consideration relevant to Royal Bank or its affiliates or associates, (ii) represents the business judgment of the portfolio manager, uninfluenced by considerations other than the best interests of the Fund, (iii) is in compliance with RBC GAM policies and procedures, and (iv) achieves a fair and reasonable result for the Fund. RBC GAM policy requires that an investment decision in respect of Inter-Fund Trading is in the best interests of each Fund.

¹ The management expense ratio ("MER") is based on the direct expenses charged to the Fund and the Fund's proportionate share of the expenses of underlying funds, if any, for the stated period, excluding commissions and other portfolio transaction costs, and is expressed as an annualized percentage of the daily average net asset value during the period. RBC GAM may, at its discretion and without notice to unitholders, waive or absorb certain operating expenses. MER includes the waiver or absorption by RBC GAM of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by RBC GAM.

² The Fund's portfolio turnover rate gives an indication of the level of activity employed by the portfolio manager. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund. The portfolio turnover rate is not applicable to money market funds.

³ The trading expense ratio represents total commissions and other portfolio transaction costs of the Fund and the Fund's proportionate share of such costs of underlying funds expressed as an annualized percentage of daily average net asset value during the period. The trading expense ratio is not applicable to fixed-income transactions.

⁴ From January 14, 2021.
