MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

The Fund seeks to provide total returns consisting of interest income and modest capital appreciation by investing primarily in global convertible bonds issued by entities domiciled or carrying out business activities anywhere in the world.

To achieve the Fund's objectives, the sub-advisor conducts detailed credit and equity analysis to identify investment opportunities offering high probabilities of superior rates of return while minimizing the prospect of default.

Results of Operations

The Fund's net asset value was \$1.1 billion as of June 30, 2018.

Over the past six months, the Fund's Series A units gained 1.0%. The Fund's return is after the deduction of fees and expenses. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of any other series, which may vary because of differences in management fees and expenses.

Major equity indexes rose at the start of 2018 as investors anticipated that U.S. tax legislation passed late last year would have a positive impact on corporate profitability and, by extension, convertible bonds, which can be swapped for equity. Stocks then declined amid geopolitical risks, trade tensions and rising U.S. interest rates, the last of which generally makes bonds more competitive with equities. Geopolitical risks came to the fore in March as the Trump administration announced plans to impose tariffs on up to US\$60 billion of annual imports from China and China responded with tariffs of its own. Inflation got a boost from oil prices that hit levels not seen since late 2014. Macroeconomic stress in emerging markets increased toward the end of the period, while in Europe, the installation of an Italian government favouring tighter immigration controls and more government spending raised new questions about the future of the Eurozone.

Holdings that had a positive impact on the Fund's performance included Premier Oil, a U.K. oil and gas exploration company. The stock surged amid rising oil prices and higher-than-expected production at a key project. Microchip Technology's stock rose as the semiconductor manufacturer reported fourth-quarter earnings that beat analysts' estimates and revenue climbed. Shares of ON Semiconductor hit an all-time high in March after the company agreed to provide chips for a Baidu venture that is developing self-driving automobiles.

Holdings that had a negative impact on the Fund's performance included Dish Network, whose stock plunged amid higher costs and increased competition. Mitsubishi Chemical Holdings had a negative impact on performance as the company said next year's financial results would be lower than expected. Toray Industries also held back returns after the company reported financial results that missed analysts' estimates.

Recent Developments

The sub-advisor believes that, for now, investors will focus on the solid economic and corporate fundamentals underpinning growth in the global economy. The sub-advisor remains optimistic about the outlook for convertible bonds and believes that they will continue to produce strong risk-adjusted returns.

RBC GAM, as trustee, earns a fee, which is paid by the manager from the fixed administration fee paid by the Fund.

RBC GAM or its affiliates may earn fees and spreads in connection with various services provided to, or transactions with, the Fund, such as banking, brokerage, securities lending, foreign exchange and derivatives transactions. ¹ The management expense ratio ("MER") is based on expenses for the stated period, excluding commissions and other portfolio transaction costs, and is expressed as an annualized percentage of the daily average net asset value during the period. RBC GAM may, at its discretion and without notice to unitholders, waive or absorb certain operating expenses. MER includes the waiver or absorption by RBC GAM of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by RBC GAM.

² The Fund's portfolio turnover rate gives an indication of the level of activity employed by the portfolio manager. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund. The portfolio turnover rate is not applicable to money market funds.

³ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period. The trading expense ratio is not applicable to fixed-income transactions.

⁴ Effective June 30, 2016, the management fees were changed in respect of Series A, Advisor Series, Advisor T5 Series, Series T5, Series D, Series F and Series FT5 units of the Fund. If the changes to the management fees would have been in effect throughout 2016, the adjusted MER for each series of the Fund would be: Series A – 2.03%, Advisor Series – 2.05%, Advisor T5 Series – 2.02%, Series T5 – 2.06%, Series D – 1.35%, Series F – 1.22% and Series FT5 – 1.21%.

⁵ From April 21, 2014.

Management Fees

RBC GAM is the manager, trustee and portfolio manager of the Fund. Management fees of each series of the Fund are calculated at the annual percentages, before GST/HST, of the daily net asset value of each series of the Fund. The breakdown of the services received in consideration of the management fees for each series, as a percentage of the management fees, is as follows:

	Management Fees	Breakdown of Services	
		Distribution	Other*
Series A	1.65%	44%	56%
Advisor Series	1.65%	44%	56%
Advisor T5 Series	1.65%	44%	56%
Series T5	1.65%	44%	56%
Series H	1.45%	52%	48%
Series D	1.05%	14%	86%
Series F	0.90%	—	100%
Series FT5	0.90%	—	100%
Series I	0.70%	—	100%

Series O – no management fees are paid by the Fund with respect to Series O units. Series O unitholders pay a negotiated fee directly to RBC GAM for investment-counselling services.

* Includes all costs related to management, trustee, investment advisory services, general administration and profit.

PAST PERFORMANCE

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional units of the Fund and would be lower if distributions were not reinvested. The performance information does not take into account sales, redemption, distribution, optional charges or income taxes payable that would have reduced returns or performance. Past performance does not necessarily indicate how the Fund may perform in the future. A fund with more than 10 years of performance history is only permitted to disclose the past 10 years.

Year-by-Year Returns (%)

The bar chart indicates the Fund's performance for each of the years shown, and illustrates how the Fund's performance has changed from year to year. The bar chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the end of the financial year or interim period.
