MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

The Fund seeks to provide long-term capital growth by investing primarily in equity securities of European mid-cap companies. The Fund provides exposure to growth opportunities in the European economy and diversification benefits beyond North America. The portfolio manager selects companies with above average growth rates, strong and sustained operational momentum and the potential for future growth in valuation, earnings and cash flows.

Risk

There were no significant changes to the investment objective and strategies that affected the Fund's overall level of risk during the reporting period. The risks of investing in the Fund and the suitability of the Fund for investors remain as discussed in the Simplified Prospectus.

Results of Operations

The Fund's net asset value rose to \$1.6 billion as of December 31, 2023, from \$1.4 billion at the end of 2022. The increase was due to investment returns, partially offset by net redemptions.

Over the past year, the Fund's Series F units gained 15.2%, which outperformed the 15.0% rise in the benchmark. The Fund's return is after the deduction of fees and expenses, while benchmark and broad-based index returns do not include any costs of investing. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of any other series, which may vary because of differences in management fees and expenses.

European equities rose during 2023, as investors bet increasingly that central banks were done raising short-term interest rates after almost two years of uncomfortably high inflation appeared to be easing. Most of the stock-market gains came in November and December after volatility over the preceding 10 months.

Economic growth held up surprisingly well for most of the period, and corporate earnings proved resilient as companies were able to pass on higher costs by boosting retail prices. In the fourth quarter of 2023, however, Europe's economy slowed significantly after the European Central Bank raised its policy rate to 4%, the highest level in 22 years, and the Bank of England increased its policy rate to 5.25%, the highest level since early 2008.

Geopolitics continued to affect markets. The war in Ukraine, while at an apparent stalemate, continued to cost Western countries significant sums and supported firmer commodity prices. Further funding for the war was under threat late in the year after a far-

right political party won the most seats in Dutch elections and the leader of Hungary vetoed an aid bill. The war between Israel and Hamas alarmed investors because of its potential to spark a broader regional conflict.

The mid-cap stock markets of Denmark, the Netherlands and the UK were the strongest performers, and Belgium was Europe's worst-performing stock market, with Finland and Italy also performing poorly. At the sector level, Information Technology and Real Estate were the strongest performers, while Energy and Materials were the worst performing. The Fund's underweight position in the Real Estate sector held back portfolio returns the most, while an overweight position in Industrials was the largest contributor to relative returns. Among individual stocks, BE Semiconductors, a Dutch chip company, was the biggest contributor to the Fund's performance, and VAT Group, a Swiss maker of equipment used to make semiconductors, ranked second. Teleperformance, a France-based business-services company, held back returns the most.

Recent Developments

Capital markets appear to reflect the belief that central-bank policy-rate increases are over, and that reductions are coming in 2024. There remains, however, every chance that inflation re-emerges and that central banks leave rates in place for longer than is expected. In this context, and with the full impact of higher rates yet to be felt, the next 12 months may augur further headwinds for equities.

Effective January 1, 2023, Suromitra Sanatani was appointed as Chair of the Independent Review Committee ("the IRC"). Effective February 1, 2023, Joanne Vézina was appointed as a member of the IRC. Effective March 1, 2023, Enrique Cuyegkeng was appointed as a member of the IRC.

Related-Party Transactions

RBC GAM is paid a management fee by the Fund as compensation for its services. The Fund pays a fixed administration fee to RBC GAM, which, in turn, pays certain operating expenses of the Fund. Both the management fee and fixed administration fee are calculated and accrued daily as a percentage of the net asset value of each series of units of the Fund. RBC GAM, as trustee, earns a fee, which is paid by the manager from the fixed administration fee paid by the Fund.

RBC GAM or its affiliates may earn fees and spreads in connection with various services provided to, or transactions with, the Fund, such as banking, brokerage, securities lending, foreign exchange and derivatives transactions. RBC GAM or its affiliates may earn a foreign exchange spread when unitholders switch between series of funds denominated in different currencies. The Fund also maintains bank accounts and overdraft provisions with Royal Bank for which Royal Bank may earn a fee. Affiliates of RBC GAM that provide services to the Fund in the course of their normal businesses are discussed below.

Pursuant to applicable securities legislation, the Fund relied on the standing instructions from the Independent Review Committee with respect to one or more of the following transactions:

Related-Party Trading Activities

- (a) trades in securities of Royal Bank;

The applicable standing instructions require that Related-Party Trading Activities and Inter-Fund Trading be conducted in accordance with RBC GAM policy and that RBC GAM advise the Independent Review Committee of a material breach of any standing instruction. RBC GAM policy requires that an investment decision in respect of Related-Party Trading Activities (i) is made free from any influence of Royal Bank or its associates or affiliates and without taking into account any consideration relevant to Royal Bank or its affiliates or associates, (ii) represents the business judgment of the portfolio manager, uninfluenced by considerations other than the best interests of the Fund, (iii) is in compliance with RBC GAM policies and procedures, and (iv) achieves a fair and reasonable result for the Fund. RBC GAM policy requires that an investment decision in respect of Inter-Fund Trading is in the best interests of each Fund.

¹ The management expense ratio ("MER") is based on the direct expenses charged to the Fund and the Fund's proportionate share of the expenses of underlying funds, if any, for the stated period, excluding commissions and other portfolio transaction costs, and is expressed as an annualized percentage of the daily average net asset value during the period. RBC GAM may, at its discretion and without notice to unitholders, waive or absorb certain operating expenses. MER includes the waiver or absorption by RBC GAM of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by RBC GAM.

² The Fund's portfolio turnover rate gives an indication of the level of activity employed by the portfolio manager. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund. The portfolio turnover rate is not applicable to money market funds.

³ The trading expense ratio represents total commissions and other portfolio transaction costs of the Fund and the Fund's proportionate share of such costs of underlying funds expressed as an annualized percentage of daily average net asset value during the period. The trading expense ratio is not applicable to fixed-income transactions.

Management Fees and Administration Fees

Management fees and administration fees of each series of the Fund are payable to RBC GAM and calculated at the following annual percentages, before GST/HST, of the daily net asset value of each series of the Fund. The management fee, breakdown of services received in consideration of the management fee, as a percentage of the management fee, and the administration fee for each series are as follows:

	Management Fees	Breakdown of Services		Administration Fees
		Distribution	Other*	
Series A	1.75%	57%	43%	0.15%
Series D	1.00%	25%	75%	0.15%
Series F	0.75%	—	100%	0.15%
Series O	n/a	n/a	n/a	0.02%

Series O – no management fees are paid by the Fund with respect to Series O units. Series O unitholders pay a negotiated fee directly to RBC GAM for investment-counselling services.

* Includes all costs related to management, trustee, investment advisory services, general administration and profit.

PAST PERFORMANCE

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional units of the Fund and would be lower if distributions were not reinvested. The performance information does not take into account sales, redemption, distribution, optional charges or income taxes payable that would have reduced returns or performance. Past performance does not necessarily indicate how the Fund may perform in the future. A fund with more than 10 years of performance history is only permitted to disclose the past 10 years.

Year-by-Year Returns (%)

The bar chart indicates the Fund's performance for each of the years shown, and illustrates how the Fund's performance has changed from year to year. The bar chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the end of the financial year.

Series O (%)

The table shows the annual compound returns for each series of the Fund and for each of the periods indicated ended on December 31, 2023, compared with the following benchmark:
