MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

The Fund seeks to provide long-term capital growth, with a secondary focus on modest income, by investing primarily in Canadian, U.S. and international equities and fixed-income securities, either directly or indirectly through investment in other funds managed by RBC GAM or an affiliate of RBC GAM (called the “underlying funds”). The Fund follows a socially responsible approach to investing. It is currently expected that the Fund will invest up to 100% of its net assets in units of the RBC Vision Bond Fund, the RBC Vision Canadian Equity Fund and the RBC Vision Global Equity Fund.

To achieve the Fund’s objectives, the portfolio manager of an underlying fund begins by screening companies using environmental, social and governance (“ESG”) exclusion criteria that determine its investable universe. RBC GAM has partnered with Sustainalytics to implement the ESG exclusion criteria and to identify issuers for the Fund’s exclusion list.

With the exception of government and quasi-government bonds, Sustainalytics bases the ESG exclusion criteria on one or more of three categories, as applicable: Product Involvement, ESG Controversies and Relative Scoring.

The Product Involvement criteria exclude securities of issuers that are engaged primarily in the production and distribution of alcohol, gambling, weapons, adult entertainment, cannabis or tobacco products. Involvement is based on revenues derived from these activities, based on data collected by Sustainalytics.

The ESG Controversies criteria exclude securities of issuers involved in ‘Category 5 – Severe’ or ‘Category 4 – High’ controversies, as determined by Sustainalytics’ Controversy Rating. Sustainalytics’ Controversy Rating is based on its assessment of an issuer’s involvement in incidents with negative E, S, and G implications.

The Relative Scoring criteria exclude securities of issuers assessed as ‘worst-in-class’. In order to be classified as worst-in-class, Sustainalytics must assign an ESG Risk Rating of Severe Risk and the issuer’s ESG Risk Rating must rank in the bottom quartile of its subindustry peer group. Sustainalytics’ ESG Risk Rating measures an issuer’s unmanaged ESG risk, or the degree to which a company’s economic value is at risk driven by ESG factors.

With respect to government and quasi-government bonds, the Country Risk Rating criteria exclude governments and government-related entities from countries with ESG Factors Letter Grade of ‘D’ or ‘E’, as determined by Sustainalytics. Sustainalytics uses a five-level ESG scale for its Country Risk Rating, with the highest possible letter grade being ‘A’ and the lowest being ‘E’. Sustainalytics’ Country Risk Rating measures the risk to a country’s

long-term prosperity and economic development by assessing the national wealth of a country and its ability to utilize and manage this wealth in an effective and sustainable manner.

On a monthly basis, Sustainalytics provides RBC GAM with a list of ineligible issuers based on an underlying fund’s exclusion criteria. Sustainalytics periodically conducts reviews of an underlying fund’s holdings against the exclusion list. An underlying fund may from time to time depart from its exclusion list when RBC GAM has determined that it would be in the best interest of the underlying fund to do so.

The portfolio manager of the underlying fund then applies its multi-disciplined investment process to select securities for the underlying fund. This includes the incorporation of ESG factors to the extent that an issuer’s management and exposure to such ESG factors are material to the risk-adjusted long-term performance of the security and/or the underlying fund.

Results of Operations

The Fund’s net asset value was \$1.1 billion as of June 30, 2025.

Over the past six months, the Fund’s Series F units gained 3.9%. The Fund’s return is after the deduction of fees and expenses. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of any other series, which may vary because of differences in management fees and expenses.

Trade negotiations dominated the direction of financial markets during the first six months of 2025 as early optimism that the Trump administration would focus on deregulating the economy gave way to concern that he would instead implement across-the-board tariffs on U.S. trade partners. The outlook subsequently improved as the U.S. administration reached trade agreements that ensured a worst-case scenario would not unfold. Geopolitical turmoil in the Middle East sent oil prices surging toward the end of the period on fears of a wider conflict and instability in the region, but they came back down after tensions eased. The U.S. Federal Reserve left its benchmark interest rate unchanged in a range between 4.25% and 4.50% as concern that the tariff war would spark inflation outweighed worries that the economy was slowing.

The Fund’s overweight position in equities and neutral position in fixed income had a positive impact on performance. Government fixed income delivered overall gains in the first half of 2025, as coupon income from bonds issued in the U.S. and China and rising bond prices in emerging markets offset the negative impact of rising interest rates – and falling bond prices – in Europe and Japan. Investors faced challenges ranging from the inflationary and growth effects of Trump’s tariffs to the outbreak of war between Israel and Iran. Canadian bonds delivered minimal returns through the first

six months of 2025, as concerns regarding higher-than-expected inflation from U.S. tariffs led investors to demand higher yields on most fixed-income securities. The Bank of Canada cut interest rates twice early in the year, bringing the policy rate down by 2.25 percentage points since June 2024 to 2.75% as of June 30 of this year. Riskier emerging-market bonds delivered strong gains, outperforming investment-grade issuers such as China, Malaysia and Indonesia. Returns in the fixed-income segment of the portfolio were boosted by the RBC Vision Bond Fund.

U.S. stocks retreated from all-time highs established early in the year after Trump announced his tariffs but then rebounded to finish the period near their highs. The Information Technology sector continued to support U.S. equities, while the Consumer Discretionary sector lagged. European stocks outperformed U.S. stocks due to a shift by investors to euro-denominated assets, as well as Germany's decision to boost government spending after decades of conservative fiscal policy. In emerging markets, an equity recovery in China, which accounts for about a third of the emerging-market benchmark, bolstered emerging-market equity performance. One of the most notable emerging-market developments in 2025 was the release of an artificial-intelligence ("AI") model introduced by China's DeepSeek. The release of this AI service, which might be competitive with U.S. AI leaders such as ChatGPT, boosted investor impressions of Chinese technology companies and emerging-market technology stocks in general. Returns were bolstered by the RBC Vision Canadian Equity Fund and the RBC Vision Global Equity Fund.

Sustainalytics conducted a review covering the Fund's holdings in the first half of 2025. In the opinion of Sustainalytics and RBC GAM, all holdings in the Fund were eligible in the latest review based on the Fund's ESG exclusion criteria. During the first half of the year, no holdings were removed from the Fund for failing to meet the ESG exclusion criteria.

Recent Developments

Tariffs will exert a substantial drag on economic growth over the second half of 2025, but probably not to the extent of causing a global recession. Considering the short-term risks and the long-term opportunities, the portfolio manager is maintaining an asset allocation that is relatively close to neutral given heightened uncertainty in the macroeconomic backdrop and the portfolio manager's view that the risk premium between stocks and bonds is relatively small. The portfolio manager looks for mid-single-digit returns from sovereign bonds over the year ahead, with only modest valuation risk. Stocks offer slightly better return potential, particularly outside of U.S. large caps, and the portfolio manager added to the equity allocation. Within the equity regional mix, the portfolio manager has tilted away from expensive U.S. large-cap stocks in favour of non-U.S. stocks, particularly in Europe, where valuations are more appealing.

¹ The management expense ratio ("MER") is based on the direct expenses charged to the Fund and the Fund's proportionate share of the expenses of underlying funds, if any, for the stated period, excluding commissions and other portfolio transaction costs, and is expressed as an annualized percentage of the daily average net asset value during the period. RBC GAM may, at its discretion and without notice to unitholders, waive or absorb certain operating expenses. MER includes the waiver or absorption by RBC GAM of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by RBC GAM.

² The Fund's portfolio turnover rate gives an indication of the level of activity employed by the portfolio manager. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund. The portfolio turnover rate is not applicable to money market funds.

³ The trading expense ratio represents total commissions and other portfolio transaction costs of the Fund and the Fund's proportionate share of such costs of underlying funds expressed as an annualized percentage of daily average net asset value during the period. The trading expense ratio is not applicable to fixed-income transactions.

Effective July 1, 2024, the administration fees for Series A, Series D, Series DZ and Series F units were reduced to 0.05% from 0.10%. If the changes to the administration fees would have been in effect throughout the financial year ended December 31, 2024, the adjusted MER for each series of the Fund would be: Series A – 2.02%, Series D – 1.15%, Series DZ – 0.87% and Series F – 0.90%.

PAST PERFORMANCE

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional units of the Fund and would be lower if distributions were not reinvested. The performance information does not take into account sales, redemption, distribution, optional charges or income taxes payable that would have reduced returns or performance. Past performance does not necessarily indicate how the Fund may perform in the future. A fund with more than 10 years of performance history is only permitted to disclose the past 10 years.

Year-by-Year Returns (%)

The bar chart indicates the Fund’s performance for each of the years shown, and illustrates how the Fund’s performance has changed from year to year. The bar chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the end of the financial year or interim period.

Series DZ and Series O units have been available for sale to unitholders since May 19, 2017.

Inception dates are not provided for series that have been in existence for more than 10 years.

Series DZ units of the Fund are capped and are no longer available for purchase by new investors effective June 30, 2017.

For the 12-month periods ended December 31 and the six-month period ended June 30, 2025.
