MANAGEMENT DISCUSSION OF FUND PERFORMANCE (in USD)

Investment Objective and Strategies

The Fund seeks to provide total returns comprised of interest income and modest capital appreciation.

To achieve its objective, the Fund invests primarily in U.S. dollar denominated debt securities of corporations based in emerging market countries. The Fund may also invest in government debt securities of emerging markets and developed countries, as well as emerging market sovereign bonds and government debt securities of developed countries in local currencies or in another G7 currency. The sub-advisor conducts detailed company credit and industry analysis to identify opportunities offering higher probabilities of superior rates of return, while minimizing the prospect of default.

Results of Operations

The Fund's net asset value was \$989 million as of June 30, 2023.

Over the past six months, the Fund's Series F units gained 3.4%. The Fund's return is after the deduction of fees and expenses. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of any other series, which may vary because of differences in management fees and expenses.

The Fund's performance was driven by a strong recovery in emerging-market bonds amid mounting evidence of moderating inflation and positive macroeconomic developments in several emerging markets. President Erdogan of Turkey, who had been known for favouring economic growth even if it meant skyrocketing inflation, appointed orthodox monetary policy after winning recent national elections. This is a welcome change from investors' perspective. Positive political dynamics in countries such as Nigeria and Oman also aided returns.

The portfolio benefited strongly from an overall preference for assets perceived to carry higher risks. A specific holding that bolstered the Fund's performance was Samarco, a Brazilian mining company whose bonds surged amid constructive negotiations on a debt restructuring. The Fund's overweight positions in Ukraine, Argentina and Nigeria also aided relative returns. Investments that had a negative impact on portfolio performance included an overweight position in Chinese real estate and an allocation to Colombia.

Recent Developments

There is a sense of optimism in financial markets lately as inflation in the U.S. shows signs of moderating. This development is encouraging given that economic growth is holding up reasonably well, and it

provides the U.S. Federal Reserve with a pretext for perhaps not following through on its apparent intention to raise its benchmark rate two more times this year.

Emerging-market economies are generally seen to be ahead of the curve, having largely completed their rate-hiking cycles, and with inflation trending consistently lower, investor attention is turning to the possibility of rate cuts beginning later this year. Emerging-market corporate bonds with lower credit ratings offer some opportunities, but the sub-advisor recognizes that valuations have returned to average levels in many areas. Bond yields and income remain attractive relative to history and should continue to support emerging-market bonds.

Effective April 1, 2023, the activities of RBC Global Asset Management (UK) Limited and BlueBay Asset Management LLP were consolidated into RBC Global Asset Management (UK) Limited.

Effective January 1, 2023, the administration fees for Series O units were reduced to 0.05% from 0.10%.

Effective January 1, 2023, Suromitra Sanatani was appointed as Chair of the Independent Review Committee ("the IRC"). Effective February 1, 2023, Joanne Vézina was appointed as a member of the IRC. Effective March 1, 2023, Enrique Cuyegkeng was appointed as a member of the IRC.

Both the management fee and fixed administration fee are calculated and accrued daily as a percentage of the net asset value of each series of units of the Fund. RBC GAM, as trustee, earns a fee, which is paid by the manager from the fixed administration fee paid by the Fund.

RBC GAM or its affiliates may earn fees and spreads in connection with various services provided to, or transactions with, the Fund, such as banking, brokerage, securities lending, foreign exchange and derivatives transactions. RBC GAM or its affiliates may earn a foreign exchange spread when unitholders switch between series of funds denominated in different currencies. The Fund also maintains

¹ The management expense ratio ("MER") is based on the direct expenses charged to the Fund and the Fund's proportionate share of the expenses of underlying funds, if any, for the stated period, excluding commissions and other portfolio transaction costs, and is expressed as an annualized percentage of the daily average net asset value during the period. RBC GAM may, at its discretion and without notice to unitholders, waive or absorb certain operating expenses. MER includes the waiver or absorption by RBC GAM of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by RBC GAM.

² The Fund's portfolio turnover rate gives an indication of the level of activity employed by the portfolio manager. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund. The portfolio turnover rate is not applicable to money market funds.

³ The trading expense ratio represents total commissions and other portfolio transaction costs of the Fund and the Fund's proportionate share of such costs of underlying funds expressed as an annualized percentage of daily average net asset value during the period. The trading expense ratio is not applicable to fixed-income transactions.

Effective January 1, 2023, the administration fees for Series O units were reduced to 0.05% from 0.10%. If the changes to the administration fees would have been in effect throughout the financial year ended December 31, 2022, the adjusted MER for each series of the Fund would be: Series O – 0.06%.

Effective March 1, 2020, the administration fees for Series A, Series D, Series F and Series O units were reduced to 0.10% from 0.20%. If the changes to the administration fees would have been in effect throughout the financial year ended December 31, 2020, the adjusted MER for each series of the Fund would be: Series A – 1.74%, Series D – 1.07%, Series F – 0.93% and Series O – 0.11%.

Effective January 1, 2018, the management fees for Series A units were reduced to 1.50% from 1.65%; for Series D units were reduced to 0.90% from 1.05%; and for Series F units were reduced to 0.75% from 0.90%.

Management Fees and Administration Fees

Management fees and administration fees of each series of the Fund are payable to RBC GAM and calculated at the following annual percentages, before GST/HST, of the daily net asset value of each series of the Fund. The management fee, breakdown of services received in consideration of the management fee, as a percentage of the management fee, and the administration fee for each series are as follows:

	Management Fees	Breakdown of Services		Administration Fees [†]

Series A	1.50%	50%	50%	0.10%
Series D	0.90%	17%	83%	0.10%
Series F	0.75%	—	100%	0.10%
Series O	n/a	n/a	n/a	0.05%

Past performance does not necessarily indicate how the Fund may perform in the future. A fund with more than 10 years of performance history is only permitted to disclose the past 10 years.

Year-by-Year Returns (%)

The bar chart indicates the Fund's performance for each of the years shown, and illustrates how the Fund's performance has changed from year to year.
