MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

The Fund seeks to provide long-term capital growth by investing primarily in a well-diversified portfolio of U.S. equity securities.

To achieve its investment objective, the Fund invests most of its assets in the Phillips, Hager & North U.S. Multi-Style All-Cap Equity Fund (the “underlying fund”). The underlying fund invests in U.S. equity securities with the objective of building a portfolio that encompasses multiple investment styles. The underlying fund’s portfolio will be comprised of the following investment styles, which are managed by RBC GAM’s sub-advisors as separate portfolios within the underlying fund: U.S. Large Cap Growth, U.S. Mid Cap Growth, U.S. Large Cap Value, U.S. Mid Cap Value, U.S. Small Cap Core and U.S. Small Cap Value.

Results of Operations

The Fund’s net asset value was \$38 million as of September 30, 2018.

Over the past six months, the Fund’s Series A shares gained 19.6%. The Fund’s return is after the deduction of fees and expenses. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of any other series, which may vary because of differences in management fees and expenses.

The accelerating U.S. economy and trade tensions continued to dominate headlines during the period. The U.S. raised pressure on China to open up its economy, but by quarter-end there was scant evidence that the trade conflict between the countries had done much to hinder the U.S. economic expansion. U.S. stocks posted solid gains during the period, with the benchmark index rising to an all-time high in September, supported by a solid economic backdrop and robust earnings growth. The continued economic expansion led the U.S. Federal Reserve to raise interest rates twice during the period.

The Fund’s Large Cap Growth sleeve outperformed the Russell Large Cap Growth benchmark during the period. Both sector allocation and security selection decisions contributed positively to returns. An underweight position in the Energy sector had a positive impact on performance, while an overweight position in Financials was negative for returns. From a security-selection standpoint, favourable stock picks in the Consumer Discretionary and Health Care sectors bolstered performance.

The Fund’s Large Cap Value strategy underperformed its benchmark, the Russell Top 200 Value Index, due primarily to adverse stock selection in the Industrials, Financials and Health Care sectors. From a sector-allocation standpoint, an underweight position in the Communication Services sector added to performance, while an overweight position in Industrials held back returns.

The Fund’s QUBE Large Cap Growth component underperformed versus the Russell Large Cap Growth benchmark, due primarily to adverse sector allocation in the Consumer Discretionary, Consumer Staples and Information Technology sectors. From a security-selection standpoint, favourable stock picks in the Consumer Discretionary and Financials sectors bolstered performance.

Recent Developments

Economic growth remains strong in the U.S., but many other economies are slowing. Protectionism and Chinese economic deceleration are among the risks threatening the solid, albeit moderating, global growth. While the portfolio manager expects continued expansion, the slowdown has led to a lowering of developed-world growth forecasts.

The portfolio manager’s analysis of a variety of scenarios suggests that stocks in the U.S. can deliver decent upside with reasonable assumptions, as long as earnings continue to come through as analysts expect. The portfolio manager recognizes, however, that given the late stage in the business cycle and the fact that valuations are above equilibrium, earnings growth is now critical to sustaining the bull market in stocks.

Related-Party Transactions

Manager and Portfolio Manager

RBC GAM is an indirect, wholly owned subsidiary of Royal Bank of Canada (“Royal Bank”) and is the manager and portfolio manager of the Fund. RBC GAM is responsible for the Fund’s day-to-day operations, provides investment advice and portfolio management services to the Fund and appoints distributors for the Fund. RBC GAM is paid a management fee by the Fund as compensation for its services. The Fund pays a fixed administration fee to RBC GAM, which, in turn, pays certain operating expenses of the Fund. Both the management fee and fixed administration fee are calculated and accrued daily as a percentage of the net asset value of each series of mutual fund shares of the Fund.

RBC GAM or its affiliates may earn fees and spreads in connection with various services provided to, or transactions with, the Fund, such as banking, brokerage, securities lending, foreign exchange and derivatives transactions. RBC GAM or its affiliates may earn a foreign exchange spread when shareholders switch between series of funds denominated in different currencies. The Fund also maintains bank accounts and overdraft provisions with Royal Bank for which Royal Bank may earn a fee. Affiliates of RBC GAM that provide services to the Fund in the course of their normal businesses are discussed below.

September 30, 2018

Distributors

RBC GAM, Royal Mutual Funds Inc., RBC Direct Investing Inc., RBC Dominion Securities Inc. and Phillips, Hager & North Investment Funds Ltd. are principal distributors of, or may distribute certain series of the mutual fund shares of, the Fund. Dealers receive an ongoing commission based on the total value of their clients' investment in certain series of mutual fund shares of the Fund.

Registrars

RBC GAM, RBC Investor Services Trust ("RBC IS") or Royal Bank (or a combination thereof) are the registrars of the Fund and keep records of who owns mutual fund shares of the Fund. The registrars earn a fee, which is paid by the manager from the fixed administration fee paid by the Fund.

Custodian

RBC IS is the custodian and holds the assets of the Fund. RBC IS earns a fee as the custodian, which is paid by the manager from the fixed administration fee paid by the Fund.

Other Related-Party Transactions

Pursuant to applicable securities legislation, the Fund relied on the standing instructions from the Independent Review Committee with respect to one or more of the following transactions:

Related-Party Trading Activities

- (a) trades in securities of Royal Bank;
- (b) investments in the securities of issuers for which a related-party dealer acted as an underwriter during the distribution of such securities and the 60-day period following the conclusion of such distribution of the underwritten securities to the public;
- (c) purchases of equity and debt securities from or sales of equity or debt securities to a related-party dealer, where it acted as principal; and

Inter-Fund Trading

- (d) purchases or sales of securities of an issuer from or to another investment fund or managed account managed by RBC GAM.

The applicable standing instructions require that Related-Party Trading Activities and Inter-Fund Trading be conducted in accordance with RBC GAM policy and that RBC GAM advise the Independent Review Committee of a material breach of any standing instruction. RBC GAM policy requires that an investment decision in respect of Related-Party Trading Activities (i) is made free from any influence of Royal Bank or its associates or affiliates and without taking into account any consideration relevant to Royal Bank or its affiliates or associates, (ii) represents the business judgment of the portfolio manager, uninfluenced by considerations other than the best interests of the Fund, (iii) is in compliance with RBC GAM policies and procedures, and (iv) achieves a fair and reasonable result for the Fund. RBC GAM policy requires that an investment decision in respect of Inter-Fund Trading is in the best interests of each Fund.

¹ The management expense ratio ("MER") is based on expenses for the stated period, excluding commissions and other portfolio transaction costs, and is expressed as an annualized percentage of the daily average net asset value during the period. RBC GAM may, at its discretion and without notice to shareholders, waive or absorb certain operating expenses. MER includes the waiver or absorption by RBC GAM of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by RBC GAM.

² The Fund's portfolio turnover rate gives an indication of the level of activity employed by the portfolio manager. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund.

³ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period. The trading expense ratio is not applicable to fixed-income transactions.

⁴ Effective June 30, 2016, the management fees were changed in respect of Series A, Advisor Series, Series D and Series F mutual fund shares of the Fund. If the changes to the management fees would have been in effect throughout the financial year, the adjusted MER for each series of the Fund would be: Series A – 1.89%, Advisor Series – 1.89%, Series D – 1.03% and Series F – 0.81%.
