## MANAGEMENT DISCUSSION OF FUND PERFORMANCE

### Investment Objective and Strategies

The Fund seeks to provide long-term capital growth by investing primarily in equity securities of a diversified mix of companies operating in various countries around the world across a range of sectors.

The Fund invests in stocks that have undergone a selection process emphasizing companies with the ability to grow their dividends over time, a sustainable competitive advantage, high and sustainable profitability and strong management teams.

### Risk

There were no significant changes to the investment objective and strategies that affected the Fund's overall level of risk during the reporting period. The risks of investing in the Fund and the suitability of the Fund for investors remain as discussed in the Simplified Prospectus.

### Results of Operations

The Fund's net asset value rose to \$5.0 billion as of December 31, 2023, from \$4.9 billion at the end of 2022. The increase was due to investment returns, partially offset by net redemptions.

Over the past year, the Fund's Series F units gained 9.4%, which underperformed the 20.5% rise in the benchmark. The Fund's return is after the deduction of fees and expenses, while benchmark and broad-based index returns do not include any costs of investing. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of any other series, which may vary because of differences in management fees and expenses.

Many equity investors began the period concerned that higher interest rates would tip the U.S. economy into recession. These concerns were amplified in March, when rapidly increasing interest rates caused bank balance sheets to weaken, and the failure of a number of midsize U.S. banks raised fears of even tighter credit conditions. U.S. consumers, however, continued to spend, and fears of a recession gradually gave way to a growing consensus that a contraction might be avoided.

The equity market was characterized by strong performance from a narrow group of large technology-related U.S. firms, many of which benefited from optimism over the prospects for artificial intelligence. As a result, large-cap U.S. equity indexes outperformed most other markets. China's post-pandemic economic recovery continued to be lacklustre, with the economy slipping into deflation toward the end of the period. Economic growth was also muted in Europe.

Inflation continued to moderate across most regions, and the U.S. Federal Reserve signalled toward the end of the period that interest rates had likely peaked, causing equity markets to rally in the final two months of 2023.

The portfolio benefited from positions in Nvidia, Broadcom and Blackstone. Returns were limited by holdings in First Republic Bank, Estée Lauder and Charles Schwab.

### Recent Developments

The ongoing resolution of pandemic-related supply-chain problems and easing inflation are reducing the odds that interest rates will rise any higher. These developments are encouraging for investors and create more supportive market conditions for capital markets generally, in the view of the sub-advisor. Equity markets have arguably been distracted by macroeconomic uncertainty since the pandemic, and investors should now be able to refocus on company fundamentals such as earnings, cash flows and valuations.

Effective January 1, 2023, Suromitra Sanatani was appointed as Chair of the Independent Review Committee ("the IRC"). Effective February 1, 2023, Joanne Vézina was appointed as a member of the IRC. Effective March 1, 2023, Enrique Cuyegkeng was appointed as a member of the IRC.

<sup>1</sup> The management expense ratio ("MER") is based on the direct expenses charged to the Fund and the Fund's proportionate share of the expenses of underlying funds, if any, for the stated period, excluding commissions and other portfolio transaction costs, and is expressed as an annualized percentage of the daily average net asset value during the period. RBC GAM may, at its discretion and without notice to unitholders, waive or absorb certain operating expenses. MER includes the waiver or absorption by RBC GAM of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by RBC GAM.

<sup>2</sup> The Fund's portfolio turnover rate gives an indication of the level of activity employed by the portfolio manager. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund. The portfolio turnover rate is not applicable to money market funds.

<sup>3</sup> The trading expense ratio represents total commissions and other portfolio transaction costs of the Fund and the Fund's proportionate share of such costs of underlying funds expressed as an annualized percentage of daily average net asset value during the period. The trading expense ratio is not applicable to fixed-income transactions.

<sup>4</sup> From February 28, 2022.

Effective March 1, 2020, the administration fees for Series A units were reduced to 0.15% from 0.20%. If the changes to the administration fees would have been in effect throughout the financial year ended December 31, 2020, the adjusted MER for each series of the Fund would be: Series A – 2.09%.

**Management Fees and Administration Fees**

Management fees and administration fees of each series of the Fund are payable to RBC GAM and calculated at the following annual percentages, before GST/HST, of the daily net asset value of each series of the Fund. The management fee, breakdown of services received in consideration of the management fee, as a percentage of the management fee, and the administration fee for each series are as follows:

	Management Fees	Breakdown of Services		Administration Fees
		Distribution	Other*	
Series A	1.75%	57%	43%	0.15%
Series T5	1.75%	57%	43%	0.15%
Series T8	1.75%	57%	43%	0.15%
Series D	1.00%	25%	75%	0.15%
Series F	0.75%	–	100%	0.15%
Series FT5	0.75%	–	100%	0.15%
Series FT8	0.75%	–	100%	0.15%
Series O	n/a	n/a	n/a	0.02%

Series O – no management fees are paid by the Fund with respect to Series O units. Series O unitholders pay a negotiated fee directly to RBC GAM for investment-counselling services.

\* Includes all costs related to management, trustee, investment advisory services, general administration and profit.

### PAST PERFORMANCE

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional units of the Fund and would be lower if distributions were not reinvested. The performance information does not take into account sales, redemption, distribution, optional charges or income taxes payable that would have reduced returns or performance. Past performance does not necessarily indicate how the Fund may perform in the future. A fund with more than 10 years of performance history is only permitted to disclose the past 10 years.

#### Year-by-Year Returns (%)

The bar chart indicates the Fund's performance for each of the years shown, and illustrates how the Fund's performance has changed from year to year. The bar chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the end of the financial year.
