## RBC 1-5 YEAR LADDERED CANADIAN BOND ETF

---

June 30, 2018

**Portfolio Manager** RBC Global Asset Management Inc. ("RBC GAM")

The Board of Directors of RBC Global Asset Management Inc. approved this interim management report of fund performance on August 9, 2018.

### A Note on Forward-looking Statements

This report may contain forward-looking statements about the ETF, its future performance, strategies or prospects, and possible future ETF action. The words "may," "could," "should," "would," "suspect," "outlook," "believe," "plan," "anticipate," "estimate," "expect," "intend," "forecast," "objective" and similar expressions are intended to identify forward-looking statements.

Forward-looking statements are not guarantees of future performance. Forward-looking statements involve inherent risks and uncertainties, both about the ETF and general economic factors, so it is possible that predictions, forecasts, projections and other forward-looking statements will not be achieved. We caution you not to place undue reliance on these statements as a number of important factors could cause actual events or results to differ materially from those expressed or implied in any forward-looking statement made in relation to the ETF. These factors include, but are not limited to, general economic, political and market factors in Canada, the United States and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological changes, changes in laws and regulations, judicial or regulatory judgments, legal proceedings and catastrophic events.

The above list of important factors that may affect future results is not exhaustive. Before making any investment decisions, we encourage you to consider these and other factors carefully. All opinions contained in forward-looking statements are subject to change without notice and are provided in good faith but without legal responsibility.

## MANAGEMENT DISCUSSION OF FUND PERFORMANCE

### Investment Objective and Strategies

The ETF seeks to provide unitholders with exposure primarily to the performance of a diversified portfolio of Canadian corporate and government bonds, divided (“laddered”) into five groupings with staggered maturities from one to five years, which will provide regular income while preserving capital.

The ETF will achieve exposure to Canadian corporate and government bonds primarily by investing in a portfolio of five equally weighted sub-portfolios, each of which is targeted to provide at least 30% exposure to government bonds and no more than 70% exposure to corporate bonds. The portfolios may deviate at times from their targeted weights due to market fluctuations between rebalance periods. The government bond exposure will be obtained by direct investment in one or more government bonds. The decision to invest in each government bond is based on RBC GAM’s assessment of each bond’s term to maturity, credit quality, yield to maturity and an overall emphasis on issuer diversification. The corporate bond exposure will be obtained primarily by investing in an appropriate RBC Target Maturity Corporate Bond ETF. Each sub-portfolio will have remaining terms to maturity ranging from one to five years. At the end of each year, the nearest term sub-portfolio will be sold and proceeds rolled into a new five-year sub-portfolio in order to maintain the one- to five-year ladder. The portfolio holdings will be rebalanced on a quarterly basis. The frequency of the rebalancing may change without notice.

### Results of Operations

The ETF’s net asset value was \$215 million as of June 30, 2018.

Over the past six months, the ETF’s CAD units gained 0.3%. The ETF’s return is after the deduction of fees and expenses. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of the ETF.

Canadian fixed-income bonds recorded modest total returns during the first half of 2018, with corporate bonds slightly outperforming government and provincial bonds. Economic growth continued to accelerate. As a result, the Bank of Canada (the “BOC”) raised rates once during the period while the U.S. Federal Reserve (the “Fed”) hiked rates twice. Bonds recovered from significant declines early in the period, when strengthening economic growth and concern about faster inflation prompted the BOC and the Fed to boost short-term interest rates. However, the potential for a global trade war and political developments in Europe led to worries about economic growth, pulling down bond yields and lifting prices.

In this environment, Canadian bonds with maturities of fewer than five years managed modest total returns. Bond yield increases were fairly uniform across all maturities in the portfolio, and most of the return was the result of income generated by the portfolio rather than changes in interest rates.

### Recent Developments

The Canadian bond market is torn between the forces of strong global economic growth and higher oil prices, both of which tend to push up yields, and the threat of a trade war and unsettled European politics, which should pull yields down. In this uncertain environment, the portfolio manager expects Canadian bond returns in the second half of the year to be consistent with those in the first half.

### Related-Party Transactions

#### *Manager, Trustee and Portfolio Manager*

RBC GAM is an indirect, wholly owned subsidiary of Royal Bank of Canada (“Royal Bank”) and is the manager, trustee and portfolio manager of the ETF. RBC GAM is responsible for the ETF’s day-to-day operations, holds title to the ETF’s property on behalf of its unitholders, and provides investment advice and portfolio management services to the ETF. RBC GAM is paid a management fee by the ETF as compensation for its services. The management fee is calculated and accrued on a daily basis and is based on a percentage of the net asset value of the ETF.

RBC GAM or its affiliates may earn fees and spreads in connection with various services provided to, or transactions with, the ETF, such as banking, brokerage, securities lending, foreign exchange and derivatives transactions. RBC GAM or its affiliates may earn a foreign exchange spread when unitholders buy and sell ETF units denominated in different currencies. The ETF may also maintain bank accounts and overdraft provisions with Royal Bank for which Royal Bank may earn a fee. Affiliates of RBC GAM that provide services to the ETF in the course of their normal businesses are discussed below.

#### *Custodian and Valuation Agent*

RBC Investor Services Trust (“RBC IS”) is the custodian and valuation agent and holds the assets of the ETF and provides administrative services to the ETF. RBC IS earns a variable fee based on the value of assets under custody and a fixed fee for other valuation and administrative services.

#### *Designated Broker*

RBC GAM has entered into an agreement with RBC Dominion Securities Inc., an affiliate of RBC GAM, to act as designated broker and/or authorized dealer for the distribution of units of the ETF, on terms and conditions that are comparable to arm’s length agreements in the ETF industry. The material terms and conditions of the agreement have been disclosed in the ETF’s Prospectus.

### ***Securities Lending Agent***

To the extent the ETF may engage in securities lending transactions, RBC IS may act as the ETF's securities lending agent. Any revenue earned on such securities lending is split between the ETF and the securities lending agent.

### ***Brokers and Dealers***

The ETF has established standard brokerage and dealing agreements at market rates with related parties. These related-party commissions were \$1,000 (2017 – \$1,000) or 100% (2017 – 100%) of the total transaction costs paid for this ETF.

### ***Other Related-Party Transactions***

Pursuant to applicable securities legislation, the ETF relied on the standing instructions from the Independent Review Committee with respect to one or more of the following transactions:

#### ***Related-Party Trading Activities***

- (a) trades in securities of Royal Bank;
- (b) investments in the securities of issuers for which a related-party dealer acted as an underwriter during the distribution of such securities and the 60-day period following the conclusion of such distribution of the underwritten securities to the public;
- (c) purchases of debt securities from or sales of debt securities to a related-party dealer, where it acted as principal.

The applicable standing instructions require that Related-Party Trading Activities be conducted in accordance with RBC GAM policy and that RBC GAM advise the Independent Review Committee of a material breach of any standing instruction. RBC GAM policy requires that an investment decision in respect of Related-Party Trading Activities (i) is made free from any influence of Royal Bank or its associates or affiliates and without taking into account any consideration relevant to Royal Bank or its affiliates or associates, (ii) represents the business judgment of the portfolio manager, uninfluenced by considerations other than the best interests of the ETF, (iii) is in compliance with RBC GAM policies and procedures, and (iv) achieves a fair and reasonable result for the ETF.

## FINANCIAL HIGHLIGHTS

The following tables show selected key financial information about the ETF and are intended to help you understand the ETF's financial performance for the past six months (noted by June 30, 2018), and for the past five years or for the periods since inception. This information is derived from the ETF's unaudited interim financial statements and audited annual financial statements. For financial years beginning on or after January 1, 2014, financial highlight information is derived from financial statements prepared in compliance with International Financial Reporting Standards ("IFRS"). For financial years prior to January 1, 2014, financial highlight information is derived from financial statements prepared in accordance with Canadian generally accepted accounting principles ("GAAP"). "Net Assets," for the periods prior to 2014, are calculated in accordance with GAAP, and "Net Asset Value" is derived from the valuation method disclosed in the RBC Funds Annual Information Form and is used for transactional purposes (see Ratios and Supplemental Data). All other calculations for the purposes of this MRFP are made using Net Asset Value. There is no significant difference between "Net Assets" and "Net Asset Value" under IFRS.

<sup>1</sup> Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period. This table is not intended to be a reconciliation of beginning to ending net assets per unit.

<sup>2</sup> Distributions are either paid in cash, reinvested in additional units of the ETF, or both.

<sup>3</sup> From January 19, 2016.

### Ratios and Supplemental Data

As at	Net Asset Value (\$000s)	Number of Units Outstanding (000s)	Management Expense Ratio (%) <sup>1</sup>	MER Before Absorption (%) <sup>1</sup>	Trading Expense Ratio (%) <sup>2</sup>	Portfolio Turnover Rate (%) <sup>3</sup>	Net Asset Value Per Unit (\$)	Closing Market Price (\$)

<sup>1</sup> The management expense ratio ("MER") is based on expenses for the stated period, excluding commissions and other portfolio transaction costs, and is expressed as an annualized percentage of the daily average net asset value during the period. RBC GAM may, at its discretion and without notice to unitholders, waive or absorb certain operating expenses. MER includes the waiver or absorption by RBC GAM of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by RBC GAM.

<sup>2</sup> The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period. The trading expense ratio is not applicable to fixed-income transactions.

<sup>3</sup> The ETF's portfolio turnover rate gives an indication of the level of activity employed by the portfolio manager. A portfolio turnover rate of 100% is equivalent to the ETF buying and selling all of the securities in its portfolio once in the course of the year. The higher the ETF's portfolio turnover rate in a year, the greater the trading costs payable by the ETF in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the ETF.

<sup>4</sup> From January 19, 2016.

### Management Fees

RBC GAM is the manager, trustee and portfolio manager of the ETF. A management fee is charged indirectly and directly to the ETF: indirectly as this ETF invests in the units of other RBC ETFs and the other RBC ETFs pay management fees; and directly for other portfolio manager activities. The total management fee will not exceed 0.22%, before GST/HST, of the daily net asset value of the ETF.

**PAST PERFORMANCE**

The performance information shown assumes that all distributions made by the ETF in the periods shown were reinvested in additional units of the ETF and would be lower if distributions were not reinvested. The performance information does not take into account sales, redemption, distribution, optional charges or income taxes payable that would have reduced returns or performance. Past performance does not necessarily indicate how the ETF may perform in the future. A fund with more than 10 years of performance history is only permitted to disclose the past 10 years.

**Year-by-Year Returns (%)**

The bar chart indicates the ETF's performance for each of the years shown, and illustrates how the ETF's performance has changed from year to year. The bar chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the end of the financial year or interim period.

The ETF's units have been available for sale to unitholders since January 19, 2016.

Inception dates are not provided for Funds that have been in existence for more than 10 years.

For the 12-month periods ended December 31 and the six-month period ended June 30, 2018.
