## MANAGEMENT DISCUSSION OF FUND PERFORMANCE

### Investment Objective and Strategies

The Fund pursues above-average total returns comprised of interest income and capital growth by investing in higher-yielding corporate or government debt securities from anywhere around the world.

The Fund invests primarily in global high yield debt securities rated below BBB(-) by Standard & Poor's. The portfolio manager employs a value-focused philosophy for corporate bonds, striving to invest in quality companies having stable to improving credit profiles which are undervalued given current market sentiment. The Fund manages risks by limiting its holdings in any single industry, issuer, country or credit rating. The Fund may use derivatives to protect against losses from changes in interest rates, market indices and currency fluctuations.

### Results of Operations

The Fund's net asset value was \$3.3 billion as of June 30, 2023.

Over the past six months, the Fund's Series F units gained 3.7%. The Fund's return is after the deduction of fees and expenses. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of any other series, which may vary because of differences in management fees and expenses.

The Fund's two segments – U.S. high-yield corporate bonds and emerging-market government fixed income – performed well in the first six months of 2023 as inflation continued to ease even as economic growth remained relatively robust. U.S. high-yield benefited from better-than-expected economic growth, strong company balance sheets and a modest supply of new bonds, while emerging-market fixed income was aided by China's decision to reopen its economy from COVID lockdowns and the halting by central banks of interest-rate hikes inhibiting the economy.

In the high-yield corporate segment, the Fund's performance was bolstered by the Fund's position in bonds issued by cruise lines and cinemas, which benefited from strong consumer demand for travel and spending on experiences. The Fund's underweight in certain underperforming telecommunications companies also helped returns. Limiting returns in the high-yield segment were positions in the Energy sector, which was hurt by falling energy prices.

In the emerging-market segment, relative performance was aided by exposure to high-yielding issuers such as El Salvador, the Dominican Republic, Nigeria and Costa Rica. In contrast, the Fund's exposure to bonds issued by highly rated emerging-market countries such as Chile and Malaysia hurt relative performance. The decision to hold more exposure to emerging markets than high-yield corporate bonds had a negative impact on the Fund's overall returns.

### Recent Developments

The possibility of a deeper-than-expected U.S. recession and an underwhelming economic recovery in China are among the issues that are likely to affect the Fund's returns over the coming months. In the U.S., slower economic growth and tougher access to credit could increase default rates to levels closer to longer-term averages of 3% to 4%. With this in mind, the portfolio manager remains cautious about the U.S. economic outlook.

The portfolio manager has a more optimistic outlook regarding emerging markets given attractive valuations of sovereign high-yield issuers and increasing expectations that emerging-market central banks are preparing to start lowering interest rates. The portfolio manager plans to retain a small bias toward emerging-market sovereign bonds relative to high-yield corporate bonds.

Effective January 1, 2023, Suomitra Sanatani was appointed as Chair of the Independent Review Committee ("the IRC"). Effective February 1, 2023, Joanne Vézina was appointed as a member of the IRC. Effective March 1, 2023, Enrique Cuyegkeng was appointed as a member of the IRC.

<sup>1</sup> The management expense ratio ("MER") is based on the direct expenses charged to the Fund and the Fund's proportionate share of the expenses of underlying funds, if any, for the stated period, excluding commissions and other portfolio transaction costs, and is expressed as an annualized percentage of the daily average net asset value during the period. RBC GAM may, at its discretion and without notice to unitholders, waive or absorb certain operating expenses. MER includes the waiver or absorption by RBC GAM of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by RBC GAM.

<sup>2</sup> The Fund's portfolio turnover rate gives an indication of the level of activity employed by the portfolio manager. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund. The portfolio turnover rate is not applicable to money market funds.

<sup>3</sup> The trading expense ratio represents total commissions and other portfolio transaction costs of the Fund and the Fund's proportionate share of such costs of underlying funds expressed as an annualized percentage of daily average net asset value during the period. The trading expense ratio is not applicable to fixed-income transactions.

Effective March 1, 2020, the administration fees for Series A units were reduced to 0.05% from 0.10%. If the changes to the administration fees would have been in effect throughout the financial year ended December 31, 2020, the adjusted MER for each series of the Fund would be: Series A – 1.73%.

**FINANCIAL HIGHLIGHTS (cont.)**

Series D	0.90%	17%	83%	0.05%
Series F	0.75%	—	100%	0.05%

**PAST PERFORMANCE**

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional units of the Fund and would be lower if distributions were not reinvested. The performance information does not take into account sales, redemption, distribution, optional charges or income taxes payable that would have reduced returns or performance. Past performance does not necessarily indicate how the Fund may perform in the future. A fund with more than 10 years of performance history is only permitted to disclose the past 10 years.

**Year-by-Year Returns (%)**

The bar chart indicates the Fund’s performance for each of the years shown, and illustrates how the Fund’s performance has changed from year to year. The bar chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the end of the financial year or interim period.

Inception dates are not provided for series that have been in existence for more than 10 years.

Advisor Series units with a deferred sales charge option were re-designated as Series A units effective April 11, 2022.

For the 12-month periods ended December 31 and the six-month period ended June 30, 2023.
