MANAGEMENT DISCUSSION OF FUND PERFORMANCE (in USD)

Investment Objective and Strategies

The Fund seeks to provide regular monthly income with the potential for modest capital growth by investing primarily in a well-diversified portfolio of short-term fixed-income securities issued in the U.S. market by U.S. and foreign corporations either directly or indirectly through investment in other funds managed by RBC GAM or an affiliate of RBC GAM.

The Fund invests up to 100% of its assets in units of the RBC Short Term U.S. Corporate Bond ETF (the “underlying fund”), which is sub-advised by RBC Global Asset Management (U.S.) Inc. The underlying fund invests primarily in investment-grade short-duration fixed-income securities issued in the U.S. market by U.S. and foreign corporations rated BBB(-) and above by Standard & Poor’s (or equivalent rating agency).

Risk

There were no significant changes to the investment objective and strategies that affected the Fund’s overall level of risk during the reporting period. The risks of investing in the Fund and the suitability of the Fund for investors remain as discussed in the Simplified Prospectus.

Results of Operations

The Fund’s net asset value fell to \$157 million as of December 31, 2023, from \$162 million at the end of 2022. The decrease was due to net redemptions, partially offset by investment returns.

Over the past year, the Fund’s Series F units gained 6.4%, which outperformed the 6.2% rise in the benchmark. The Fund’s return is after the deduction of fees and expenses, while benchmark and broad-based index returns do not include any costs of investing. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of any other series, which may vary because of differences in management fees and expenses.

U.S. fixed income generated gains during 2023 after two years of losses, as an overall decline in yields during the year drove bond prices higher. Market interest rates were influenced by the U.S. Federal Reserve’s (the “Fed”) aggressive monetary approach. Policymakers combatted historically high inflation by continuing to raise the benchmark fed funds rate, which ended the year at the highest levels since 2000. Meanwhile, the U.S. economy largely shrugged off recession fears, as a robust labour market and resilient consumer spending offset higher borrowing costs. Most of the bond gains came toward year-end on investor expectations that the Fed was done raising rates, and the Fed did signal in December that

policy rates had likely peaked. The additional yield that investors require to hold corporate bonds over comparable Treasuries declined during the year, which also contributed to the Fund’s returns.

The Fund’s relative performance was driven primarily by security selection, particularly in the areas of telecommunications, banking and energy. The Fund also benefited from an overweight allocation to lower-quality, BBB rated issuers, which outperformed higher-quality issuers.

Recent Developments

The Fund continues to favour large companies with a domestic focus and that operate in industries less sensitive to changes in the rate of economic growth, as well as companies with stable to improving credit profiles and that are in the process of reducing debt. The Fund remains overweight in areas where regulations are favourable to bondholders, such as the Utilities sector and telecommunications companies.

Effective January 1, 2023, Suromitra Sanatani was appointed as Chair of the Independent Review Committee (“the IRC”). Effective February 1, 2023, Joanne Vézina was appointed as a member of the IRC. Effective March 1, 2023, Enrique Cuyegkeng was appointed as a member of the IRC.

RBC GAM policy requires that an investment decision in respect of Related-Party Trading Activities (i) is made free from any influence of Royal Bank or its associates or affiliates and without taking into account any consideration relevant to Royal Bank or its affiliates or associates, (ii) represents the business judgment of the portfolio manager, uninfluenced by considerations other than the best interests of the Fund, (iii) is in compliance with RBC GAM policies and procedures, and (iv) achieves a fair and reasonable result for the Fund. ¹ The management expense ratio ("MER") is based on the direct expenses charged to the Fund and the Fund's proportionate share of the expenses of underlying funds, if any, for the stated period, excluding commissions and other portfolio transaction costs, and is expressed as an annualized percentage of the daily average net asset value during the period. RBC GAM may, at its discretion and without notice to unitholders, waive or absorb certain operating expenses. MER includes the waiver or absorption by RBC GAM of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by RBC GAM.

² The Fund's portfolio turnover rate gives an indication of the level of activity employed by the portfolio manager. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund. The portfolio turnover rate is not applicable to money market funds.

³ The trading expense ratio represents total commissions and other portfolio transaction costs of the Fund and the Fund's proportionate share of such costs of underlying funds expressed as an annualized percentage of daily average net asset value during the period. The trading expense ratio is not applicable to fixed-income transactions.

Management Fees and Administration Fees

Management fees and administration fees of each series of the Fund are payable to RBC GAM and calculated at the following annual percentages, before GST/HST, of the daily net asset value of each series of the Fund. The management fee, breakdown of services received in consideration of the management fee, as a percentage of the management fee, and the administration fee for each series are as follows:

	Management Fees*	Breakdown of Services		Administration Fees
		Distribution	Other [†]	
Series A	0.85%	59%	41%	0.05%
Series D	0.60%	42%	58%	0.05%
Series F	0.35%	–	100%	0.05%
Series O	n/a	n/a	n/a	0.02%

Series O – no management fees are paid by the Fund with respect to Series O units. Series O unitholders pay a negotiated fee directly to RBC GAM for investment-counselling services.

* The management fee disclosed reflects the total combined management fees charged by the Fund and the underlying ETF.

[†] Includes all costs related to management, trustee, investment advisory services, general administration and profit.

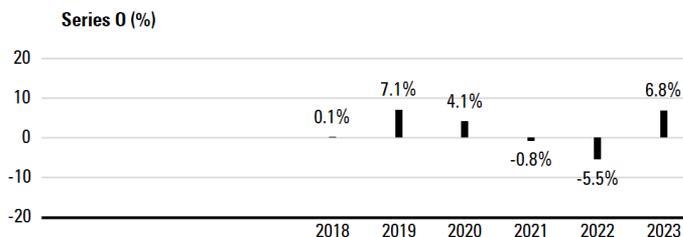

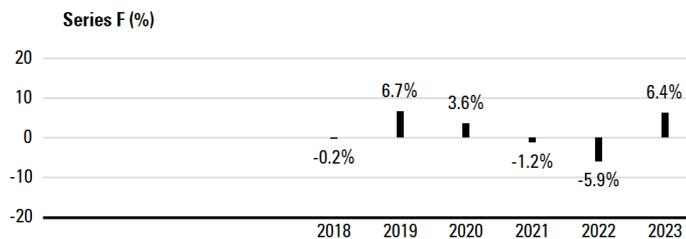

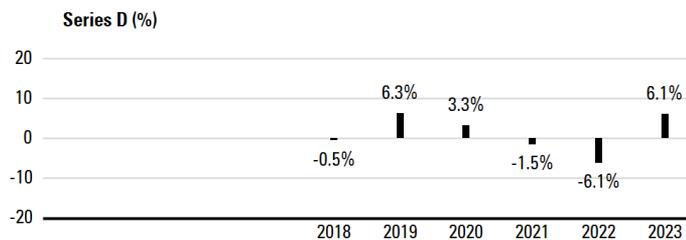

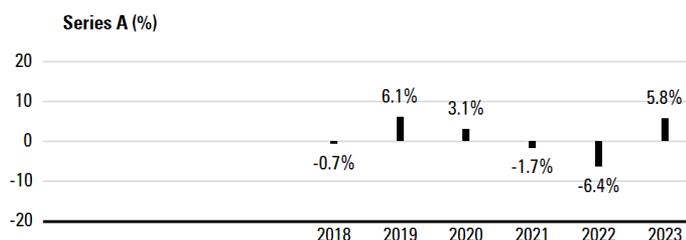

PAST PERFORMANCE (in USD)

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional units of the Fund and would be lower if distributions were not reinvested. The performance information does not take into account sales, redemption, distribution, optional charges or income taxes payable that would have reduced returns or performance. Past performance does not necessarily indicate how the Fund may perform in the future. A fund with more than 10 years of performance history is only permitted to disclose the past 10 years.

Year-by-Year Returns (%)

The bar chart indicates the Fund's performance for each of the years shown, and illustrates how the Fund's performance has changed from year to year. The bar chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the end of the financial year.

Annual Compound Returns (%)

The table shows the annual compound returns for each series of the Fund and for each of the periods indicated ended on December 31, 2023, compared with the following benchmark:

Bloomberg U.S. 1-5 Year Corporate Bond Index (USD)
