MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

The Fund seeks to provide long-term capital growth. To achieve its objective, the sub-advisor invests in a diversified mix of companies operating in countries around the world across a range of sectors. The sub-advisor assesses the economic outlook for regions throughout the world, including expected growth, market valuations and economic trends, and reviews economic, industry and company-specific information to assess the growth prospects for the company. While the Fund invests in a more concentrated portfolio of securities and primarily in large-cap stocks, it may also invest in small- to mid-cap stocks.

Results of Operations

The Fund's net asset value was \$2.5 billion as of June 30, 2025.

Over the past six months, the Fund's Series F units gained 2.0%. The Fund's return is after the deduction of fees and expenses. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of any other series, which may vary because of differences in management fees and expenses.

Optimism early in the period that the Trump administration would focus on deregulating the economy and boosting economic growth quickly gave way to concern over the impact of trade tariffs. Announced tariff levels threatened to significantly disrupt supply chains and raise U.S. retail prices, potentially pushing the U.S. into recession. Meanwhile, increasing geopolitical concerns caused several European governments to increase spending on rearmament, supporting economic-growth forecasts in the region. The differing economic outlooks led non-U.S. investors to repatriate assets and resulted in a rare period of underperformance for U.S. financial markets.

Trade policy uncertainty declined as the period progressed after the U.S. announced that the imposition of extremely high tariffs would be delayed until July, allowing time for a negotiated outcome. Global equity markets rallied from this point, with investors returning to companies linked to artificial-intelligence technology, and the threat of a U.S. recession receded.

The Fund benefited from not owning Apple Inc., which underperformed. Positions in Safran and Netflix also aided returns. Performance was limited by holdings in UnitedHealth Group, Recruit Holdings and Salesforce.

Recent Developments

The macroeconomic situation remains supportive for capital markets, with inflation and interest rates on a gradually declining trend. However, U.S.-policy uncertainty and geopolitical events have contributed to recent volatility and have the potential to continue to

do so over the balance of the year. Equity markets have been resilient with technological and industry change, contributing to the positive development. It continues to be the opinion of the sub-advisor that companies with strong balance sheets and dependable earnings will be best positioned to navigate the potential difficulties ahead while harnessing the opportunities offered by technological change.

Related-Party Transactions

Manager, Trustee and Portfolio Manager

RBC GAM is an indirect, wholly owned subsidiary of Royal Bank of Canada ("Royal Bank") and is the manager, trustee and portfolio manager of the Fund. RBC GAM is responsible for the Fund's day-to-day operations, holds title to the Fund's property on behalf of its unitholders, provides investment advice and portfolio management services to the Fund and appoints distributors for the Fund. RBC GAM is paid a management fee by the Fund as compensation for its services. The Fund pays a fixed administration fee to RBC GAM, which, in turn, pays certain operating expenses of the Fund. Both the management fee and fixed administration fee are calculated and accrued daily as a percentage of the net asset value of each series of units of the Fund. RBC GAM, as trustee, earns a fee, which is paid by the manager from the fixed administration fee paid by the Fund.

RBC GAM or its affiliates may earn fees and spreads in connection with various services provided to, or transactions with, the Fund, such as banking, brokerage, securities lending, foreign exchange and derivatives transactions. RBC GAM or its affiliates may earn a foreign exchange spread when unitholders switch between series of funds denominated in different currencies. The Fund also maintains bank accounts and overdraft provisions with Royal Bank for which Royal Bank may earn a fee. Affiliates of RBC GAM that provide services to the Fund in the course of their normal businesses are discussed below.

Distributors

RBC GAM, Royal Mutual Funds Inc., RBC Direct Investing Inc., RBC Dominion Securities Inc. and Phillips, Hager & North Investment Funds Ltd. are principal distributors of, or may distribute certain series of units of, the Fund. The applicable standing instructions require that Related-Party Trading Activities and Inter-Fund Trading be conducted in accordance with RBC GAM policy and that RBC GAM advise the Independent Review Committee of a material breach of any standing instruction. RBC GAM policy requires that an investment decision in respect of Related-Party Trading Activities (i) is made free from any influence of Royal Bank or its associates or affiliates and without taking into account any consideration relevant to Royal Bank or its affiliates or associates, (ii) represents the business judgment of the portfolio manager, uninfluenced by considerations other than the best interests of the Fund, (iii) is in compliance with RBC GAM policies and procedures, and (iv) achieves a fair and reasonable result for the Fund. ¹ The management expense ratio ("MER") is based on the direct expenses charged to the Fund and the Fund's proportionate share of the expenses of underlying funds, if any, for the stated period, excluding commissions and other portfolio transaction costs, and is expressed as an annualized percentage of the daily average net asset value during the period. RBC GAM may, at its discretion and without notice to unitholders, waive or absorb certain operating expenses. MER includes the waiver or absorption by RBC GAM of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by RBC GAM.

² The Fund's portfolio turnover rate gives an indication of the level of activity employed by the portfolio manager. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund. The portfolio turnover rate is not applicable to money market funds.

³ The trading expense ratio represents total commissions and other portfolio transaction costs of the Fund and the Fund's proportionate share of such costs of underlying funds expressed as an annualized percentage of daily average net asset value during the period. The trading expense ratio is not applicable to fixed-income transactions.

⁴ From September 15, 2021.

⁵ From March 29, 2021.
