MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

The Fund seeks to provide a high level of income with the potential for modest capital growth by investing primarily in higher-yielding corporate debt securities issued by Canadian and U.S. corporations.

To achieve its objectives, the portfolio manager invests primarily in debt securities rated from BBB to B by Standard & Poor's or an equivalent credit-rating company. The portfolio manager employs a value-focused philosophy, striving to invest in quality companies having stable to improving credit profiles, and which are considered undervalued.

Results of Operations

The Fund's net asset value was \$2.2 billion as of June 30, 2023.

Over the past six months, the Fund's Series F units gained 3.6%. The Fund's return is after the deduction of fees and expenses. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of any other series, which may vary because of differences in management fees and expenses.

High-yield bonds outperformed higher-quality Canadian investment-grade bonds during the first half of the year, a period in which inflation eased and expectations increased that central banks were inching closer to halting the current cycle of interest-rate hikes. However, inflation remained higher than the U.S. Federal Reserve was comfortable with, and the ripple effect of several U.S. bank failures and tighter lending standards boosted the risk of a recession.

The premium that investors require to own corporate bonds, known as the spread, fell in January as prices of riskier assets rebounded from losses in 2022. In March, however, the banking crisis emerged, spreading fears of contagion and, in signs of rising investment risk, causing spreads to widen and bond prices to fall. This period of volatility proved short-lived as federal regulators stepped in, allowing high-yield bonds to recapture their gains and lower-quality high-yield bonds to outperform their higher-quality counterparts. Key support for the high-yield market came from a modest supply of newly issued bonds, a shrinking high-yield market due to companies being upgraded to investment grade, and healthy company balance sheets.

The Fund's returns were helped by exposure to high-yield bonds given their outperformance, and specifically by holdings in cruise lines and cinemas, which benefited from strong demand for travel and experiences, and by holdings in the Energy sector. The Fund's underweight position in certain underperforming telecommunications companies also benefited returns. Limiting returns was the Fund's exposure to cable and satellite companies.

Recent Developments

High-yield bonds continue to face an environment characterized by tighter financial conditions, slower growth and elevated recession risks. Defaults have increased and will likely approach levels closer to the longer-term average of 3% to 4%, in the view of the portfolio manager, and it is likely that investors will require higher yield premiums to own riskier bonds.

While valuations of high-yield bonds look reasonable, investors may not be receiving yields adequate to compensate for owning lower-rated corporate bonds in this more difficult macroeconomic environment. On the other hand, default rates on high-yield bonds remain low and companies are maintaining healthy balance sheets. Attractive opportunities have appeared in the investment-grade market, and the portfolio manager is taking advantage of them. The portfolio manager will continue to look for attractive opportunities while remaining cautious about the economic outlook.

Effective January 1, 2023, Suromitra Sanatani was appointed as Chair of the Independent Review Committee ("the IRC"). Effective February 1, 2023, Joanne Vézina was appointed as a member of the IRC. Effective March 1, 2023, Enrique Cuyegkeng was appointed as a member of the IRC.

Related-Party Transactions

Manager, Trustee and Portfolio Manager

RBC GAM is an indirect, wholly owned subsidiary of Royal Bank of Canada ("Royal Bank") and is the manager, trustee and portfolio manager of the Fund. RBC GAM is responsible for the Fund's day-to-day operations, holds title to the Fund's property on behalf of its unitholders, provides investment advice and portfolio management services to the Fund and appoints distributors for the Fund. RBC GAM is paid a management fee by the Fund as compensation for its services. The Fund pays a fixed administration fee to RBC GAM, which, in turn, pays certain operating expenses of the Fund.

Both the management fee and fixed administration fee are calculated and accrued daily as a percentage of the net asset value of each series of units of the Fund. RBC GAM, as trustee, earns a fee, which is paid by the manager from the fixed administration fee paid by the Fund.

RBC GAM or its affiliates may earn fees and spreads in connection with various services provided to, or transactions with, the Fund, such as banking, brokerage, securities lending, foreign exchange and derivatives transactions. RBC GAM or its affiliates may earn a foreign exchange spread when unitholders switch between series of funds denominated in different currencies. Registrars

¹ The management expense ratio ("MER") is based on the direct expenses charged to the Fund and the Fund's proportionate share of the expenses of underlying funds, if any, for the stated period, excluding commissions and other portfolio transaction costs, and is expressed as an annualized percentage of the daily average net asset value during the period. RBC GAM may, at its discretion and without notice to unitholders, waive or absorb certain operating expenses. MER includes the waiver or absorption by RBC GAM of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by RBC GAM.

² The Fund's portfolio turnover rate gives an indication of the level of activity employed by the portfolio manager. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund. The portfolio turnover rate is not applicable to money market funds.

³ The trading expense ratio represents total commissions and other portfolio transaction costs of the Fund and the Fund's proportionate share of such costs of underlying funds expressed as an annualized percentage of daily average net asset value during the period. The trading expense ratio is not applicable to fixed-income transactions.

Management Fees and Administration Fees

Management fees and administration fees of each series of the Fund are payable to RBC GAM and calculated at the following annual percentages, before GST/HST, of the daily net asset value of each series of the Fund. The management fee, breakdown of services received in consideration of the management fee, as a percentage of the management fee, and the administration fee for each series are as follows:

	Management Fees	Breakdown of Services		Administration Fees
		Distribution	Other*	
Series A	1.25%	40%	60%	0.05%
Series D	0.90%	17%	83%	0.05%
Series F	0.75%	—	100%	0.05%
Series O	n/a	n/a	n/a	0.02%

Series O – no management fees are paid by the Fund with respect to Series O units. Series O unitholders pay a negotiated fee directly to RBC GAM for investment-counselling services.

* Includes all costs related to management, trustee, investment advisory services, general administration and profit.

PAST PERFORMANCE

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional units of the Fund and would be lower if distributions were not reinvested. The performance information does not take into account sales, redemption, distribution, optional charges or income taxes payable that would have reduced returns or performance. Past performance does not necessarily indicate how the Fund may perform in the future. A fund with more than 10 years of performance history is only permitted to disclose the past 10 years.

Year-by-Year Returns (%)

The bar chart indicates the Fund's performance for each of the years shown, and illustrates how the Fund's performance has changed from year to year. The bar chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the end of the financial year or interim period.

Inception dates are not provided for series that have been in existence for more than 10 years.

Advisor Series units with a deferred sales charge option were re-designated as Series A units effective April 11, 2022.

For the 12-month periods ended December 31 and the six-month period ended June 30, 2023.
