

RBC Global Resources Fund

Investment Objective

To provide long-term capital growth by investing in equity securities of companies around the world in any or all of the Energy, Materials, Industrials, and Utilities sectors. The fund will invest in companies that are involved directly or indirectly in the exploration, development, production or distribution of natural or other resources.

Commentary as at June 30, 2019

Prices for natural resources were mixed during the period, with gold, iron ore and oil gaining, while some industrial metals and U.S.-produced natural gas declined. The Fund's investments in the Materials sector outperformed, offsetting the slight negative impact of the Energy sector.

Gold prices rose to their highest level in six years during the first half of 2019, and ended about 10% higher for the period. Iron-ore prices soared more than 50% after the January collapse of a dam at a major Brazilian deposit killed more than 200 people and removed about 4% of the global supply of iron ore. Investments that aided returns included Rio Tinto and BHP, both of which produce iron ore, and K92 Mining, a gold-mining company.

Energy equities had high-single-digit returns in the first half of 2019 after a decision late last year by OPEC to cut oil production helped put a floor beneath prices. U.S. natural-gas prices plunged, closing near US\$2.30 per million British thermal units amid excess supplies. Energy-related stocks

that aided relative returns included Hess Corp., which rose as development of its Guyana project advanced. The absence in the portfolio of Occidental Petroleum, which underperformed after outbidding Chevron to acquire Anadarko Resources, aided relative returns.

A decision in early July by OPEC and its sometimes ally, Russia, to extend production cuts for another six months was necessary to counter rising crude-oil inventories and the risk of slowing demand. The portfolio manager expects supply to exceed demand in the second half of 2019, lowering global inventories.

Precious metal equities are poised to benefit from any weakness in the U.S. economy that could prompt the Federal Reserve to begin easing interest rates. The portfolio manager continues to invest primarily in higher-quality companies with superior assets, disciplined management teams and a focus on free cash flow.

RBC Global Resources Fund

Disclosure

RBC Funds, BlueBay Funds, PH&N Funds and RBC Corporate Class Funds are offered by RBC Global Asset Management Inc. and distributed through authorized dealers.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus or Fund Facts document before investing. Except as otherwise noted, the indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any unitholder that would have reduced returns. Mutual funds are not guaranteed or covered by the Canadian Deposit Insurance Corporation or by any other government deposit insurer. For money market funds, there can be no assurances that the fund will be able to maintain its net asset value per unit at a constant amount or that the full amount of your investment in the fund will be returned to you. The value of mutual funds change frequently and past performance may not be repeated.

Quartile rankings are determined by Morningstar Research Inc., an independent research firm, based on categories maintained by the Canadian Investment Funds Standards Committee (CIFSC). Quartile rankings are comparisons of the performance of a fund to other funds in a particular category and are subject to change monthly. The quartiles divide the data into four equal segments expressed in terms of rank (1, 2, 3 or 4).
