MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

The Fund seeks to provide long-term capital growth, with a secondary focus on modest income, by investing primarily in Canadian, U.S. and international equities and fixed-income securities, either directly or indirectly through investment in other funds managed by RBC GAM or an affiliate of RBC GAM (called the “underlying funds”). The Fund follows a socially responsible approach to investing. It is currently expected that the Fund will invest up to 100% of its net assets in units of the RBC Vision Bond Fund, the RBC Vision Canadian Equity Fund and the RBC Vision Global Equity Fund.

To achieve the Fund’s objectives, the portfolio manager of an underlying fund begins by screening companies using environmental, social and governance (“ESG”) exclusion criteria that determine its investable universe. RBC GAM has partnered with Sustainalytics to implement the ESG exclusion criteria and to identify issuers for the Fund’s exclusion list.

With the exception of government and quasi-government bonds, Sustainalytics bases the ESG exclusion criteria on one or more of three categories, as applicable: Product Involvement, ESG Controversies and Relative Scoring.

The Product Involvement criteria excludes securities of issuers that are engaged primarily in the production and distribution of alcohol, gambling, weapons, adult entertainment, cannabis or tobacco products. Involvement is based on revenues derived from these activities, based on data collected by Sustainalytics.

The ESG Controversies criteria exclude securities of issuers involved in ‘Category 5 – Severe’ or ‘Category 4 – High’ controversies, as determined by Sustainalytics’ Controversy Rating. Sustainalytics’ Controversy Rating is based on its assessment of an issuer’s involvement in incidents with negative E, S, and G implications.

The Relative Scoring criteria exclude securities of issuers assessed as ‘worst-in-class’. In order to be classified as worst-in-class, Sustainalytics must assign an ESG Risk Rating of Severe Risk and the issuer’s ESG Risk Rating must rank in the bottom quartile of its subindustry peer group. Sustainalytics’ ESG Risk Rating measures an issuer’s unmanaged ESG risk, or the degree to which a company’s economic value is at risk driven by ESG factors.

With respect to government and quasi-government bonds, the Country Risk Rating criteria exclude governments and government-related entities from countries with ESG Factors Letter Grade of ‘D’ or ‘E’, as determined by Sustainalytics. Sustainalytics uses a five-level ESG scale for its Country Risk Rating, with the highest possible letter grade being ‘A’ and the lowest being ‘E’. Sustainalytics’ Country Risk Rating measures the risk to a country’s long-term prosperity and

economic development by assessing the national wealth of a country and its ability to utilize and manage this wealth in an effective and sustainable manner.

On a monthly basis, Sustainalytics provides RBC GAM with a list of ineligible issuers based on an underlying fund’s exclusion criteria. Sustainalytics periodically conducts reviews of an underlying fund’s holdings against the exclusion list. An underlying fund may from time to time depart from its exclusion list when RBC GAM has determined that it would be in the best interest of the underlying fund to do so.

The portfolio manager of the underlying fund then applies its multi-disciplined investment process to select securities for the underlying fund. This includes the incorporation of material ESG factors to consider issuers’ oversight and management of these material ESG factors.

Results of Operations

The Fund’s net asset value was \$1.2 billion as of June 30, 2023.

Over the past six months, the Fund’s Series F units gained 3.6%. The Fund’s return is after the deduction of fees and expenses. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of any other series, which may vary because of differences in management fees and expenses.

Financial markets offered decent returns in the first half of 2023 even as macroeconomic conditions deteriorated. Among the factors that supported equities and bonds were optimism that central banks were nearing the end of the current cycle of interest-rate hikes and the superb performance of a handful of technology stocks tipped to benefit from the increased use of artificial intelligence (“AI”). These positives were offset by tighter financial conditions and slower-than-expected growth in China, the world’s second-largest economy. Also bolstering expansions in North America and Europe were declines in oil prices as the economic impact of Russia’s war on Ukraine, which entered its second year, receded somewhat.

The Fund had a neutral position in both stocks and bonds. Canadian bonds rose in the first half of 2023, reversing some of the losses incurred in 2021 and 2022, on expectations that the Bank of Canada (the “BOC”) would decrease the speed at which it raised interest rates amid slowing economic growth. The BOC increased interest rates twice during the period, representing a slower pace of rate hikes than in 2022 and resulting in a benchmark rate of 4.75%. The U.S. Federal Reserve continued raising its short-term benchmark rate, also at a reduced pace, leaving the benchmark rate in a range of 5% to 5.25%. Yields on short-maturity bonds rose more than those on long-maturity issues, indicating that investors anticipate a

recession in the future. Canadian government bonds underperformed their U.S. counterparts as Canadian growth was stronger than many investors had expected. Returns in the fixed-income segment of the portfolio were boosted by the RBC Vision Bond Fund.

The stock-market rebound continued into 2023, propelled by diminishing investor concerns regarding inflation and fewer worries about the sustainability of economic growth. The rally was initially broad-based across regions, but returns in the final months of the period were concentrated in a narrow set of U.S. mega-cap technology stocks. Apart from the U.S. large-cap market, which was fuelled by excitement about AI, most major indexes were flat or down. In emerging markets, technology-heavy Taiwan and South Korea gained after underperforming significantly in 2022. Emerging-market equities finished the period up but underperformed developed-market stocks. Returns were bolstered by the RBC Vision Canadian Equity Fund and the RBC Vision Global Equity Fund.

In the first half of 2023, two issuers were deemed ineligible by Sustainalytics and subsequently removed from the RBC Vision Bond Fund, an underlying fund of the Fund, for failing to meet the RBC Vision Bond Fund's ESG exclusion criteria. Vancouver Airport Fuel Facilities Corp. was divested from the RBC Vision Bond Fund because the issuer had poor ESG performance relative to its industry peers under the Fund's Relative Scoring criteria. Specifically, the issuer's overall level of unmanaged ESG risk, as measured by Sustainalytics' ESG Risk Rating, was considered 'severe', and ranked in the bottom quartile compared with its industry peers, as defined by Sustainalytics. This stemmed from the lack of ESG-related disclosure published by the company, which Sustainalytics considered inadequate compared with the issuer's peers at the time of removal. In addition, Alectra Inc. was divested from the RBC Vision Bond Fund because the issuer had poor ESG performance relative to its industry peers under the Fund's Relative Scoring criteria. Specifically, the issuer's overall level of unmanaged ESG risk, as measured by Sustainalytics' ESG Risk Rating, was considered 'severe', and ranked in the bottom quartile compared with its industry peers, as defined by Sustainalytics. Further research conducted by Sustainalytics later in the year determined that the issuer's ESG Risk Rating was no longer considered 'severe', and did not rank in the bottom quartile compared with its industry peers, as defined by Sustainalytics. The RBC Vision Bond Fund reinvested in the issuer once it became eligible again based on the RBC Vision Bond Fund's ESG exclusion criteria. No other material investment decision was made based on the ESG exclusion criteria in the first half of 2023. In the first half of 2023, one issuer was deemed ineligible by Sustainalytics and subsequently removed from the RBC Vision Canadian Equity Fund, an underlying fund of the Fund, for failing to meet the RBC Vision Canadian Equity Fund's ESG exclusion criteria.

In this instance, SilverCrest Metals Inc. was divested from the RBC Vision Canadian Equity Fund because the issuer had poor ESG performance relative to its industry peers under the Fund's Relative Scoring criteria. Specifically, the issuer's overall level of unmanaged ESG risk, as measured by Sustainalytics' ESG Risk Rating, was considered 'severe', and ranked in the bottom quartile compared with its industry peers, as defined by Sustainalytics. No other material investment decision was made based on the ESG exclusion criteria in the first half of 2023. In the opinion of Sustainalytics and RBC GAM, all other holdings in the RBC Vision Balanced Fund, including its underlying funds, were eligible at the time of review.

Recent Developments

The global economy is slowing as higher borrowing costs and tighter financial conditions weigh on activity. At this late stage in the business cycle and with inflation gradually falling, short-term interest rates are likely nearing their peak, bonds are more appealing than they've been in a long time, and equity markets could be vulnerable to correction should a recession materialize. The risk premium of stocks to bonds is currently small and, given the portfolio manager's base case that the economy is headed for a recession over the next year, the Fund is reluctant to hold an overweight position in stocks at this time. As a result, the portfolio manager trimmed the stock allocation by 2 percentage points during the period. The Fund's allocations to stocks, bonds and cash are now all in line with the portfolio manager's strategic neutral levels.

Effective January 1, 2023, Suromitra Sanatani was appointed as Chair of the Independent Review Committee ("the IRC"). Effective February 1, 2023, Joanne Vézina was appointed as a member of the IRC. Effective March 1, 2023, Enrique Cuyegkeng was appointed as a member of the IRC.

¹ The management expense ratio ("MER") is based on the direct expenses charged to the Fund and the Fund's proportionate share of the expenses of underlying funds, if any, for the stated period, excluding commissions and other portfolio transaction costs, and is expressed as an annualized percentage of the daily average net asset value during the period. RBC GAM may, at its discretion and without notice to unitholders, waive or absorb certain operating expenses. MER includes the waiver or absorption by RBC GAM of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by RBC GAM.

² The Fund's portfolio turnover rate gives an indication of the level of activity employed by the portfolio manager. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund. The portfolio turnover rate is not applicable to money market funds.

³ The trading expense ratio represents total commissions and other portfolio transaction costs of the Fund and the Fund's proportionate share of such costs of underlying funds expressed as an annualized percentage of daily average net asset value during the period. The trading expense ratio is not applicable to fixed-income transactions.

PAST PERFORMANCE

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional units of the Fund and would be lower if distributions were not reinvested. The performance information does not take into account sales, redemption, distribution, optional charges or income taxes payable that would have reduced returns or performance. Past performance does not necessarily indicate how the Fund may perform in the future. A fund with more than 10 years of performance history is only permitted to disclose the past 10 years.

Year-by-Year Returns (%)

The bar chart indicates the Fund’s performance for each of the years shown, and illustrates how the Fund’s performance has changed from year to year. The bar chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the end of the financial year or interim period.

Series DZ and Series O units have been available for sale to unitholders since May 19, 2017.

Inception dates are not provided for series that have been in existence for more than 10 years.

Advisor Series units with a deferred sales charge option were re-designated as Series A units effective April 11, 2022. Series DZ units of the Fund are capped and are no longer available for purchase by new investors effective June 30, 2017.
