MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

The Fund seeks to provide long-term capital growth by investing primarily in equity securities of a diversified mix of companies operating around the world and across a range of sectors. The Fund generally invests in fewer companies and has a more concentrated portfolio than other global equity funds.

To achieve the Fund's objectives, the portfolio manager uses primarily fundamental research to assess the economic outlook for regions around the world, including expected growth, market valuations and economic trends. The Fund may invest in American Depositary Receipts and may invest as much as 10% of its assets in units of other funds managed by RBC GAM or an affiliate of RBC GAM.

Risk

There were no significant changes to the investment objective and strategies that affected the Fund's overall level of risk during the reporting period. The risks of investing in the Fund and the suitability of the Fund for investors remain as discussed in the Simplified Prospectus.

Results of Operations

The Fund's net asset value rose to \$10.8 billion as of December 31, 2021, from \$8.0 billion at the end of 2020. The increase was due to a combination of net inflows and investment returns.

Over the past year, the Fund's Series A units gained 16.0%, which underperformed the 20.8% rise in the benchmark. The Fund's return is after the deduction of fees and expenses, while benchmark and broad-based index returns do not include any costs of investing. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of any other series, which may vary because of differences in management fees and expenses.

Global equities delivered solid returns to investors in 2021, with world economic growth rebounding after widespread COVID-19 vaccinations allowed economies around the world to reopen. Toward the end of the year, returns were limited by the emergence of a highly contagious coronavirus variant and the fastest inflation growth in decades driven by severe supply-chain disruptions and shortages of raw materials and workers, particularly in the U.S.

The year could be separated into four phases: it began with anticipation that COVID-19 vaccinations would create a pathway back to a post-pandemic "normal." This phase led to a "junk rally," with hope returning to struggling business models and was a headwind for portfolio performance due to an underexposure to such businesses. Stocks exposed to an economic recovery, including energy equities, did especially well during this phase. A

period ensued during which there was a renewed focus on company results, allowing portfolio performance to recover with good gains from stock selection.

As the year progressed, it became clear that supply-chain disruptions in the face of elevated demand were leading to price increases for many goods, sparking debate over whether inflation would be contained or spread more widely and rise to levels that would require interest-rate hikes. As the year drew to a close, the emergence of the Omicron variant added another source of uncertainty for investors, as they considered the likely size and duration of possible disruption.

The Fund's performance benefited from positions in Blackstone, SVB Financial and Alphabet. Stocks that held back returns included Orsted, Neste and AIA Group.

Recent Developments

The arrival of the Omicron variant has, for now, complicated the economic recovery and progress on what investors had assumed would be a decent amount of monetary tightening. Should the Omicron variant prove less harmful, it could mark an important step toward the virus becoming endemic and less economically threatening. In this scenario, attention would quickly return to the pace and size of monetary tightening required to address immediate inflationary pressures.

However, should Omicron prove difficult to manage, we would likely see the reappearance of restrictive government policies that would have a negative impact on corporate profitability.

Whichever scenario emerges, the sub-advisor continues to believe that investors' interests will be best served by owning great sustainable businesses. Such businesses are likely to benefit from competitive advantages that enable them to maintain profit margins and capture the opportunities arising from the changing business environment. The Fund continues to focus, therefore, on constructing well balanced portfolios whose returns in excess of the benchmark are determined by the companies held and where volatility from unintended exposures is minimized.

Effective September 15, 2021, the Fund was closed to new investors. Existing investors who held units of the Fund on September 15, 2021 can continue to make additional investments into the Fund. In addition, RBC GAM may also maintain capacity for certain investors, including investment funds managed by RBC GAM or its affiliates, that may invest in the Fund.

Effective February 28, 2021, Ms. Catherine J. Kloepfer resigned as Vice Chair of the Independent Review Committee (the "IRC"). Effective March 22, 2021, Mr. Paul K. Bates was appointed as Vice Chair of the IRC. Effective April 1, 2021, Ms. Brenda Eaton was appointed as a member of the IRC.

RBC GAM or its affiliates may earn a foreign exchange spread when unitholders switch between series of funds denominated in different currencies. The Fund also maintains bank accounts and overdraft provisions with Royal Bank for which Royal Bank may earn a fee. Affiliates of RBC GAM that provide services to the Fund in the course of their normal businesses are discussed below.

Related-Party Trading Activities

The applicable standing instructions require that Related-Party Trading Activities and Inter-Fund Trading be conducted in accordance with RBC GAM policy and that RBC GAM advise the Independent Review Committee of a material breach of any standing instruction. RBC GAM policy requires that an investment decision in respect of Related-Party Trading Activities (i) is made free from any influence of Royal Bank or its associates or affiliates and without taking into account any consideration relevant to Royal Bank or its affiliates or associates, (ii) represents the business judgment of the portfolio manager, uninfluenced by considerations other than the best interests of the Fund, (iii) is in compliance with RBC GAM policies and procedures, and (iv) achieves a fair and reasonable result for the Fund. RBC GAM policy requires that an investment decision in respect of Inter-Fund Trading is in the best interests of each Fund.

¹ The management expense ratio ("MER") is based on the direct expenses charged to the Fund and the Fund's proportionate share of the expenses of underlying funds, if any, for the stated period, excluding commissions and other portfolio transaction costs, and is expressed as an annualized percentage of the daily average net asset value during the period. RBC GAM may, at its discretion and without notice to unitholders, waive or absorb certain operating expenses. MER includes the waiver or absorption by RBC GAM of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by RBC GAM.

² The Fund's portfolio turnover rate gives an indication of the level of activity employed by the portfolio manager. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund. The portfolio turnover rate is not applicable to money market funds.

³ The trading expense ratio represents total commissions and other portfolio transaction costs of the Fund and the Fund's proportionate share of such costs of underlying funds expressed as an annualized percentage of daily average net asset value during the period. The trading expense ratio is not applicable to fixed-income transactions.

⁴ From February 27, 2017.

The performance information does not take into account sales, redemption, distribution, optional charges or income taxes payable that would have reduced returns or performance. Past performance does not necessarily indicate how the Fund may perform in the future. A fund with more than 10 years of performance history is only permitted to disclose the past 10 years.

Year-by-Year Returns (%)

The bar chart indicates the Fund’s performance for each of the years shown, and illustrates how the Fund’s performance has changed from year to year. The bar chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the end of the financial year.
