MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

The Fund seeks to provide investors with long-term capital growth by investing generally in a diversified portfolio of common stocks of small-float, high-quality Canadian companies. To achieve the Fund's investment objective, the portfolio manager generally invests in small capitalization growth companies that they believe have a superior management team, a leadership position in their industry, a high level of profitability compared to their competitors, and strong earnings potential.

Risk

There were no significant changes to the investment objective and strategies that affected the Fund's overall level of risk during the reporting period. The risks of investing in the Fund and the suitability of the Fund for investors remain as discussed in the Simplified Prospectus.

Results of Operations

The Fund's net asset value rose to \$782 million as of December 31, 2022, from \$768 million at the end of 2021. The increase was due to net inflows, partially offset by investment losses.

Over the past year, the Fund's Series F units lost 9.6%, which underperformed the 5.8% decline in the benchmark. The Fund's return is after the deduction of fees and expenses, while benchmark and broad-based index returns do not include any costs of investing. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of any other series, which may vary because of differences in management fees and expenses.

Canadian and U.S. stocks tumbled in 2022, fueled by the highest inflation in decades and the concurrent rise in interest rates. Stocks came under pressure after the U.S. Federal Reserve and the Bank of Canada responded to inflation – the fastest in 40 years – with a vow to stamp it out with successive interest-rate hikes. Interest-rate-sensitive stocks were hurt most, resulting in a sell-off in the Information Technology sector in both markets. Meanwhile, a surge in energy prices helped cushion market returns in Canada, which outperformed most other major markets during the year. The drop in the S&P 500 Index was the worst since 2008 – the year of the financial crisis – but only since 2018 for the Canadian benchmark.

The Fund's relative exposure to Shopify, PrairieSky Royalty and Element Fleet Management had the most positive impact on the Fund's returns, while exposure to Tricon Residential, Nuvei and Canadian Natural Resources was negative for performance.

The sectors that had the most positive impact on the Fund's returns were Information Technology, Consumer Discretionary and Financials, while exposure to Consumer Staples, Real Estate and Industrials had a negative impact.

The Fund had overweight positions in PrairieSky Royalty, Stantec and Aritzia and underweight positions in Royal Bank of Canada, Enbridge and Toronto-Dominion Bank.

At the sector level, the Fund had overweight exposure to Industrials, Consumer Discretionary and Real Estate and underweight exposure to Financials, Materials and Energy.

Recent Developments

Uncertainty is elevated and there is a wide range of potential outcomes for the economy and financial markets. The good news for investors is that stocks are now much more reasonably priced than they were at the start of the year. While valuation risk has diminished and long-term return potential has increased, stock prices could still fall in the event that we enter a recession and earnings decline. In the current environment, stock gains could be limited in the near term absent evidence that the economy is cooling adequately to bring down inflation while avoiding a recession.

Effective September 20, 2022, Brenda Eaton was appointed as Vice Chair of the Independent Review Committee (the "IRC") following the death of Paul K. Bates, who had served as a dedicated member of the IRC since December 2014. Effective December 31, 2022, Charles F. Macfarlane stepped down as a member of the IRC, and effective January 1, 2023, Suromitra Sanatani was appointed as Chair of the IRC.

Related-Party Transactions

Manager and Portfolio Manager

RBC GAM is an indirect, wholly owned subsidiary of Royal Bank and is the manager and principal portfolio manager of the Fund. RBC GAM is responsible for the Fund's day-to-day operations, provides investment advice and portfolio management services to the Fund and appoints distributors for the Fund. RBC GAM is paid a management fee by the Fund as compensation for its services. The Fund pays a fixed administration fee to RBC GAM, which, in turn, pays certain operating expenses of the Fund. Both the management fee and fixed administration fee are calculated and accrued daily as a percentage of the net asset value of each series of units of the Fund.

RBC GAM or its affiliates may earn fees and spreads in connection with various services provided to, or transactions with, the Fund, such as banking, brokerage, securities lending, foreign exchange and derivatives transactions. RBC GAM or its affiliates may earn a foreign exchange spread when unitholders switch between series of funds denominated in different currencies. The Fund also maintains bank accounts and overdraft provisions with Royal Bank for which Royal Bank may earn a fee. Affiliates of RBC GAM that provide services to the Fund in the course of their normal businesses are discussed below.

Distributors

RBC GAM, Royal Mutual Funds Inc., RBC Direct Investing Inc., RBC Dominion Securities Inc. and Phillips, Hager & North Investment Funds Ltd. are principal distributors of, or may distribute certain series of units of, the Fund. Dealers may receive an ongoing commission based on the total value of their clients' investment in certain series of units of the Fund.

Registrars

RBC GAM, RBC Investor Services Trust ("RBC IS") or Royal Bank (or a combination thereof) are the registrars of the Fund and keep records of who owns units of the Fund. The registrars earn a fee, which is paid by the manager from the fixed administration fee paid by the Fund.

Trustee and Custodian

RBC IS is the trustee and holds title to the Fund's property on behalf of unitholders. RBC IS is the custodian of the Fund and holds the assets of the Fund.

RBC IS earns a fee as the trustee and custodian, which is paid by the manager from the fixed administration fee paid by the Fund.

Securities Lending Agent

To the extent the Fund may engage in securities lending transactions, RBC IS may act as the Fund's securities lending agent. Any revenue earned on such securities lending is split between the Fund and the securities lending agent.

Brokers and Dealers

The Fund has established standard brokerage and dealing agreements at market rates with related parties. For the periods ended December 31, 2022 and 2021, the related-party commissions were \$6,000 (2021 – \$5,000), or 4% (2021 – 4%) of the total transaction costs paid for this Fund.

Other Related-Party Transactions

Pursuant to applicable securities legislation, the Fund relied on the standing instructions from the Independent Review Committee with respect to one or more of the following transactions:

Related-Party Trading Activities

- (a) trades in securities of Royal Bank;
- (b) investments in the securities of issuers for which a related-party dealer acted as an underwriter during the distribution of such securities and the 60-day period following the conclusion of such distribution of the underwritten securities to the public;
- (c) purchases of equity and debt securities from or sales of equity or debt securities to a related-party dealer, where it acted as principal; and

Inter-Fund Trading

- (d) purchases or sales of securities of an issuer from or to another investment fund or managed account managed by RBC GAM.

The applicable standing instructions require that Related-Party Trading Activities and Inter-Fund Trading be conducted in accordance with RBC GAM policy and that RBC GAM advise the Independent Review Committee of a material breach of any standing instruction. RBC GAM policy requires that an investment decision in respect of Related-Party Trading Activities (i) is made free from any influence of Royal Bank or its associates or affiliates and without taking into account any consideration relevant to Royal Bank or its affiliates or associates, (ii) represents the business judgment of the portfolio manager, uninfluenced by considerations other than the best interests of the Fund, (iii) is in compliance with RBC GAM policies and procedures, and (iv) achieves a fair and reasonable result for the Fund. RBC GAM policy requires that an investment decision in respect of Inter-Fund Trading is in the best interests of each Fund.

¹ The management expense ratio ("MER") is based on the direct expenses charged to the Fund and the Fund's proportionate share of the expenses of underlying funds, if any, for the stated period, excluding commissions and other portfolio transaction costs, and is expressed as an annualized percentage of the daily average net asset value during the period. RBC GAM may, at its discretion and without notice to unitholders, waive or absorb certain operating expenses. MER includes the waiver or absorption by RBC GAM of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by RBC GAM.

² The Fund's portfolio turnover rate gives an indication of the level of activity employed by the portfolio manager. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between high turnover rate and the performance of the Fund. The portfolio turnover rate is not applicable to money market funds.

³ The trading expense ratio represents total commissions and other portfolio transaction costs of the Fund and the Fund's proportionate share of such costs of underlying funds expressed as an annualized percentage of daily average net asset value during the period. The trading expense ratio is not applicable to fixed-income transactions.

Effective September 1, 2021, the management fees for Series F units were reduced to 0.75% from 1.00%, and the administration fees were increased to 0.10% from 0.00%. If the changes to the management and administration fees would have been in effect throughout the financial year ended December 31, 2021, the adjusted MER for each series of the Fund would be: Series F – 0.93%.

Past performance does not necessarily indicate how the Fund may perform in the future. A fund with more than 10 years of performance history is only permitted to disclose the past 10 years.
