MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

The Fund seeks to provide a combination of capital growth and modest income by investing primarily in a diversified portfolio of income-producing equity and fixed-income securities from anywhere around the world either directly or indirectly through investment in other funds managed by RBC GAM or an affiliate of RBC GAM (called the “underlying funds”). The Fund may also invest in emerging-market equity securities and emerging-market government and corporate bonds.

The Fund’s target weightings for each asset class are 40% for fixed-income and 60% for equities. The target weightings for each class may be adjusted based on changes in the market outlook for each asset class. The actual allocation to each class will be no more than 15% above or below its target weighting.

Results of Operations

The Fund’s net asset value was \$1.4 billion as of June 30, 2023.

Over the past six months, the Fund’s Series F units gained 4.6%. The Fund’s return is after the deduction of fees and expenses. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of any other series, which may vary because of differences in management fees and expenses.

Financial markets offered decent returns in the first half of 2023 even as macroeconomic conditions deteriorated. Among the factors that supported equities and bonds were optimism that central banks were nearing the end of the current cycle of interest-rate hikes and the superb performance of a handful of technology stocks tipped to benefit from the increased use of artificial intelligence (“AI”). These positives were offset by tighter financial conditions and slower-than-expected growth in China, the world’s second-largest economy. Also bolstering expansions in North America and Europe were declines in oil prices as the economic impact of Russia’s war on Ukraine, which entered its second year, receded somewhat.

The Fund had a neutral position in both stocks and bonds. Canadian bonds rose in the first half of 2023, reversing some of the losses incurred in 2021 and 2022, on expectations that the Bank of Canada (the “BOC”) would decrease the speed at which it raised interest rates amid slowing economic growth. The BOC increased interest rates twice during the period, representing a slower pace of rate hikes than in 2022 and resulting in a benchmark rate of 4.75%. The U.S. Federal Reserve continued raising its short-term benchmark rate, also at a reduced pace, leaving the benchmark rate in a range of 5% to 5.25%. Yields on short-maturity bonds rose more than

those on long-maturity issues, indicating that investors anticipate a recession in the future. Canadian government bonds underperformed their U.S. counterparts as Canadian growth was stronger than many investors had expected. Returns in the fixed-income segment of the portfolio were boosted by the Phillips, Hager & North Total Return Bond Fund and the BlueBay Global Monthly Income Bond Fund.

The stock-market rebound continued into 2023, propelled by diminishing investor concerns regarding inflation and fewer worries about the sustainability of economic growth. The rally was initially broad-based across regions, but returns in the final months of the period were concentrated in a narrow set of U.S. mega-cap technology stocks. Apart from the U.S. large-cap market, which was fuelled by excitement about AI, most major indexes were flat or down. In emerging markets, technology-heavy Taiwan and South Korea gained after underperforming significantly in 2022. Emerging-market equities finished the period up but underperformed developed-market stocks. In the equity segment of the portfolio, returns were bolstered most by the Fund’s exposure to U.S. and Canadian equities.

Recent Developments

The global economy is slowing as higher borrowing costs and tighter financial conditions weigh on activity. At this late stage in the business cycle and with inflation gradually falling, short-term interest rates are likely nearing their peak, bonds are more appealing than they’ve been in a long time, and equity markets could be vulnerable to correction should a recession materialize. The risk premium of stocks to bonds is currently small and, given the portfolio manager’s base case that the economy is headed for a recession over the next year, the Fund is reluctant to hold an overweight position in stocks at this time. As a result, the portfolio manager trimmed the stock allocation by 2 percentage points during the period. The Fund’s allocations to stocks, bonds and cash are now all in line with the portfolio manager’s strategic neutral levels.

Effective January 1, 2023, Suomitra Sanatani was appointed as Chair of the Independent Review Committee (“the IRC”). Effective February 1, 2023, Joanne Vézina was appointed as a member of the IRC. Effective March 1, 2023, Enrique Cuyegkeng was appointed as a member of the IRC.

The Fund pays a fixed administration fee to RBC GAM, which, in turn, pays certain operating expenses of the Fund. Both the management fee and fixed administration fee are calculated and accrued daily as a percentage of the net asset value of each series of units of the Fund. RBC GAM, as trustee, earns a fee, which is paid by the manager from the fixed administration fee paid by the Fund.

RBC GAM or its affiliates may earn fees and spreads in connection with various services provided to, or transactions with, the Fund, such as banking, brokerage, securities lending, foreign exchange and derivatives transactions. RBC GAM or its affiliates may earn a foreign exchange spread when unitholders switch between series of funds denominated in different currencies. The Fund also maintains bank accounts and overdraft provisions with Royal Bank for which Royal Bank may earn a fee. Registrars

RBC GAM, RBC Investor Services Trust ("RBC IS") or Royal Bank (or a combination thereof) are the registrars of the Fund and keep records of who owns units of the Fund. The registrars earn a fee, which is paid by the manager from the fixed administration fee paid by the Fund.

To the extent the Fund may engage in securities lending transactions, RBC IS may act as the Fund's securities lending agent. Any revenue earned on such securities lending is split between the Fund and the securities lending agent.

¹ The management expense ratio ("MER") is based on the direct expenses charged to the Fund and the Fund's proportionate share of the expenses of underlying funds, if any, for the stated period, excluding commissions and other portfolio transaction costs, and is expressed as an annualized percentage of the daily average net asset value during the period. RBC GAM may, at its discretion and without notice to unitholders, waive or absorb certain operating expenses. MER includes the waiver or absorption by RBC GAM of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by RBC GAM.

² The Fund's portfolio turnover rate gives an indication of the level of activity employed by the portfolio manager. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund. The portfolio turnover rate is not applicable to money market funds.

³ The trading expense ratio represents total commissions and other portfolio transaction costs of the Fund and the Fund's proportionate share of such costs of underlying funds expressed as an annualized percentage of daily average net asset value during the period. The trading expense ratio is not applicable to fixed-income transactions.

Effective April 1, 2022, the administration fees for Series A, Series T5, Series H, Series D, Series F, Series FT5 and Series I units were reduced to 0.05% from 0.10%. If the changes to the administration fees would have been in effect throughout the financial year ended December 31, 2022, the adjusted MER for each series of the Fund would be: Series A – 2.02%, Series T5 – 2.03%, Series H – 1.83%, Series D – 1.19%, Series F – 0.91%, Series FT5 – 0.91% and Series I – 0.75%.

PAST PERFORMANCE

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional units of the Fund and would be lower if distributions were not reinvested. Past performance does not necessarily indicate how the Fund may perform in the future. A fund with more than 10 years of performance history is only permitted to disclose the past 10 years.
