MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

The Fund seeks to provide total returns consisting of interest income and modest capital appreciation by investing primarily in global convertible bonds, both rated and unrated, issued by entities domiciled or carrying out business activities anywhere in the world.

To achieve the Fund's objectives, the sub-advisor conducts detailed credit and equity analysis to identify investment opportunities offering higher probabilities of superior rates of return while minimizing the prospect of default.

Results of Operations

The Fund's net asset value was \$187 million as of June 30, 2023.

Over the past six months, the Fund's Series F units gained 5.3%. The Fund's return is after the deduction of fees and expenses. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of any other series, which may vary because of differences in management fees and expenses.

Global convertible bonds, which are fixed-income securities that can be exchanged for equity according to preset terms, registered solid gains in the first half of 2023, mirroring the strong returns for risk assets. One of the largest contributors to the Fund's returns came from a position in MongoDB, a U.S.-based database platform whose stock soared following better-than-expected results and perceptions that the company will benefit from artificial intelligence ("AI"). SK Hynix was another beneficiary of the AI rally as it supplies Nvidia with a component for graphics-processing units used by AI developers.

The Fund's holdings in Royal Caribbean rallied as demand for cruises increased following the pandemic. Lenovo, the world's largest PC maker, benefited from signs that PC demand and inventories are rising again after a shortage of components. STMicroelectronics, a leading maker of semiconductors, jumped after the company said 2023 results would exceed investors' expectations, and Li Auto, a Chinese-based electric-vehicle maker, climbed after the company posted a second profitable quarter in a row as revenues nearly doubled.

Wolfspeed, a semiconductor manufacturer, held back returns as the stock fell following disappointing quarterly results. Bilibili, a Chinese gaming company, declined amid weaker-than-expected economic growth, and Sunnova, a solar-equipment producer, fell during the U.S. banking crisis, as investors pulled back from the asset-backed

securities market on which it relies for funding. Southwest Airlines, the low-cost U.S. carrier, declined as the airline continued to deal with fallout from service disruptions.

Portfolio turnover was high for the Fund given unusually volatile financial-market conditions in the first half of 2023.

Recent Developments

Prospects for riskier assets improved this year after a tough 2022, and investor confidence has returned. Equities reflect little lasting fear of the short-lived U.S. banking crisis and concerns that a recession will unfold later this year, especially since inflation appears to have peaked. AI has provided a timely boost to technology stocks, and many convertible-bond issuers have been key beneficiaries. The sub-advisor is optimistic that these headwinds can continue over the medium term and that convertible bonds will continue to deliver attractive risk-adjusted returns.

Effective April 1, 2023, the activities of RBC Global Asset Management (UK) Limited and BlueBay Asset Management LLP were consolidated into RBC Global Asset Management (UK) Limited.

Effective January 1, 2023, the administration fees for Series O units were reduced to 0.05% from 0.10%.

Effective January 1, 2023, Suromitra Sanatani was appointed as Chair of the Independent Review Committee ("the IRC"). Effective February 1, 2023, Joanne Vézina was appointed as a member of the IRC. Effective March 1, 2023, Enrique Cuyegkeng was appointed as a member of the IRC.

¹ The management expense ratio ("MER") is based on the direct expenses charged to the Fund and the Fund's proportionate share of the expenses of underlying funds, if any, for the stated period, excluding commissions and other portfolio transaction costs, and is expressed as an annualized percentage of the daily average net asset value during the period. RBC GAM may, at its discretion and without notice to unitholders, waive or absorb certain operating expenses. MER includes the waiver or absorption by RBC GAM of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by RBC GAM.

² The Fund's portfolio turnover rate gives an indication of the level of activity employed by the portfolio manager. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund. The portfolio turnover rate is not applicable to money market funds.

³ The trading expense ratio represents total commissions and other portfolio transaction costs of the Fund and the Fund's proportionate share of such costs of underlying funds expressed as an annualized percentage of daily average net asset value during the period. The trading expense ratio is not applicable to fixed-income transactions.

Effective January 1, 2023, the administration fees for Series O units were reduced to 0.05% from 0.10%. If the changes to the administration fees would have been in effect throughout the financial year ended December 31, 2022, the adjusted MER for each series of the Fund would be: Series O – 0.05%.

Effective March 1, 2020, the administration fees for Series A, Series T5, Series D, Series F, Series FT5 and Series O units were reduced to 0.10% from 0.20%. Effective January 1, 2020, the management fees for Series A and Series T5 units were reduced to 1.35% from 1.65%; for Series D units were reduced to 0.75% from 1.05%; and for Series F and Series FT5 units were reduced to 0.60% from 0.90%. If the changes to the management fees and administration fees would have been in effect throughout the financial year ended December 31, 2020, the adjusted MER for each series of the Fund would be: Series A – 1.59%, Series T5 – 1.55%, Series D – 0.92%, Series F – 0.77%, Series FT5 – 0.75% and Series O – 0.11%.

Management Fees and Administration Fees

Management fees and administration fees of each series of the Fund are payable to RBC GAM and calculated at the following annual percentages, before GST/HST, of the daily net asset value of each series of the Fund. PAST PERFORMANCE

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional units of the Fund and would be lower if distributions were not reinvested. The performance information does not take into account sales, redemption, distribution, optional charges or income taxes payable that would have reduced returns or performance. Past performance does not necessarily indicate how the Fund may perform in the future. A fund with more than 10 years of performance history is only permitted to disclose the past 10 years.

Year-by-Year Returns (%)

The bar chart indicates the Fund's performance for each of the years shown, and illustrates how the Fund's performance has changed from year to year. The bar chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the end of the financial year or interim period.

Series T5 and Series FT5 units have been available for sale to unitholders since April 21, 2014.
