MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

The Fund seeks to provide long-term capital growth by investing primarily in equity securities of companies located or having a principal business interest in Asian markets such as Hong Kong, South Korea, China, Taiwan, Australia, New Zealand, Singapore, India, Malaysia, Thailand, the Philippines and Indonesia. The Fund does not invest in Japan.

To achieve the Fund's objectives, the portfolio manager uses primarily fundamental research to assess the economic outlook for the Asian region, including expected growth, market valuations and economic trends. The portfolio manager may invest as much as 10% of the Fund's assets in other funds managed by RBC GAM or an affiliate of RBC GAM.

Results of Operations

The Fund's net asset value was \$3.0 billion as of June 30, 2023.

Over the past six months, the Fund's Series F units gained 0.4%. The Fund's return is after the deduction of fees and expenses. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of any other series, which may vary because of differences in management fees and expenses.

Asian equities delivered gains during the period, driven by strong returns from Taiwan and South Korea, while China and Hong Kong limited performance. Semiconductor stocks in Taiwan and South Korea did well given the emergence of artificial intelligence as a key focus for investors and demand for electric-vehicle chips, offsetting weak demand from smartphones.

The economic recovery in China was weaker than expected, especially in manufacturing given a slowdown in industrial production. Business restrictions linked to geopolitical tensions cast a further pall on the outlook. In May, Japan announced plans to restrict exports of advanced semiconductor-manufacturing equipment to China, with China in turn banning a major U.S. chipmaker from participating in infrastructure projects.

The Information Technology and Industrials sectors performed well while Consumer Discretionary, Financials and Health Care trailed. The portfolio's higher exposure to the Consumer Discretionary sector hurt relative returns.

The Fund's performance was helped by holdings in Aspeed, a Taiwanese designer of integrated circuits that will benefit from capital spending on artificial intelligence. Also bolstering returns was the Fund's investment in Tata Motors, the Indian automaker that has improved profit margins as it focuses on its Jaguar and Land Rover

luxury brands. Limiting the Fund's relative performance was an allocation to China Merchants Bank, which, with other Chinese banks, was hurt by lower profit margins after interest rates were cut and given weaker returns from sales of investment products.

During the first half of the year, the Fund eliminated positions in Hyundai Heavy Industries, a South Korean shipbuilder, and Haier Smart Home, a Chinese appliance company. The Fund initiated a position in Sands China, which operates resorts in Macau, and Shenzhen Inovance, a Chinese industrial-automation company.

Recent Developments

The sub-advisor expects Asian economic growth to remain steady over the remainder of 2023, with solid growth in India and Indonesia driven by domestic demand and capital investment. The sub-advisor has reduced its growth forecasts for China as the post-COVID recovery has lost steam and the property sector remains weak. Most Asian central banks have halted rate hikes, and the sub-advisor expects them to start cutting rates as early as late 2023.

Effective January 1, 2023, Suromitra Sanatani was appointed as Chair of the Independent Review Committee ("the IRC"). Effective February 1, 2023, Joanne Vézina was appointed as a member of the IRC. Effective March 1, 2023, Enrique Cuyegkeng was appointed as a member of the IRC.

1 The management expense ratio ("MER") is based on the direct expenses charged to the Fund and the Fund's proportionate share of the expenses of underlying funds, if any, for the stated period, excluding commissions and other portfolio transaction costs, and is expressed as an annualized percentage of the daily average net asset value during the period. RBC GAM may, at its discretion and without notice to unitholders, waive or absorb certain operating expenses. MER includes the waiver or absorption by RBC GAM of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by RBC GAM.

2 The Fund's portfolio turnover rate gives an indication of the level of activity employed by the portfolio manager. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund. The portfolio turnover rate is not applicable to money market funds.

3 The trading expense ratio represents total commissions and other portfolio transaction costs of the Fund and the Fund's proportionate share of such costs of underlying funds expressed as an annualized percentage of daily average net asset value during the period. The trading expense ratio is not applicable to fixed-income transactions.

Management Fees and Administration Fees

Management fees and administration fees of each series of the Fund are payable to RBC GAM and calculated at the following annual percentages, before GST/HST, of the daily net asset value of each series of the Fund. The management fee, breakdown of services received in consideration of the management fee, as a percentage of the management fee, and the administration fee for each series are as follows:

	Management Fees	Breakdown of Services		Administration Fees
		Distribution	Other*	
Series A	1.85%	54%	46%	0.15%
Series D	1.10%	23%	77%	0.15%
Series F	0.85%	—	100%	0.15%
Series O	n/a	n/a	n/a	0.02%

Series O – no management fees are paid by the Fund with respect to Series O units. Series O unitholders pay a negotiated fee directly to RBC GAM for investment-counselling services.

* Includes all costs related to management, trustee, investment advisory services, general administration and profit.

PAST PERFORMANCE

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional units of the Fund and would be lower if distributions were not reinvested. The performance information does not take into account sales, redemption, distribution, optional charges or income taxes payable that would have reduced returns or performance. Past performance does not necessarily indicate how the Fund may perform in the future. A fund with more than 10 years of performance history is only permitted to disclose the past 10 years.

Year-by-Year Returns (%)

The bar chart indicates the Fund's performance for each of the years shown, and illustrates how the Fund's performance has changed from year to year. The bar chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the end of the financial year or interim period.

Series F (%)

Series O (%)

Series A, Series D, Series F and Series O units have been available for sale to unitholders since March 10, 2014.

Inception dates are not provided for series that have been in existence for more than 10 years.

For the 12-month periods ended December 31 and the six-month period ended June 30, 2023.
