MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

The Fund seeks to provide long-term capital growth by investing primarily in equity securities of U.S. small-cap companies that are deemed to be undervalued in order to provide broad exposure to economic growth opportunities in the equity markets.

The Fund's investment process is based primarily on fundamental research, although the sub-advisor will also consider quantitative and technical factors. Stock selection decisions are ultimately based on an understanding of the company, its business and its outlook. The sub-advisor diversifies the Fund across industries in the U.S. market and selects companies based on strong management, focused business models and the potential for future growth in earnings and cash flow.

Risk

There were no significant changes to the investment objective and strategies that affected the Fund's overall level of risk during the reporting period. The risks of investing in the Fund and the suitability of the Fund for investors remain as discussed in the Simplified Prospectus.

Results of Operations

The Fund's net asset value rose to \$69 million as of December 31, 2021, from \$67 million at the end of 2020. The increase was due to investment returns, partially offset by net redemptions.

Over the past year, the Fund's Series A units gained 21.6%, which underperformed the 27.4% rise in the benchmark. The Fund's return is after the deduction of fees and expenses, while benchmark and broad-based index returns do not include any costs of investing. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of any other series, which may vary because of differences in management fees and expenses.

U.S. equities rose during 2021, extending the rally in place since early 2020 to record highs, on renewed investor optimism driven by strong consumer spending and rising corporate profits. The impetus was the widespread delivery of COVID-19 vaccinations, which led to the reopening of the economy. The rebound came in the face of supply shortages and an insufficient number of workers, pushing U.S. inflation up to its highest level in four decades. Stocks were volatile in December as the U.S. Federal Reserve (the "Fed") was forced to abandon its narrative of "transitory" inflation, suggesting a faster-than-expected tightening of monetary policy, and the emergence of a new coronavirus variant prompted the reimposition of some business restrictions.

Small-cap stock benchmarks underperformed their large-cap counterparts, which were bolstered by the extraordinary gains of a limited number of the largest-cap companies. The Fund's underperformance over the 12-month period was due to stock selection and asset-allocation decisions. Returns were limited by stock selection in the Consumer Discretionary, Materials and Industrials sectors, more than offsetting favourable stock selection in the Financials and Real Estate sectors. The portfolio's cash position and an underweight position in the relatively strong-performing Energy sector weighed on relative returns.

Individual stocks that had a negative impact on relative returns were Emergent BioSolutions, Invacare and Ducommun, while Builders FirstSource and Magnolia Oil & Gas had a positive impact.

Recent Developments

There remains a large number of significant potential headwinds for financial markets. Most notable is the COVID-19 pandemic, which, following what appeared to be a turning point in late summer and fall, returned to the forefront in the form of a new, more-contagious variant, Omicron. At the same time, uncomfortably fast inflation has forced the Fed to scale back bond purchases and signal that interest-rate hikes are likely on the way. These issues aside, the sub-advisor believes that stocks will receive support from strong corporate earnings and robust company and consumer balance sheets.

Effective February 28, 2021, Ms. Catherine J. Kloepfer resigned as Vice Chair of the Independent Review Committee (the "IRC"). Effective March 22, 2021, Mr. Paul K. Bates was appointed as Vice Chair of the IRC. Effective April 1, 2021, Ms. Brenda Eaton was appointed as a member of the IRC.

¹ The management expense ratio ("MER") is based on the direct expenses charged to the Fund and the Fund's proportionate share of the expenses of underlying funds, if any, for the stated period, excluding commissions and other portfolio transaction costs, and is expressed as an annualized percentage of the daily average net asset value during the period. RBC GAM may, at its discretion and without notice to unitholders, waive or absorb certain operating expenses. MER includes the waiver or absorption by RBC GAM of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by RBC GAM.

² The Fund's portfolio turnover rate gives an indication of the level of activity employed by the portfolio manager. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund. The portfolio turnover rate is not applicable to money market funds.

³ The trading expense ratio represents total commissions and other portfolio transaction costs of the Fund and the Fund's proportionate share of such costs of underlying funds expressed as an annualized percentage of daily average net asset value during the period. The trading expense ratio is not applicable to fixed-income transactions.

Management Fees and Administration Fees

Management fees and administration fees of each series of the Fund are payable to RBC GAM and calculated at the following annual percentages, before GST/HST, of the daily net asset value of each series of the Fund. The management fee, breakdown of services received in consideration of the management fee, as a percentage of the management fee, and the administration fee for each series are as follows:

	Management Fees	Breakdown of Services		Administration Fees
		Distribution	Other*	
Series A	1.75%	57%	43%	0.10%
Series D	1.00%	25%	75%	0.10%
Series F	0.75%	–	100%	0.10%
Series O	n/a	n/a	n/a	0.02%

Series O – no management fees are paid by the Fund with respect to Series O units. Series O unitholders pay a negotiated fee directly to RBC GAM for investment-counselling services.

* Includes all costs related to management, trustee, investment advisory services, general administration and profit.

PAST PERFORMANCE

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional units of the Fund and would be lower if distributions were not reinvested. The performance information does not take into account sales, redemption, distribution, optional charges or income taxes payable that would have reduced returns or performance. Past performance does not necessarily indicate how the Fund may perform in the future. A fund with more than 10 years of performance history is only permitted to disclose the past 10 years.

Year-by-Year Returns (%)

The bar chart indicates the Fund's performance for each of the years shown, and illustrates how the Fund's performance has changed from year to year. The bar chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the end of the financial year.

Annual Compound Returns (%)

The table shows the annual compound returns for each series of the Fund and for each of the periods indicated ended on December 31, 2021, compared with the following benchmark:
