

FIXED-INCOME ETF

RBC 1-5 YEAR LADDERED CANADIAN BOND ETF

December 31, 2017

Portfolio Manager RBC Global Asset Management Inc. ("RBC GAM")

The Board of Directors of RBC Global Asset Management Inc. approved this annual management report of fund performance on March 8, 2018.

A Note on Forward-looking Statements

This report may contain forward-looking statements about the ETF, its future performance, strategies or prospects, and possible future ETF action. The words "may," "could," "should," "would," "suspect," "outlook," "believe," "plan," "anticipate," "estimate," "expect," "intend," "forecast," "objective" and similar expressions are intended to identify forward-looking statements.

Forward-looking statements are not guarantees of future performance. Forward-looking statements involve inherent risks and uncertainties, both about the ETF and general economic factors, so it is possible that predictions, forecasts, projections and other forward-looking statements will not be achieved. We caution you not to place undue reliance on these statements as a number of important factors could cause actual events or results to differ materially from those expressed or implied in any forward-looking statement made in relation to the ETF. These factors include, but are not limited to, general economic, political and market factors in Canada, the United States and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological changes, changes in laws and regulations, judicial or regulatory judgments, legal proceedings and catastrophic events.

The above list of important factors that may affect future results is not exhaustive. Before making any investment decisions, we encourage you to consider these and other factors carefully. All opinions contained in forward-looking statements are subject to change without notice and are provided in good faith but without legal responsibility.

This annual management report of fund performance ("MRFP") contains financial highlights but does not contain the complete annual financial statements of the ETF. You can get a copy of the financial statements at your request, and at no cost, by calling 1-855-RBC-ETFs (722-3837), by writing to us at RBC Global Asset Management Inc., P.O. Box 7500, Station A, Toronto, Ontario M5W 1P9, or by visiting our website at www.rbcgam.com/etf/reports or SEDAR at www.sedar.com. Security holders may also contact us using one of these methods to request a copy of the ETF's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

The ETF seeks to provide unitholders with exposure primarily to the performance of a diversified portfolio of Canadian corporate and government bonds, divided (“laddered”) into five groupings with staggered maturities from one to five years, which will provide regular income while preserving capital.

The ETF will achieve exposure to Canadian corporate and government bonds primarily by investing in a portfolio of five equally weighted sub-portfolios, each of which is targeted to provide at least 30% exposure to government bonds and no more than 70% exposure to corporate bonds. The portfolios may deviate at times from their targeted weights due to market fluctuations between rebalance periods. The government bond exposure will be obtained by direct investment in one or more government bonds. The decision to invest in each government bond is based on RBC GAM’s assessment of each bond’s term to maturity, credit quality, yield to maturity and an overall emphasis on issuer diversification. The corporate bond exposure will be obtained primarily by investing in an appropriate RBC Target Maturity Corporate Bond ETF. Each sub-portfolio will have remaining terms to maturity ranging from one to five years. At the end of each year, the nearest term sub-portfolio will be sold and proceeds rolled into a new five-year sub-portfolio in order to maintain the one- to five-year ladder. The portfolio holdings will be rebalanced on a quarterly basis. The frequency of the rebalancing may change without notice.

Risk

There were no significant changes to the ETF that materially affected the ETF’s overall level of risk during the reporting period. The risks of investing in the ETF and the suitability of the ETF for investors remain as discussed in the Prospectus.

Effective June 30, 2017, RBC GAM adopted the risk classification methodology under National Instrument 81-102 – *Investment Funds* (the “new risk classification methodology”). Pursuant to the new risk classification methodology, certain funds’ risk ratings were changed. RBC GAM reviews each ETF’s risk rating on an annual basis or if there has been a material change to an ETF’s investment objectives or investment strategies. Any changes to an ETF’s risk rating are the result of RBC GAM’s annual review and the adoption of the new risk classification methodology.

There were no changes to the ETF’s risk rating during the reporting period.

Results of Operations

The ETF’s net asset value rose to \$232 million as of December 31, 2017, from \$125 million at the end of 2016. The increase was due to net inflows.

Over the past year, the ETF’s units gained 0.5%, which outperformed the 0.1% rise in the benchmark. The ETF’s return is after the deduction of fees and expenses, while benchmark and broad-based index returns do not include any costs of investing. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of the ETF.

North American corporate bonds recorded gains as demand continued for investments offering excess yield over money-market instruments or government bonds. Economic growth recovered strongly in Canada, as did oil and the Canadian dollar, enabling the Bank of Canada (the “BOC”) to raise short-term rates for the first time in seven years. The U.S. Federal Reserve (the “Fed”) boosted rates three times during 2017 amid a strengthening economy.

Corporate and provincial bonds with maturities of five years and under had modest total returns this year. Short-dated federal-government bonds had small losses in 2017, while corporate bonds outperformed both federal and provincial bonds across all maturities. Returns for corporate bonds were primarily due to the excess yield (carry) they provide over government bonds.

Recent Developments

The portfolio manager believes that the macroeconomic backdrop of an expanding global economy and its positive impact on corporate earnings and corporate balance sheets support the outlook for corporate bonds. The passage late in 2017 of the U.S. tax plan will help extend an already long credit cycle. As a result, the BOC and the Fed will likely continue on the path of raising short-term interest rates. The results of the NAFTA renegotiation remain unknown for the BOC at this point, but higher oil prices are positive for the domestic economy.

The portfolio manager expects the first half of 2018 to be characterized by modest returns, higher short-term yields and the continued reduction in the excess yields on non-government bonds.

Related-Party Transactions

Manager, Trustee and Portfolio Manager

RBC GAM is an indirect, wholly owned subsidiary of Royal Bank of Canada ("Royal Bank") and is the manager, trustee and portfolio manager of the ETF. RBC GAM is responsible for the ETF's day-to-day operations, holds title to the ETF's property on behalf of its unitholders, and provides investment advice and portfolio management services to the ETF. RBC GAM is paid a management fee by the ETF as compensation for its services. The management fee is calculated and accrued on a daily basis and is based on a percentage of the net asset value of the ETF.

RBC GAM or its affiliates may earn fees and spreads in connection with various services provided to, or transactions with, the ETF, such as banking, brokerage, securities lending, foreign exchange and derivatives transactions. RBC GAM or its affiliates may earn a foreign exchange spread when unitholders buy and sell ETF units denominated in different currencies. The ETF may also maintain bank accounts and overdraft provisions with Royal Bank for which Royal Bank may earn a fee. Affiliates of RBC GAM that provide services to the ETF in the course of their normal businesses are discussed below.

Custodian and Valuation Agent

RBC Investor Services Trust ("RBC IS") is the custodian and valuation agent and holds the assets of the ETF and provides administrative services to the ETF. RBC IS earns a variable fee based on the value of assets under custody and a fixed fee for other valuation and administrative services.

Designated Broker

RBC GAM has entered into an agreement with RBC Dominion Securities Inc., an affiliate of RBC GAM, to act as designated broker and/or authorized dealer for the distribution of units of the ETF, on terms and conditions that are comparable to arm's length agreements in the ETF industry. The material terms and conditions of the agreement have been disclosed in the ETF's Prospectus.

Brokers and Dealers

The ETF has established standard brokerage and dealing agreements at market rates with related parties. These related-party commissions were \$18,000 (2016 – \$17,000) or 100% (2016 – 43%) of the total transaction costs paid for this ETF.

Other Related-Party Transactions

Pursuant to applicable securities legislation, the ETF relied on the standing instructions from the Independent Review Committee with respect to one or more of the following transactions:

Related-Party Trading Activities

- (a) trades in securities of Royal Bank;
- (b) investments in the securities of issuers for which a related-party dealer acted as an underwriter during the distribution of such securities and the 60-day period following the conclusion of such distribution of the underwritten securities to the public;
- (c) purchases of debt securities from or sales of debt securities to a related-party dealer, where it acted as principal.

The applicable standing instructions require that Related-Party Trading Activities be conducted in accordance with RBC GAM policy and that RBC GAM advise the Independent Review Committee of a material breach of any standing instruction. RBC GAM policy requires that an investment decision in respect of Related-Party Trading Activities (i) is made free from any influence of Royal Bank or its associates or affiliates and without taking into account any consideration relevant to Royal Bank or its affiliates or associates, (ii) represents the business judgment of the portfolio manager, uninfluenced by considerations other than the best interests of the ETF, (iii) is in compliance with RBC GAM policies and procedures, and (iv) achieves a fair and reasonable result for the ETF.

FINANCIAL HIGHLIGHTS

The following tables show selected key financial information about the ETF and are intended to help you understand the ETF's financial performance for the past five years or for the periods since inception. This information is derived from the ETF's audited annual financial statements. For financial years beginning on or after January 1, 2014, financial highlight information is derived from financial statements prepared in compliance with International Financial Reporting Standards ("IFRS"). For financial years prior to January 1, 2014, financial highlight information is derived from financial statements prepared in accordance with Canadian generally accepted accounting principles ("GAAP"). "Net Assets," for the periods prior to 2014, are calculated in accordance with GAAP, and "Net Asset Value" is derived from the valuation method disclosed in the RBC Funds Annual Information Form and is used for transactional purposes (see Ratios and Supplemental Data). All other calculations for the purposes of this MRFP are made using Net Asset Value. There is no significant difference between "Net Assets" and "Net Asset Value" under IFRS.

Change in Net Assets Per Unit (\$)

| For the Year/ Period Ended | Net Assets Beginning of Year/Period | Increase (Decrease) from Operations ¹ | | | | | Annual Distributions ² | | | | Net Assets End of Year/Period | |
|-------------------------------|--|--|-------------------|-------------------------------|---------------------------------|-------------|--|-------------------|--------------------------|----------------------|-------------------------------------|--------------|
| | | Total Revenue (Loss) | Total Expenses | Realized Gains (Losses) | Unrealized Gains (Losses) | Total | From Income (Excluding Dividends) | From Dividends | From Capital Gains | Return of Capital | | |
| Dec. 31, 2017 | 19.69 | 0.59 | (0.01) | (0.24) | (0.32) | 0.02 | (0.56) | — | — | (0.01) | (0.57) | 19.21 |
| Dec. 31, 2016 ³ | 20.00 [†] | 0.62 | (0.02) | (0.18) | (0.30) | 0.12 | (0.55) | — | — | (0.01) | (0.56) | 19.69 |

¹ Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period. This table is not intended to be a reconciliation of beginning to ending net assets per unit.

² Distributions are either paid in cash, reinvested in additional units of the ETF, or both.

³ From January 19, 2016.

[†] Initial offering net asset value per unit.

Ratios and Supplemental Data

| As at | Net Asset Value (\$000s) | Number of Units Outstanding (000s) | Management Expense Ratio (%) ¹ | MER Before Absorption (%) ¹ | Trading Expense Ratio (%) ² | Portfolio Turnover Rate (%) ³ | Net Asset Value Per Unit (\$) | Closing Market Price (\$) |
|----------------------------|-----------------------------|---------------------------------------|--|---|---|---|----------------------------------|------------------------------|
| Dec. 31, 2017 | 231 507 | 12 050 | 0.25 | 0.25 | 0.01 | 55.15 | 19.21 | 19.20 |
| Dec. 31, 2016 ⁴ | 125 017 | 6 350 | 0.24 | 0.24 | 0.03 | 79.61 | 19.69 | 19.66 |

¹ The management expense ratio ("MER") is based on expenses for the stated period, excluding commissions and other portfolio transaction costs, and is expressed as an annualized percentage of the daily average net asset value during the period. RBC GAM may, at its discretion and without notice to unitholders, waive or absorb certain operating expenses. MER includes the waiver or absorption by RBC GAM of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by RBC GAM.

² The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period. The trading expense ratio is not applicable to fixed-income transactions.

³ The ETF's portfolio turnover rate gives an indication of the level of activity employed by the portfolio manager. A portfolio turnover rate of 100% is equivalent to the ETF buying and selling all of the securities in its portfolio once in the course of the year. The higher the ETF's portfolio turnover rate in a year, the greater the trading costs payable by the ETF in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the ETF.

⁴ From January 19, 2016.

Management Fees

RBC GAM is the manager, trustee and portfolio manager of the ETF. A management fee is charged indirectly and directly to the ETF: indirectly as this ETF invests in the units of other RBC ETFs and the other RBC ETFs pay management fees; and directly for other portfolio manager activities. The total management fee will not exceed 0.22%, before GST/HST, of the daily net asset value of the ETF.

PAST PERFORMANCE

The performance information shown assumes that all distributions made by the ETF in the periods shown were reinvested in additional units of the ETF and would be lower if distributions were not reinvested. The performance information does not take into account sales, redemption, distribution, optional charges or income taxes payable that would have reduced returns or performance. Past performance does not necessarily indicate how the ETF may perform in the future. A fund with more than 10 years of performance history is only permitted to disclose the past 10 years.

Year-by-Year Returns (%)

The bar chart indicates the ETF's performance for each of the years shown, and illustrates how the ETF's performance has changed from year to year. The bar chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the end of the financial year.

Annual Compound Returns (%)

The table shows the annual compound returns of the ETF for each of the periods indicated ended on December 31, 2017, compared with the following benchmark:

FTSE TMX Canada Short Term Bond Index

| | Past Year | Past 3 Years | Past 5 Years | Past 10 Years | Since Inception |
|-----------|-----------|--------------|--------------|---------------|-----------------|
| ETF | 0.5 | — | — | — | 1.1 |
| Benchmark | 0.1 | — | — | — | 0.5 |

The Benchmark index returns do not include any costs of investing. See Management Discussion of Fund Performance for a discussion of performance relative to the Benchmark index.

The ETF's units have been available for sale to unitholders since January 19, 2016.

Inception dates are not provided for Funds that have been in existence for more than 10 years.

INDEX DESCRIPTION

FTSE TMX Canada Short Term Bond Index This index is a measure of the performance of Canadian bonds with terms to maturity of one to five years and is a good proxy for a short-term fixed-income investment.
