MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

The Fund seeks to provide long-term capital growth by investing primarily in equity securities of a diversified mix of companies operating in various countries around the world across a range of sectors.

The Fund invests in stocks that have undergone a selection process emphasizing companies with the ability to grow their dividends over time, a sustainable competitive advantage, high and sustainable profitability and strong management teams.

Results of Operations

The Fund's net asset value was \$5.4 billion as of June 30, 2021.

Over the past six months, the Fund's Series A units gained 9.6%. The Fund's return is after the deduction of fees and expenses. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of any other series, which may vary because of differences in management fees and expenses.

Global equities extended their gains during the first half of 2021, with companies that had been most hurt by the pandemic taking over as the leading performers on optimism that vaccination programs and fiscal stimulus would lead to a strong economic recovery.

Traditional energy stocks were notably strong as they benefited from higher oil prices, while producers of renewable energy underperformed. Companies with high levels of debt and weak profit margins also climbed as economic optimism rebounded. This "reopening trade" held back portfolio returns, especially during the first half of 2021, because of its focus on identifying sustainable businesses that are more likely to reward investors over the longer term. Investments held in the Fund tend to be more robust and therefore less likely than weak businesses to bounce as strongly when "hope" returns in a market recovery.

Among individual holdings, Blackstone Group was the top contributor to relative returns, followed by NVIDIA and Microsoft. Ørsted had the most negative impact on performance, followed by Neste Oyj and MarketAxess Holdings.

Recent Developments

The power of the reopening trade has dissipated as a more normal business environment takes hold, allowing investors to refocus on business measures that tend to be the strongest determinants of long-term share-price performance. The economic recovery should ultimately lead to a scaling back in monetary and fiscal stimulus, and investors' attention appears to be turning toward how these shifts are achieved. The sub-advisor is cognizant that any such steps

have the potential to create financial-market volatility if not well communicated by policymakers and therefore continues to focus on portfolio construction to minimize risks.

Effective February 28, 2021, Ms. Catherine J. Kloepper resigned as Vice Chair of the Independent Review Committee (the "IRC"). Effective March 22, 2021, Mr. Paul K. Bates was appointed as Vice Chair of the IRC. Effective April 1, 2021, Ms. Brenda Eaton was appointed as a member of the IRC.

RBC GAM is paid a management fee by the Fund as compensation for its services. The Fund pays a fixed administration fee to RBC GAM, which, in turn, pays certain operating expenses of the Fund. Both the management fee and fixed administration fee are calculated and accrued daily as a percentage of the net asset value of each series of units of the Fund. RBC GAM, as trustee, earns a fee, which is paid by the manager from the fixed administration fee paid by the Fund.

RBC GAM or its affiliates may earn fees and spreads in connection with various services provided to, or transactions with, the Fund, such as banking, brokerage, securities lending, foreign exchange and derivatives transactions. RBC GAM or its affiliates may earn a foreign exchange spread when unitholders switch between series of funds denominated in different currencies. The Fund also maintains bank accounts and overdraft provisions with Royal Bank for which Royal Bank may earn a fee. Affiliates of RBC GAM that provide services to the Fund in the course of their normal businesses are discussed below.

Sub-Advisor

Distributors

RBC GAM, Royal Mutual Funds Inc., RBC Direct Investing Inc., RBC Dominion Securities Inc. and Phillips, Hager & North Investment Funds Ltd. are principal distributors of, or may distribute certain series of units of, the Fund. Dealers may receive an ongoing commission based on the total value of their clients' investment in certain series of units of the Fund.

Registrars

RBC GAM, RBC Investor Services Trust ("RBC IS") or Royal Bank (or a combination thereof) are the registrars of the Fund and keep records of who owns units of the Fund. The registrars earn a fee, which is paid by the manager from the fixed administration fee paid by the Fund.

¹ The management expense ratio ("MER") is based on the direct expenses charged to the Fund and the Fund's proportionate share of the expenses of underlying funds, if any, for the stated period, excluding commissions and other portfolio transaction costs, and is expressed as an annualized percentage of the daily average net asset value during the period. RBC GAM may, at its discretion and without notice to unitholders, waive or absorb certain operating expenses. MER includes the waiver or absorption by RBC GAM of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by RBC GAM.

² The Fund's portfolio turnover rate gives an indication of the level of activity employed by the portfolio manager. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund. The portfolio turnover rate is not applicable to money market funds.

³ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period. The trading expense ratio is not applicable to fixed-income transactions.

⁴ From January 25, 2016.

Effective March 1, 2020, the administration fees for Series A units were reduced to 0.15% from 0.20%. If the changes to the administration fees would have been in effect throughout the financial year ended December 31, 2020, the adjusted MER for each series of the Fund would be: Series A – 2.09%.

Effective June 30, 2016, the management fees for Series A, Advisor Series, Series T5 and Series T8 units were reduced to 1.75% from 1.85%. If the changes to the management fees would have been in effect throughout the financial year ended December 31, 2016, the adjusted MER for each series of the Fund would be: Series A – 2.14%, Advisor Series – 2.10%, Series T5 – 2.09% and Series T8 – 2.07%.
