MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

The Fund seeks to provide long-term capital growth, with a secondary focus on modest income, by investing primarily in Canadian, U.S. and international equities and fixed-income securities, either directly or indirectly through investment in other funds managed by RBC GAM or an affiliate of RBC GAM (called the “underlying funds”). The Fund follows a socially responsible approach to investing. It is currently expected that the Fund will invest up to 100% of its net assets in units of the RBC Vision Bond Fund, the RBC Vision Canadian Equity Fund and the RBC Vision Global Equity Fund.

To achieve the Fund’s objectives, the portfolio manager of an underlying fund begins by screening companies using environmental, social and governance (“ESG”) exclusion criteria that determine its investable universe. RBC GAM has partnered with Sustainalytics to implement the ESG exclusion criteria and to identify issuers for the Fund’s exclusion list.

With the exception of government and quasi-government bonds, Sustainalytics bases the ESG exclusion criteria on one or more of three categories, as applicable: Product Involvement, ESG Controversies and Relative Scoring.

The Product Involvement criteria exclude securities of issuers that are engaged primarily in the production and distribution of alcohol, gambling, weapons, adult entertainment, cannabis or tobacco products. Involvement is based on revenues derived from these activities, based on data collected by Sustainalytics.

The ESG Controversies criteria exclude securities of issuers involved in ‘Category 5 – Severe’ or ‘Category 4 – High’ controversies, as determined by Sustainalytics’ Controversy Rating. Sustainalytics’ Controversy Rating is based on its assessment of an issuer’s involvement in incidents with negative E, S, and G implications.

The Relative Scoring criteria exclude securities of issuers assessed as ‘worst-in-class’. In order to be classified as worst-in-class, Sustainalytics must assign an ESG Risk Rating of Severe Risk and the issuer’s ESG Risk Rating must rank in the bottom quartile of its subindustry peer group. Sustainalytics’ ESG Risk Rating measures an issuer’s unmanaged ESG risk, or the degree to which a company’s economic value is at risk driven by ESG factors.

With respect to government and quasi-government bonds, the Country Risk Rating criteria exclude governments and government-related entities from countries with ESG Factors Letter Grade of ‘D’ or ‘E’, as determined by Sustainalytics. Sustainalytics uses a five-level ESG scale for its Country Risk Rating, with the highest possible letter grade being ‘A’ and the lowest being ‘E’. Sustainalytics’ Country Risk Rating measures the risk to a country’s long-term prosperity and

economic development by assessing the national wealth of a country and its ability to utilize and manage this wealth in an effective and sustainable manner.

On a monthly basis, Sustainalytics provides RBC GAM with a list of ineligible issuers based on an underlying fund’s exclusion criteria. Sustainalytics periodically conducts reviews of an underlying fund’s holdings against the exclusion list. An underlying fund may from time to time depart from its exclusion list when RBC GAM has determined that it would be in the best interest of the underlying fund to do so.

The portfolio manager of the underlying fund then applies its multi-disciplined investment process to select securities for the underlying fund. This includes the incorporation of ESG factors to the extent that an issuer’s management and exposure to such ESG factors are material to the risk-adjusted long-term performance of the security and/or the underlying fund.

Results of Operations

The Fund’s net asset value was \$1.0 billion as of June 30, 2024.

Over the past six months, the Fund’s Series F units gained 7.7%. The Fund’s return is after the deduction of fees and expenses. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of any other series, which may vary because of differences in management fees and expenses.

The global economy continued to demonstrate resilience in the face of higher-than-expected interest rates and geopolitical concerns. While inflation cooled sufficiently to prompt central-bank rate cuts in Canada and the eurozone, the U.S. Federal Reserve (the “Fed”) delayed rate reductions given that U.S. inflation remained higher than in most other developed countries. The wars in Ukraine and Gaza persisted, with little sign of ending.

The Fund had a neutral position in both stocks and bonds. Major government-bond markets posted losses in the first half of 2024, paring some of last year’s strong performance as economic growth and inflation stayed generally stronger than anticipated. Investors began 2024 expecting the Fed to cut interest rates at least three times in the first half of the year but were disappointed. The U.S. continued to report relatively strong economic growth and inflation. The Fed kept interest rates in a range of 5.25% to 5.50% and hinted that inflation would have to come down more for rates to decline. In contrast to the U.S., inflation and growth moderated more in the eurozone and Canada, leading to June rate cuts by their central banks. The drop in the Bank of Canada’s policy rate, to 4.75% from 5.00%, was the first rate reduction since the pandemic. Returns in the fixed-income segment of the portfolio were held back by the RBC Vision Bond Fund.

Equity markets climbed to new highs in the second quarter of 2024, although the gains were concentrated in a small group of the biggest technology stocks that have benefited from advances in artificial intelligence (“AI”). Valuations in equity markets outside of U.S. large-caps were less demanding, meaning global equity markets could offer attractive returns should economic and corporate-profit growth remain positive. Emerging-market stocks continued to underperform their developed-market counterparts. Returns were significantly bolstered by the RBC Vision Global Equity Fund.

During the first half of 2024, one issuer was deemed ineligible by Sustainalytics and subsequently removed from the RBC Vision Bond Fund, an underlying fund of the Fund, for failing to meet the RBC Vision Bond Fund’s ESG exclusion criteria. North West Redwater Partnership Inc. was divested from the RBC Vision Bond Fund because the issuer had poor ESG performance relative to its industry peers under the RBC Vision Bond Fund’s Relative Scoring criteria. Specifically, the issuer’s overall level of unmanaged ESG risk, as measured by Sustainalytics’ ESG Risk Rating, was considered ‘severe’, and ranked in the bottom quartile compared with its industry peers, as defined by Sustainalytics. This stemmed from the lack of ESG-related disclosure published by the company, which Sustainalytics considered inadequate compared with the issuer’s peers at the time of removal.

No other material investment decision was made based on the ESG exclusion criteria during the first half of 2024. In the opinion of Sustainalytics and RBC GAM, all other holdings in the Fund, including its underlying funds, were eligible at the time of review.

Recent Developments

The portfolio manager’s base case has the economy experiencing a soft landing, inflation falling gradually toward central bankers’ 2% targets and central banks delivering modest monetary easing. Against this backdrop, prospective returns for fixed income appear solid, in the mid-single digits with further upside potential should the economy falter. Stocks still offer superior return potential versus bonds but the upside has been reduced by the latest rally and the equity-risk premium is narrow.

Recognizing the improved outlook for bonds and demanding valuations in stocks, as well as the wide range of potential outcomes for the economy and markets, the portfolio manager believes that it is appropriate to maintain a neutral asset allocation. The portfolio manager would consider increasing exposure to stocks should the equity-risk premium widen or if there was a broadening in the equity-market rally beyond mega-cap technology and themes other than AI.

Effective July 1, 2024, the administration fees for Series A, Series D, Series DZ and Series F units will be reduced to 0.05% from 0.10%.

¹ The management expense ratio ("MER") is based on the direct expenses charged to the Fund and the Fund's proportionate share of the expenses of underlying funds, if any, for the stated period, excluding commissions and other portfolio transaction costs, and is expressed as an annualized percentage of the daily average net asset value during the period. RBC GAM may, at its discretion and without notice to unitholders, waive or absorb certain operating expenses. MER includes the waiver or absorption by RBC GAM of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by RBC GAM.

² The Fund's portfolio turnover rate gives an indication of the level of activity employed by the portfolio manager. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund. The portfolio turnover rate is not applicable to money market funds.

³ The trading expense ratio represents total commissions and other portfolio transaction costs of the Fund and the Fund's proportionate share of such costs of underlying funds expressed as an annualized percentage of daily average net asset value during the period. The trading expense ratio is not applicable to fixed-income transactions.

Effective July 1, 2024, the administration fees for Series A, Series D, Series DZ and Series F units will be reduced to 0.05% from 0.10%. PAST PERFORMANCE

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional units of the Fund and would be lower if distributions were not reinvested. The performance information does not take into account sales, redemption, distribution, optional charges or income taxes payable that would have reduced returns or performance. Past performance does not necessarily indicate how the Fund may perform in the future. A fund with more than 10 years of performance history is only permitted to disclose the past 10 years.
