MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

The Fund seeks to provide total returns consisting of interest income and modest capital appreciation by investing primarily in global convertible bonds, both rated and unrated, issued by entities domiciled or carrying out business activities anywhere in the world.

To achieve the Fund's objectives, the sub-advisor conducts detailed credit and equity analysis to identify investment opportunities offering higher probabilities of superior rates of return while minimizing the prospect of default.

Risk

There were no significant changes to the investment objective and strategies that affected the Fund's overall level of risk during the reporting period. The risks of investing in the Fund and the suitability of the Fund for investors remain as discussed in the Simplified Prospectus.

Results of Operations

The Fund's net asset value fell to \$163 million as of December 31, 2023, from \$369 million at the end of 2022. The decrease was due to net redemptions.

Over the past year, the Fund's Series F units gained 8.8%, which underperformed the 9.1% rise in the benchmark. The Fund's return is after the deduction of fees and expenses, while benchmark and broad-based index returns do not include any costs of investing. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of any other series, which may vary because of differences in management fees and expenses.

Global convertible bonds, which are fixed-income securities that can be exchanged for equity according to preset terms, registered solid gains in 2023, mirroring the strong returns for stocks and other riskier assets.

One issue that had a significantly positive impact on the Fund's returns was MongoDB, a database platform whose stock soared following better-than-expected results and the belief that the company will benefit from recent advances in artificial intelligence ("AI"). SK Hynix was another beneficiary of the AI rally, as it supplies Nvidia with graphics-processing components widely used by AI developers. Electric-truck manufacturer Rivian Automotive rallied after a report of strong second-quarter deliveries and, later in the year, falling interest rates boosted stock valuations.

The Fund's holdings of cruise-line stocks, including Royal Caribbean and Carnival, rallied strongly following a period of robust bookings at the start of the year. Lenovo, the world's largest PC maker,

gained on signs that PC demand and inventory levels are stabilizing. Chinese-based electric-vehicle maker Li Auto rose after the company posted a second profitable quarter in a row, as revenues nearly doubled from the previous year.

The Fund's returns were negatively affected by a drop in Wolfspeed, a semiconductor manufacturer whose expansion plans were undercut by disappointing quarterly results. Southwest Airlines, a low-cost U.S. carrier, reported lower-than-expected first-quarter earnings and the airline continued to deal with fallout from a widespread service disruption in late 2022. Etsy, an e-commerce platform, held back returns after the company provided lower earnings guidance as consumers reined in spending, and Sarepta Therapeutics, a biopharmaceutical company, fell sharply after its key treatment failed to meet objectives in clinical trials.

Recent Developments

The sub-advisor believes that convertible bonds have the potential to generate strong risk-adjusted returns in 2024. First, this year's attractive stock-market gains may be unsustainable, and convertible bonds tend to outperform equities in periods where equities falter. Second, convertible bonds offer exposure to industries where bond issues are less common, and which may be poised to outperform. The sub-advisor believes that companies are likely to increase sales of convertible bonds in the months ahead as issuers take advantage of rising stock prices to refinance debt raised during the pandemic.

Effective April 1, 2023, the activities of RBC Global Asset Management (UK) Limited and BlueBay Asset Management LLP were consolidated into RBC Global Asset Management (UK) Limited.

Effective January 1, 2023, the administration fees for Series O units were reduced to 0.05% from 0.10%.

Effective January 1, 2023, Suromitra Sanatani was appointed as Chair of the Independent Review Committee ("the IRC"). Effective February 1, 2023, Joanne Vézina was appointed as a member of the IRC. Effective March 1, 2023, Enrique Cuyegkeng was appointed as a member of the IRC.

¹ The management expense ratio ("MER") is based on the direct expenses charged to the Fund and the Fund's proportionate share of the expenses of underlying funds, if any, for the stated period, excluding commissions and other portfolio transaction costs, and is expressed as an annualized percentage of the daily average net asset value during the period. RBC GAM may, at its discretion and without notice to unitholders, waive or absorb certain operating expenses. MER includes the waiver or absorption by RBC GAM of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by RBC GAM.

² The Fund's portfolio turnover rate gives an indication of the level of activity employed by the portfolio manager. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund. The portfolio turnover rate is not applicable to money market funds.

³ The trading expense ratio represents total commissions and other portfolio transaction costs of the Fund and the Fund's proportionate share of such costs of underlying funds expressed as an annualized percentage of daily average net asset value during the period. The trading expense ratio is not applicable to fixed-income transactions.

Effective January 1, 2023, the administration fees for Series O units were reduced to 0.05% from 0.10%. If the changes to the administration fees would have been in effect throughout the financial year ended December 31, 2022, the adjusted MER for each series of the Fund would be: Series O – 0.05%.

Effective March 1, 2020, the administration fees for Series A, Series T5, Series D, Series F, Series FT5 and Series O units were reduced to 0.10% from 0.20%. Effective January 1, 2020, the management fees for Series A and Series T5 units were reduced to 1.35% from 1.65%; for Series D units were reduced to 0.75% from 1.05%; and for Series F and Series FT5 units were reduced to 0.60% from 0.90%. If the changes to the management fees and administration fees would have been in effect throughout the financial year ended December 31, 2020, the adjusted MER for each series of the Fund would be: Series A – 1.59%, Series T5 – 1.55%, Series D – 0.92%, Series F – 0.77%, Series FT5 – 0.75% and Series O – 0.11%.

Management Fees and Administration Fees

Management fees and administration fees of each series of the Fund are payable to RBC GAM and calculated at the following annual percentages, before GST/HST, of the daily net asset value of each series of the Fund. The management fee, breakdown of services received in consideration of the management fee, as a percentage of the management fee, and the administration fee for each series are as follows:

	Management Fees	Breakdown of Services		Administration Fees [†]
		Distribution	Other*	
Series A	1.35%	45%	55%	0.10%
Series T5	1.35%	45%	55%	0.10%
Series D	0.75%	14%	86%	0.10%
Series F	0.60%	–	100%	0.10%
Series FT5	0.60%	–	100%	0.10%
Series O	n/a	n/a	n/a	0.05%

Series O – no management fees are paid by the Fund with respect to Series O units. Series O unitholders pay a negotiated fee directly to RBC GAM for investment-counselling services.

* Includes all costs related to management, trustee, investment advisory services, general administration and profit.

[†] Effective January 1, 2023, the administration fees for Series O units were reduced to 0.05% from 0.10%.

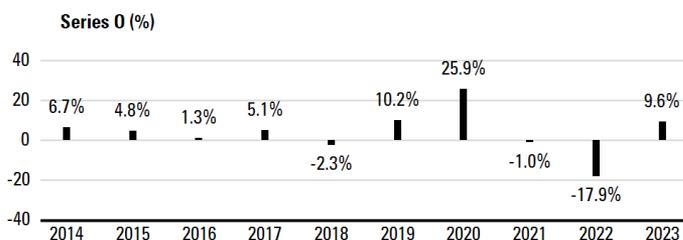

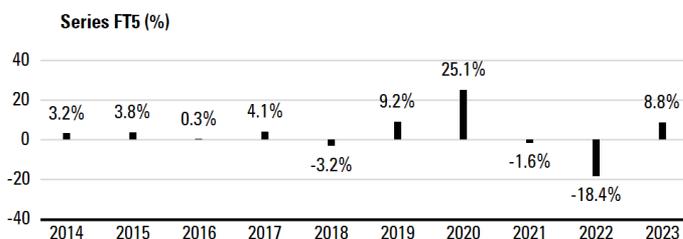

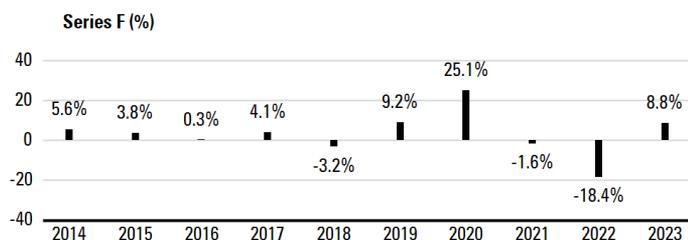

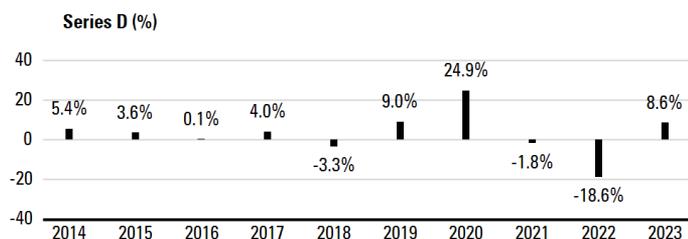

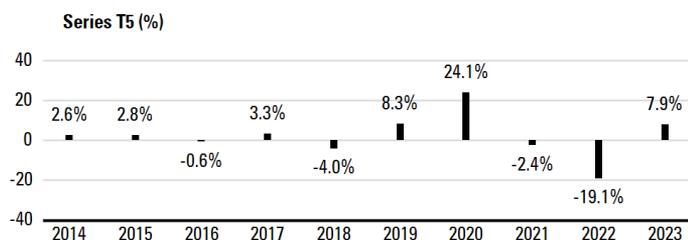

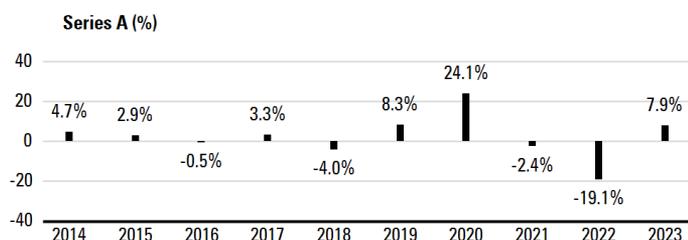

PAST PERFORMANCE

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional units of the Fund and would be lower if distributions were not reinvested. The performance information does not take into account sales, redemption, distribution, optional charges or income taxes payable that would have reduced returns or performance. Past performance does not necessarily indicate how the Fund may perform in the future. A fund with more than 10 years of performance history is only permitted to disclose the past 10 years.

Year-by-Year Returns (%)

The bar chart indicates the Fund's performance for each of the years shown, and illustrates how the Fund's performance has changed from year to year. The bar chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the end of the financial year.

Annual Compound Returns (%)

The table shows the annual compound returns for each series of the Fund and for each of the periods indicated ended on December 31, 2023, compared with the following benchmark:
